*Stephen Willats* Stephen Willats, 1996-03-14 A unique approach to architecture modern buildings analysed by occupants Demonstrates an art practice intervening actively in people's lives Fascinating insight into Willats 30 year career Documents projects from cities including Berlin London New York Concerning Stephen Willats and the Social Function of Art Sharon Irish, 2020-12-10 This book on Stephen Willats pulls together key strands of his practice and threads them through histories of British cybernetics experimental art and urban design For Willats a cluster of concepts about control and feedback within living and machine systems cybernetics offered a new means to make art relevant For decades Willats has built relationships through art with people in tower blocks underground clubs middle class enclaves and warehouses on the Isle of Dogs to investigate their current conditions and future possibilities Sharon Irish's study demonstrates the power of Willats's multi-media art to catalyze communication among participants and to upend ideas about audience and art Here Irish argues that it is artists like Willats who are now the instigators of social transformation *Beyond the Plan* Stephen Willats, 2002-05-15 The book deals with the characteristics of large housing schemes as well as turn of the century houses in fact a complete range of average housing stock and examines the alterations people make to reflect their identity Willats examines people's responses to the architect's design of their homes and the way they alter them to make them their own he considers how people personalise housing which is often exactly the same as the space next door and therefore in need of individualisation

*London* Alistair O'Neill, 2007 A look at style and urbanism offering a reconsideration of the role of fashion in city life and filling in overlooked gaps in the history of London and modern design Community spaces Harnack, Maren, Haumann, Sebastian, Berkemann, Karin, Tvrtkovic, Mario, Wolf, Tobias Michael, Herold, Stephanie, 2015-06-19 Large housing estates of the post war era have shaped the face of many cities throughout Europe In the original plans of the 1950s 1980s they were to amend the urban structure and in many cases they were expected to enable a superior form of communality and urbanity The estates were built to ease the housing shortage but were also thought to quite literally become the home for a new society be it under socialist regimes or the democratic welfare state The reformation of society was expected to be supported by the environment of the newly built estates and most crucially their community spaces The different manifestations of these community spaces were the subject of the second conference of the 45plus network which took place in Darmstadt in September 2012 and which is documented in this volume By focusing on community spaces such as community centers schools churches hospitals shopping districts but also parks open spaces and sport grounds the contributions to the conference addressed spaces that were thought to be particularly important points of identification for the new societies these estates were expected to foster Community spaces were planned in order to hold the housing estates together as well designed and attractive built environments as social hubs and especially as symbolic anchors Quite often they boasted prominent design features intended to serve as recognisable markers of the estates and their programmatic subtexts While

planners and politicians conceptualized community spaces with their potential to shape identification in view communities tended to appropriate such spaces in different ways and to reinterpret their meanings In short local inhabitants as well as the broader public possibly identified with community spaces their individual features and with the ideas and practices they associated with them in significantly different ways than originally intended Today the continuing tension between intention and appropriation of community spaces can be understood as an indicator of identification processes and appears to be one of the major challenges in the redevelopment of large housing estates but might also provide unexpected opportunities Gro wohnsiedlungen der Nachkriegszeit haben das Gesicht vieler St dte in ganz Europa gepr gt Urspr nglich sollten diese Planungen der 1950er bis 1980er Jahre die Stadtstruktur verbessern und teilweise auch eine neue Form von Gemeinschaftlichkeit und Urbanit t schaffen In erster Linie zur Linderung der Wohnungsnot gebaut wurden die Siedlungen auch als buchst bliche Heimat f r eine neue Gesellschaft geplant sei es unter sozialistischen Regimes oder im demokratischen Wohlfahrtsstaat Die Umgestaltung der Gesellschaft sollte durch die Gestaltung der neuen Siedlungen unterst tzt werden wobei den gemeinschaftlich genutzten R ume ein besonderer Stellenwert zukam Die verschiedenen Ausformungen dieser R ume waren Gegenstand der zweiten Konferenz des 45plus Netzwerk die in Darmstadt im September 2012 stattfand und in diesem Band dokumentiert wird Durch die Fokussierung auf gemeinschaftlich genutzte R ume wie Parks Freifl chen und Sportpl tze aber auch Gemeindezentren Schulen Kirchen Krankenh user Einkaufsstra en stellen die in den Beitr gen der Konferenz angesprochen R ume wichtige Identifikationspunkte der neue Gesellschaften dar Gemeinschaftliche R ume wurden geplant um die neuen Wohnsiedlungen zusammenzuhalten als gut gestaltete und attraktive gebaute Umwelt als soziale Scharniere und vor allem als symbolische Anker Oft setzten sie prominente Gestaltungsmerkmale um so als Symbole der Siedlungen und ihrer programmatischen Subtexte zu dienen W hrend Planer und Politiker die gemeinschaftlichen R ume mit dem Fokus auf ihr Potenzial als Ort der Identifikation gestalteten wurden diese R ume durch die sie nutzenden Gemeinden in unterschiedlicher Weise angeeignet und auch uminterpretiert Kurz gesagt Bewohner wie auch die breite ffentlichkeit verstanden interpretierten und nutzten die gemeinschaftlichen R ume und deren individuellen Eigenschaften m glicherweise auf deutlich andere Art und Weise als urspr nglich geplant Heute k nnen die anhaltenden Spannungen zwischen Absicht und Nutzung der gemeinschaftlichen R ume als Indikator f r Identifikationsprozesse verstanden werden und stellen gleichzeitig eine der gro en Herausforderungen bei der Sanierung von Gro wohnsiedlungen dar offenbaren jedoch vielleicht auch unerwartete Chancen

*Charting space* Elize Mazadiego, 2023-10-10 By the late 1960s cartographic formats and spatial information had become a regular feature in many conceptual artworks This volume offers a rich study of conceptualisms mapping practices that includes more expanded forms of spatial representation The book presents twelve in depth case studies that address artists engagement with matters of space at a time when space was garnering new significance in art theory and culture The chapters shed fresh light on an evident spatial turn that took place from the

postwar to the contemporary period revealing how it was influenced by larger historical social and cultural contexts In addition to raising questions about conceptualism s relationship to the world the contributors illustrate how artists cartographies served as critical sites for formulating their politics upsetting prevailing systems and graphing new heterogenous spaces
