The Story of the Dinosaurs in 25 Discoveries Donald R. Prothero, 2019-07-16 Today any kid can rattle off the names of dozens of dinosaurs But it took centuries of scientific effort and a lot of luck to discover and establish the diversity of dinosaur species we now know How did we learn that Triceratops had three horns Why don't many paleontologists consider Brontosaurus a valid species What convinced scientists that modern birds are relatives of ancient Velociraptor In *The Story of the Dinosaurs in 25 Discoveries* Donald R Prothero tells the fascinating stories behind the most important fossil finds and the intrepid researchers who unearthed them In twenty five vivid vignettes he weaves together dramatic tales of dinosaur discoveries with what modern science now knows about the species to which they belong Prothero takes us from eighteenth century sightings of colossal bones taken for biblical giants through recent discoveries of enormous predators even larger than Tyrannosaurus He recounts the escapades of the larger than life personalities who made modern paleontology including scientific rivalries like the nineteenth century Bone Wars Prothero also details how to draw the boundaries between species and explores debates such as whether dinosaurs had feathers explaining the findings that settled them or keep them going Throughout he offers a clear and rigorous look at what paleontologists consider sound interpretation of evidence An essential read for any dinosaur lover this book teaches us to see an ancient world ruled by giant majestic creatures anew

*Paleoneurology 1804-1966* T. Edinger,2012-12-06 Dr Tilly Edinger s first published paper dealt with a brain cast in more exact terms an endocast of the cranial cavity of Noth08auru8 a Triassic relative of the plesiosaurs With this she embarked on a working lifetime of devotion to paleoneurology a field of study that she was to transform A daughter of the famous neurologist Ludwig Edinger it was appropriate as well as fortunate that her early interest in fossil vertebrates should have become focused upon the recovery of such information concerning the history of the central nervous system as could be obtained from fossil material Her father evidently had no direct influence upon her choice of this then obscure and difficult subject although within the family circle she presumably absorbed from him some appreciation of neoneurology Indirectly however through his accumulation in Frankfurt of an outstanding collection of recent brains he provided the comparative material essential to her studies during the years she spent there Early in her career she published *Die FOBSilen Gehirne* 1929 Here was gathered together for the first time nearly all the widely scattered information on the topic It had an immediate effect As one author justly remarked this invaluable review serves not only as a basis for continuing and systematizing research on brain casts but also as an indication of the more serious gaps in present knowledge Simpson 1933 The bibliography appended to it listed 250 titles A bibliography she published in 1937 included 160 additional titles

**Dinosaurs** David E. Fastovsky,David B. Weishampel,2016-11-28 The ideal textbook for non science majors this lively and engaging introduction encourages students to ask questions assess data critically and think like a scientist Building on the success of the previous editions *Dinosaurs* has been reorganised and extensively rewritten in response to instructor and student feedback It continues to make science accessible and relevant through its clear explanations and extensive illustrations Updated to reflect recent fossil discoveries and to include new taxa the text guides students through the dinosaur groups emphasising scientific concepts rather than presenting endless facts It is grounded in the common language of modern evolutionary biology phylogenetic systematics so that students examine dinosaurs as professional paleontologists

do The key emerging theme of feathered dinosaurs and the many implications of feathers have been integrated throughout the book highlighted by the inclusion of stunning new photographs in this beautifully illustrated text now in full colour throughout     **Dougal Dixon's Dinosaurs** Dougal Dixon, 2007 The life and times of dinosaurs from their evolution to the present day discovery of their fossils
