Basic Mechanisms of Solar Activity V. Bumba, J. Kleczek, 2012-12-06 Our first

attempt to organize a Symposium on solar activity was made at the IAO General Assembly in Brighton 1970 There at the session of Commission 10 we proposed to organize a Symposium which would stress the observational aspects of solar activity It was our hope that such a Symposium might stimulate studies of those important problems in solar physics which for a long time had been neglected in overall scientific discussion Although a provisional date for the Symposium was then decided it did not take place to avoid overlapping with other IAO activities At the session of Commission 10 in Sydney on the occasion of the XVth IAO General Assembly in 1973 we repeated our proposal and forwarded the invitation of the Czechoslovak Academy of Sciences to organize the Symposium in Prague Both were accepted During the discussions about the programme of the Symposium enthusiastically promoted by the late president of Commission 10 Prof K O Kiepenheuer it was decided to change slightly its subject The theoretical problems were stressed and the majority of the Scientific Organizing Committee agreed not to deal with short lived phenomena of the solar activity or with individual active regions Symposium No 71 was held in Prague from August 25 to August 29 1975 Its Organizing Committee consisted of V Bumba Chairman W Deinzer R G Giovanelli R Howard K O Kiepenheuer M Kopecky T Krause M Kuperus G *Nature* Sir Norman Lockyer, 1919 *The Journal of the Royal Astronomical Society of Canada* Royal Astronomical Society of Canada, 1928 Library catalogue in 1911 31 p appended to v 4 **Annual Report of the Directory of the Astronomical Observatory of Harvard College** Harvard College Observatory, 1926 Annual Report Harvard College Observatory, 1927 **Literature 1976, Part 1** S. Zech, 2013-11-11 Astronomy and Astrophysics Abstracts which has appeared in semi annual volumes since 1969 is devoted to the recording summarizing and indexing of astronomical publications throughout the world It is prepared under the auspices of the International Astronomical Union according to a resolution adopted at the 14th General Assembly in 1970 Astronomy and Astrophysics Abstracts aims to present a comprehensive documentation of literature in all fields of astronomy and astrophysics Every effort will be made to ensure that the average time interval between the date of receipt of the original literature and publication of the abstracts will not exceed eight months This time interval is near to that achieved by monthly abstracting journals compared to which our system of accumulating abstracts for about six months offers the advantage of greater convenience for the user Volume 17 contains literature published in 1976 and received before August 15 1976 some older literature which was received late and which is not recorded in earlier volumes is also included We acknowledge with thanks contributions to this volume by Dr J Bouska who surveyed journals and publications in the Czech language and supplied us with abstracts in English and by the Commonwealth Scientific and Industrial Research Organization C S I R O

Sydney for providing titles and abstracts of papers on radio astronomy We want to acknowledge valuable contributions to this volume by Zentralstelle für Atomkernenergie Dokumentation Leopoldshafen which supported our abstracting service by sending us retrospective literature searches
