feel like You're teetering right on the edge of burnout You want to make a higher contribution but lack the energy You're running faster but not moving closer to your goals Everything is so much harder than it used to be As high achievers we've been conditioned to believe that the path to success is paved with relentless work That if we want to overachieve we have to overexert overthink and overdo That if we aren't perpetually exhausted we're not doing enough But lately working hard is more exhausting than ever And the more depleted we get the more effort it takes to make progress Stuck in an endless loop of Zoom eat sleep repeat we're often working twice as hard to achieve half as much Getting ahead doesn't have to be as hard as we make it No matter what challenges or obstacles we face there is a better way instead of pushing ourselves harder we can find an easier path Effortless offers actionable advice for making the most essential activities the easiest ones so you can achieve the results you want without burning out Effortless teaches you how to Turn tedious tasks into enjoyable rituals Prevent frustration by solving problems before they arise Set a sustainable pace instead of powering through Make one time choices that eliminate many future decisions Simplify your processes by removing unnecessary steps Make relationships easier to maintain and manage And much more The effortless way isn't the lazy way It's the smart way It may even be the only way Not every hard thing in life can be made easy But we can make it easier to do more of what matters most

Coding and Signal Processing for Magnetic Recording Systems Bane Vasic, Erozan M. Kurtas, 2004-11-09 Implementing new architectures and designs for the magnetic recording read channel have been pushed to the limits of modern integrated circuit manufacturing technology This book reviews advanced coding and signal processing techniques and architectures for magnetic recording systems Beginning with the basic principles it examines read/write operations data organization head positioning sensing timing recovery data detection and error correction It also provides an in depth treatment of all recording channel subsystems inside a read channel and hard disk drive controller The final section reviews new trends in coding particularly emerging codes for recording channels *The Computer Engineering Handbook* Vojin G. Oklobdzija, 2001-12-26 There is arguably no field in greater need of a comprehensive handbook than computer engineering The unparalleled rate of technological advancement the explosion of computer applications and the now in progress migration to a wireless world have made it difficult for engineers to keep up with all the developments in specialties outside their own References published only a few years ago are now sorely out of date The Computer Engineering Handbook changes all of that Under the leadership of Vojin Oklobdzija and a stellar editorial board some of the industry's foremost experts have joined forces to create what promises to be the definitive resource for computer design and engineering Instead of focusing on basic introductory material it forms a comprehensive state of the art review of the field's most recent achievements outstanding issues and future directions The world of computer engineering is vast and evolving so rapidly that what is cutting edge today may be obsolete in a few months While exploring the new developments trends and future directions of the field The Computer Engineering Handbook captures what is fundamental and of lasting value

Hybrid Estimation of Complex Systems Michael W. Hofbaur,2005-06-09 This monograph provides a tool set for hybrid estimation that can successfully monitor the behavior of complex artifacts with a large number of possible operational and failure modes such as production plants automotive or aeronautic systems and autonomous robots For this purpose ideas from the fields of System Theory and Artificial Intelligence are taken and hybrid estimation is reformulated as a search problem This allows to focus the estimation onto highly probably operational modes without missing symptoms that might be hidden among the noise in the system Additionally a novel approach to continue hybrid estimation in the presence of unknown behavioral modes and to automate system analysis and synthesis tasks for on line operation are presented This leads to a flexible model based hybrid estimation scheme for complex artifacts that robustly copes with unforeseen situations

A third assessment of global marine fisheries discards Food and Agriculture Organization of the United Nations,2019-02-19 This third update of FAO s global discard estimate adopted the fishery by

fishery approach employed in the second discards assessment published in 2005 The update included publicly available discard data in the last 20 years to establish a baseline of a time series of global marine fisheries discards This is essential for monitoring the status and trends of discard management which is the first step of the ecosystem approach to fisheries management cycle In addition the study developed a new fisheries data table incorporating landings data from the FAO Global Capture Production dataset FishStat J from 2010 to 2014 which allocated the landings to over 2 000 fisheries worldwide The current study estimated that the annual discards from global marine capture fisheries between 2010 and 2014 was 9.1 million tonnes 95% CI 6.7–16.1 million tonnes About 46 percent 4.2 million tonnes of total annual discards were from bottom trawls that included otter trawls shrimp trawls pair bottom trawls twin otter trawls and beam trawls The study included a synthesis of estimates of bycatch and discards of endangered threatened and protected ETP species Substantial advances have been made in quantifying fisheries interactions with such species so as to make informed decisions on their protection However many challenges remain especially for small scale fisheries The development of standardized data collection techniques risk based sampling and sharing of data across agencies and regions will help to identify management priorities and allow implementation and enforcement of mitigation measures A review of previous research showed that discard practices were often related to a wide range of factors so it is difficult to assess the effectiveness of fishery management actions on the amount and practice of discards Many regulations are inconsistently enforced and their implementation is often less strict than intended Piecemeal approaches in many bycatch and discards management measures can result in unintended cross taxa conflicts where regulations designed to reduce bycatch and or discards of one species or species group may increase bycatch and or discards of another Examination of approaches to accounting for and mitigating against pre catch post capture and ghost fishing mortalities demonstrates that an understanding of the relative importance of factors affecting indirect fishing mortality is necessary for estimating total fishing induced mortality and for designing and implementing mitigation measures
