American Lumberman, 1917 **Resurrection of the Animals** Anita Skeen, 2002-02-28 The Resurrection of the Animals explores the trinity of the natural world the humans adrift in it and the animals that accompany them Although each of the five sections centers on a particular theme motifs of change loss cycles and transformation thread through the collection weaving the parts into a unified whole Individual sections focus on the seasons of the year and by extension people's lives the power of memory and its limitations the theory that what is magical often resides within and the mysteries of love The Resurrection of the Animals culminates in the title section revealing the lessons of kinship with animals and how epiphanies occur in the simplest actions taking a walk with dogs or catching sight of a bird on the wing These poems suggest that memory association and interaction with the tangible world can revive a part of the self that has slipped below the depths of consciousness

House documents, 1891 **The Knife Man** Wendy Moore, 2007-12-18 The vivid often gruesome portrait of the 18th century pioneering surgeon and father of modern medicine John Hunter When Robert Louis

Stevenson wrote his gothic horror story of Dr Jekyll and Mr Hyde he based the house of the genial doctor turned fiend on the home of John Hunter The choice was understandable for Hunter was both widely acclaimed and greatly feared From humble origins John Hunter rose to become the most famous anatomist and surgeon of the eighteenth century In an age when operations were crude extremely painful and often fatal he rejected medieval traditions to forge a revolution in surgery founded on pioneering scientific experiments Using the knowledge he gained from countless human dissections Hunter worked to improve medical care for both the poorest and the best known figures of the era including Sir Joshua Reynolds and the young Lord Byron An insatiable student of all life forms Hunter was also an expert naturalist He kept exotic creatures in his country menagerie and dissected the first animals brought back by Captain Cook from Australia Ultimately his research led him to expound highly controversial views on the age of the earth as well as equally heretical beliefs on the origins of life more than sixty years before Darwin published his famous theory Although a central figure of the Enlightenment Hunter's tireless quest for human corpses immersed him deep in the sinister world of body snatching He paid exorbitant sums for stolen cadavers and even plotted successfully to steal the body of Charles Byrne famous in his day as the Irish giant In *The Knife Man* Wendy Moore unveils John Hunter's murky and macabre world a world characterized by public hangings secret expeditions to dank churchyards and gruesome human dissections in pungent attic rooms This is a fascinating portrait of a remarkable pioneer and his determined struggle to haul surgery out of the realms of meaningless superstitious ritual and into the dawn of modern medicine
