Making Money Christine Desan,2014-11-28 Money travels the modern world in disguise It looks like a convention of human exchange a commodity like gold or a medium like language But its history reveals that money is a very different matter It is an institution engineered by political communities to mark and mobilize resources As societies change the way they create money they change the market itself along with the rules that structure it the politics and ideas that shape it and the benefits that flow from it One particularly dramatic transformation in money s design brought capitalism to England For centuries the English government monopolized money s creation The Crown sold people coin for a fee in exchange for silver and gold Commodity money was a fragile and difficult medium the first half of the book considers the kinds of exchange and credit it invited as well as the politics it engendered Capitalism arrived when the English reinvented money at the end of the 17th century When it established the Bank of England the government shared its monopoly over money creation for the first time with private investors institutionalizing their self interest as the pump that would produce the money supply The second half of the book considers the monetary revolution that brought unprecedented possibilities and problems The invention of circulating public debt the breakdown of commodity money the rise of commercial bank currency and the coalescence of ideological commitments that came to be identified with the Gold Standard all contributed to the abundant and unstable medium that is modern money All flowed as well from a collision between the individual incentives and public claims at the heart of the system The drama had constitutional dimension money as its history reveals is a mode of governance in a material world That character undermines claims in economics about money s neutrality The monetary design innovated in England would later spread producing the global architecture of modern money

A New History of the Royal Mint C. E. Challis,1992-11-19 This major study traces the development of English minting from the seventh century to the twentieth century

St Albans Abbey: The Excavation of the Chapter House 1978 Martin Biddle,Birthe Kjølbye-Biddle,Megan Kirkpatrick,Francis M. Morris,2024-06-13 Excavations at the site of the medieval chapter house of St Albans Abbey in 1978 uncovered fragments of decorated floor tiles of the Anglo Saxon abbey and

associated burials along with the magnificent floor of relief decorated tiles of the medieval chapter house and the graves of 16 known figures of the late 11th to 15th century abbey **The British Numismatic Journal** British Numismatic Society,1903 *Mortality, Trade, Money and Credit in Late Medieval England (1285-1531)* Pamela Nightingale,2020-07-21

The eleven articles in this volume examine controversial subjects of central importance to medieval economic historians Topics include the relative roles played by money and credit in financing the economy whether credit could compensate for shortages of coin and whether it could counteract the devastating mortality of the Black Death Drawing on a detailed analysis of the Statute Merchant and Staple records the articles chart the chronological and geographical changes in the economy from the late thirteenth to the early sixteenth centuries This period started with the triumph of English merchants over alien exporters in the early 1300s and concluded in the early 1500s with cloth exports overtaking wool in value The articles assess how these changes came about as well as the degree to which both political and economic forces altered the pattern of regional wealth and enterprise in ways which saw the northern towns decline and London rise to be the undisputed financial as well as the political capital of England *Medieval Studies* James M. Powell,1992-08-01 In addition to sections devoted to Latin paleography diplomatics computer assisted research numismatics archaeology problems in chronology and prosopography this text describes state of the art research methodology and critical approaches to English literature Latin philosophies law science art and music
