Steel Industry 1939-1959 Burn,1961-01-02 The Steel Industry, 1939-1959 Duncan Lyall Burn,1961 **The Steel Industry, 1939-1959: a Study in Competition and Okanning** Duncan Burn,1961 The Steel Industry Duncan Burn,1961 The Political Economy of Nationalisation in Britain, 1920-1950 Robert Millward,John Singleton,2002-04-18 In this 1998 book experts in British industrial history analyse the causes of nationalisation in the 1940s **The Reconstruction of Western Europe 1945-51** Alan S. Milward,2006 First Published in 2005 Routledge is an imprint of Taylor Francis an informa company **the cambridge economic history of europe** Edwin Ernest Rich,1967 **The Reconstruction of Western Europe 1945-1951** Alan S. Milward,2013-11-05 First Published in 2005 The author s intention was to write a history of the greatest economic boom in European history of that unique ugly and triumphant experience of the 1950s and 1960s which changed so utterly the scope of human existence and expectations as well as the consciousness of the people of western Europe But it became clear that this extraordinary boom had one other attribute as unique as the remarkable length of time over which the growth of output incomes and wealth lasted The Politics of Steel Yves Meny,Vincent Wright,Martin Rhodes,2012-02-14 No detailed description available for The Politics of Steel **The European Yearbook of Business History** Wilfried Feldenkirchen,Terry Gourvish,2019-04-26 First published in 1999 this volume aims to reflect on the changing structure experience and aspirations of European business as it approaches the Millennium including chapters in issues including business scandals in the Weimar Republic the evolution of management consultancies in Portugal and Spain and the British Public Sector The yearbook exploits these changes by serving as a forum for debate in Europe and aims to bring work on individual countries to a wider European audience Responding to the challenge of globalization cooperation within a single European market and an increasing interest in corporate governance and environmental issues the yearbook broadens to include socio political issues along with stimulating new types of scholarship among European business historians and new preservation strategies by business archivists **The Unbound Prometheus** David S. Landes,2003-06-26 Sample Text Rebirth of a Nation Kenneth O. Morgan,1981 A wide ranging and comprehensive analysis of modern Welsh history by the acclaimed historian Kenneth O Morgan Taking as its starting point 1880 the book covers all aspects of the nation s history from political social economic and religious development to literary intellectual and sporting achievement **Reader's Guide to British History** David Loades,2020-12-17 The Reader sGuide to British History is the essential source to secondary material on British history This resource contains over 1 000 A Z entries on the history of Britain from ancient and Roman Britain to the present day Each entry lists 6 12 of the best known books on the subject then discusses those works in an essay of 800 to 1 000 words prepared by an expert in the field The essays provide advice on the range and depth of coverage as well as the emphasis and point of view espoused in each publication When Globalization Fails James MacDonald,2015-01-06 This sweeping history examines two centuries of

global trade and warfare shedding new light on the relationship between economics and conflict In the nineteenth century liberals exulted that the spread of commerce would usher in global prosperity and peace but these dreams were dashed by imperial squabbles the carnage of 1914-18 and the protectionism depression and conflict that followed In the wake of World War II the globalists tried again With the Communist bloc disconnected from the global economy a new international order was created buttressing free trade with the informal supremacy of the United States But this benign period is coming to an end Expertly combining political economic and military history James Macdonald argues that if industrial nations are more prosperous they are also more vulnerable While a dependence on trade may push toward cooperation the attendant insecurity pulls in the opposite direction leading to conflict In Macdonald's telling World War I's naval blockades were as important as its trenches and World War II was a struggle for raw materials in a world that had rejected free trade Today the Pax Americana that kept insecurities at bay is being undermined by China's rise with potentially dangerous consequences Rich in original historical analysis and enlivened by vivid quotation When Globalization Fails recasts what we know about war peace and trade and raises vital questions about the future Industrial Policy in Britain 1945-1951 Martin

Chick, 2002-04-30 This is a detailed archive based study of the economic planning of the Attlee governments in which the author seeks to analyse the interaction between the decisions of central planners and the micro economic effects of these decisions Throughout the book Martin Chick pays particular attention to the level pattern and quality of fixed capital investment At the same time there is a continuous concern with the struggle between politicians economists and industrialists over the mix of pricing mechanisms and administrative orders which were to be used in this period This struggle permeated all discussions over matters such as the organisation of nationalised industries the monopoly structure of nationalised industries the allocation of resources and the promotion of higher productivity The author also asks what impact if any economic planning had on the productivity performance of the UK economy *Steelworkers in struggle* Charlie McGuire, 2025-05-20 Using oral histories gathered from trade unionists this book explores the national steelworkers strike of 1980 and asserts its significance as a key turning point in modern British history The strike was nominally a response to a 2% pay offer made by British Steel Corporation BSC at a time when inflation was 17% but was generated by the widespread works closures that characterised the British steel industry at this time The outcome of the strike was a much higher pay increase but no change to the deindustrialisation strategy of BSC and the government The book explores the strike from the perspective of those who fought it and reveals the short and longer term consequences it had on the industry the unions and the workers themselves *Manufacturing Possibilities* Gary Herrigel, 2010-07-15 Manufacturing Possibilities examines adjustment dynamics in the steel automobile and machinery industries in Germany the U S and Japan since World War II As national industrial actors in each sector try to compete in global markets the book argues that they recompose firm and industry boundaries stakeholder identities and interests and governance mechanisms at all levels of their political economies

Micro level study of industrial transformation in this way provides a significant window on macro level processes of political economic change in the three societies Theoretically the book marks a departure from both neoliberal economic and historical institutionalist perspectives on change in advanced political economies It characterizes industrial change as a creative bottom up process driven by reflective social actors This alternative view consists of two distinctive claims The first is that action is social reflective and ultimately creative When their interactive habits are disrupted industrial actors seek to repair their relations by reconceiving them Such imaginative interaction redefines interest and causes unforeseen possibilities for action to emerge enabling actors to trump existing rules and constraints Second industrial change driven by creative action is recompositional In the social process of reflection actors rearrange modify reconceive and reposition inherited organizational forms and governance mechanisms as they experiment with solutions to the challenges that they face Continuity in relations is interwoven with continuous reform and change Most remarkably creativity in the recomposition process makes the introduction of entirely new practices and relations possible Ultimately the message of *Manufacturing Possibilities* is that social study of change in advanced political economies should devote itself to the discovery of possibility Preoccupation with constraint and failure to appreciate the capaciousness of reflective social action has led much of contemporary debate to misrecognize the dynamics of change As a result discussion of the range of adjustment possibilities in advanced political economies has been unnecessarily limited *France Restored* William I. Hitchcock, 2000-11-09 Historians of the Cold War argues William Hitchcock have too often overlooked the part that European nations played in shaping the post World War II international system In particular France a country beset by economic difficulties and political instability in the aftermath of the war has been given short shrift With this book Hitchcock restores France to the narrative of Cold War history and illuminates its central role in the reconstruction of Europe Drawing on a wide array of evidence from French American and British archives he shows that France constructed a coherent national strategy for domestic and international recovery and pursued that strategy with tenacity and effectiveness in the first postwar decade This once occupied nation played a vital part in the occupation and administration of Germany framed the key institutions of the new Europe helped forge the NATO alliance and engineered an astonishing economic recovery In the process France successfully contested American leadership in Europe and used its position as a key Cold War ally to extract concessions from Washington on a wide range of economic and security issues *Peace Science* Partha Gangopadhyay, Manas Chatterji, 2009-08-22 The process of globalisation has its own dynamics and several serious flaws that have resulted in significant economic political and social imbalances in the global political economy This book examines the implications of these imbalances for achieving lasting global peace **Transnational Capital and Class Fractions** Bob Jessop, Henk Overbeek, 2018-08-14 Emerging in the late 1970s the Amsterdam School s AS most distinctive contribution to international political economy was the systematic incorporation of the Marxian concept of capital fractions into the study of international

politics Contending that politics in advanced capitalist countries takes place in a fundamentally transnationalized space in which the distinction between domestic and international has blurred it shows how in this space politics is structured by competing comprehensive concepts of control Presenting a concise and instructive introduction to the origins development and significance of this distinct approach this book provides a unique overview of the School s contemporary significance for the field Offering a new generation of critical scholars the opportunity to become acquainted at first hand with some of the contributions that have shaped the work of the AS the contributions present critical commentaries discussing the merits and shortcomings of the AS from a variety of perspectives and undertake a self critical evaluation of the current place and value of the AS framework in the broader landscape of approaches to the study of contemporary capitalism Written for scholars and students alike it will be of interest to those working in international political economy international relations and political science political sociology European studies and branches of academic economics such as regulation theory and institutional economics
