*Steel* Donald F. Barnett, Louis Schorsch, 1983      **The Global Restructuring of the Steel Industry** Anthony D'Costa, 1999-01-28 Drawing upon case studies of the steel industry in the US Japan South Korea Brazil and India this book explains how and why the steel industry has shifted from advanced capitalist countries to late industrializing countries Anthony P D Costa examines the relationship between industrial change and institutional responses to technological diffu

*The Effects of Import Quotas on the Steel Industry* Louis Schorsch, 1984      **Steel and Steelworkers** John Hinshaw, 2012-02-01 Steel and Steelworkers is a fascinating account of the forces that shaped Pittsburgh big business and labor through the city's rapid industrialization in the mid nineteenth century its lengthy era of industrial maturity its precipitous deindustrialization toward the end of the twentieth century and its reinvention from hell with the lid off to America's most livable post industrial city Hinshaw examined a wide variety of company union and government documents oral histories and newspapers to reconstruct the steel industry and the efforts of labor business and government to refashion it A compelling report of industrialization and deindustrialization in which questions of organization power and politics prove as important as economics Steel and Steelworkers shows the ways in which big business and labor helped determine the fate of steel and Pittsburgh      *Area Wage Survey*, 1990      *Productivity: a Selected Annotated Bibliography*, 1990

**Productivity**, 1990      **Bulletin of the Bureau of Labor Statistics**, 1990      **Employment Practices and Business Strategy** Peter Cappelli, 1999 This book explores the reasons for persistent differences in work practices both within and between industries The authors found that the strategy that a firm chooses to follow often determines the kind of work practices it fosters Therefore a firm may not adopt the approach now advocated by many management thinkers in which decision making is pushed down to the lowest level of the firm because this choice may not be consistent with its competitive strategy The authors discuss the ways that public policy can aid workers without subverting the strategic choices made by firms      **Bulletin of the United States Bureau of Labor Statistics**, 1990      **National Politics in a Global Economy**

Philip A. Mundo, 1999-10-20 In our increasingly globalized world U S trade policy stands at the intersection of foreign and domestic affairs This book explains trade policy in terms of domestic politics presenting a concise account of its origins and political significance Although trade policy is a component of foreign policy Philip A Mundo explains how it is rooted in the domestic policy process and carries with it enormous implications for domestic affairs He reviews the growing importance of trade policy since World War II particularly over the past twenty years and shows how recent policies like NAFTA are shaped by the domestic agenda Mundo explains trade policy as the product of a three stage process comprising agenda setting program adoption and implementation He reviews this process in terms of the ideas that inform trade policy the interests that seek to influence it and the institutions that shape it He also addresses the importance of specific measures such as administrative relief and trade sanctions This book distills the essence of the trade policy process into a concise innovative

framework accessible to students and general readers With the growing importance of trade policy it makes explicit many of the subtleties surrounding policymaking while fully explicating the legal and international context in which trade operates

*Horizontal Mergers* William Blumenthal, 1986 Number 14 in the Antitrust law Section monograph series this work summarizes the state of the law in every area affecting semihorizontal conglomerate and vertical mergers and was prepared as a companion to Monograph 12 *USITC Publication*, 1985

**Technology Transfer** Shastri Moonan, 2013-06-17 This study focuses on technology transfer in the steel mini mill industry It identifies two central issues how capacity is built and how demand is sustained developing a three dimensional perspective to bring into sharp focus the desirability and necessity of technology transfer The three dimensional perspective focuses on the changes in the marketplace for flat steel sheets the responsiveness and sensitivity to these market changes and applying the best available technology to obtain a high quality product Prior to this study technology transfer has been examined in a bivariate relationship namely how technology transfer contributed to the development process in developing countries and Newly Industrialized Countries NICs The framework formulated in this study showed that Japan was lagging behind all the steel producing countries because like the NICs it imported the physical and organizational technologies that fostered its prosperity Based on primary and secondary research this study revealed that high levels of operational efficiency and sophisticated product quality were achieved through continuous improvement culminating in Computer Integrated Manufacturing CIM consisting of Real Time Process Control On the other hand the research also revealed that China based the improvement of its steel industry on self reliance combined with judicious selection of foreign collaboration The theoretical underpinnings of the crucial issues in this study led to the development of an interactive model of technology transfer based upon stock and flow variables

**Industrial Dynamics** B. Carlsson, 2012-12-06 This book is based on the papers presented at a conference on New Issues in Industrial Economics held at Case Western Reserve University Cleveland Ohio June 8 10 1987 The conference was organized by the Research Program in Industrial Economics RPIE in the Department of Economics at CWRU and was sponsored by The Cleveland Foundation the Eaton Corporation and The Standard Oil Company later renamed BP America Inc Their generous support is gratefully acknowledged All of the papers have been revised in several cases extensively since their presentation at the conference One of the primary reasons for organizing the conference was the concern that Industrial Economics has become too narrowly focused in most academic programs largely being confined to Industrial Organization i e issues of public policy towards enterprise with emphasis on antitrust and regulatory policy This subject definition leaves out a number of interesting and important questions about how industries evolve over time what the role of technological change and organizational change is in that process and the associated structural changes within industries and firms The object of this book is to derme these issues and suggest a framework within which they can be analyzed I would like to thank all the conference participants for their contributions particularly my colleagues at CWRU Asim Erdilek and William S Peirce without whose encouragement

and support the conference would not have taken place      *Antidumping Laws and the U.S. Economy* Greg Mastel, 2016-09-16 This volume reviews the goals operation and history of American antidumping laws coupled with a strategy for using those laws to promote U S trade policy and economic objectives in the post Uruguay Round GATT talks

**In the Shadow of the Rising Sun** William S. Dietrich, 1991-09-15 Why is the United States unable to compete effectively with Japan What explains the inability of American political leaders to devise an industrial policy capable of focusing the energies of American business on the task of meeting the Japanese challenge How can America emerge from the shadow of the Rising Sun This book addresses these questions and proposes a controversial decision To get at the political roots of American economic decline businessman scholar William Dietrich puts the disciplined thinking of political philosophy comparative politics and international political economy to effective use in analyzing the source and nature of American institutional weakness Unlike many who have written on U S Japanese relations Dietrich does not seek a solution a particular new policy or institutional innovation such as an American counterpart to Japan s MITI Rather he emphasizes the systemic nature of America s problems The failures of management finance and politics are interlocking and reinforcing he shows and thus a change in the others that spell doom for any partial approach Most fundamental however are the political weaknesses of the system It is in the basic political inheritance of America reflected in the very design of the Constitution and the long dominance of Jeffersonian individualism over Hamiltonian statism that we must locate the roots of American impotence in the face of Japan s challenge As the problem is systemic so must the solution be equally wide ranging Nothing short of fundamental institutional reform Dietrich argues will succeed in reversing America s downward course Boasts about the victory of free market capitalism in the wake of the collapse of the Communist state directed system are premature and distract attention from the necessary recognition that it is the Japanese combination of the free market with a strong central state and a highly skilled professional bureaucracy that has really proved triumphant in our modern age of advanced technology Only if we fully understand the reasons for Japanese success and American decline can we begin the arduous but crucial task of reconstructing the American polity to give it the power required to formulate and implement a national industrial policy that can regain for the United States its preeminent place among the world s industrial powers The alternative Dietrich describes in a chilling scenario is a Pax Nipponica that will find America playing second fiddle to Japan with economic cultural and political consequences that will make Britain s eclipse by the United States earlier in this century seem mild by comparison      **Federal Support of U.S. Business** Philip Webre, 1984      *Empirical Studies of Strategic Trade Policy* Paul Krugman, Alasdair Smith, 2007-12-01 Since the 1980s economists have used the concept of strategic trade policy which takes account of imperfect competition and increasing returns in the international marketplace to criticize conventional views about free trade According to the new view a government can take strategic steps to raise its income at another country s expense by subsidizing exports or erecting trade barriers protecting certain firms from foreign competition

or promoting the development of new industries This volume looks at the experience of specific industries in order to determine the effectiveness of strategic trade policy in promoting economic growth The nine papers cover the U S and European auto industries the U S steel industry the commercial aircraft industry airline deregulation in Scandinavia and labor and industrial policy in Korea and Taiwan The authors refine the basic techniques for measuring policy effectiveness extend them to encompass industry dynamics and test the implications of new trade models International economists and trade experts in government and business will find important new insights into the role of strategic trade policy in international competitiveness

*The New International Division of Labour* Guido Starosta, 2016-06-02 This book revisits the debate over the new international division of labour NIDL that dominated discussions in international political economy and development studies until the early 1990s It submits that a revised NIDL thesis can shed light on the specificities of capitalist development in various parts of the world today Taken together the contributions amount to a novel value theoretical approach to understanding the NIDL This rests upon the distinction between the global economic content that determines the constitution and dynamics of the NIDL and the evolving national political forms that mediate its development More specifically the authors argue that uneven development is an expression of the underlying essential unity of the production of relative surplus value on a world scale They substantiate and illustrate this argument through several international case studies including Argentina Brazil Ecuador Ireland South Korea Spain and Venezuela
