Steven Holl Idea And Phenomena:

Steven Holl Steven Holl, 2002 An overview of the built work of architect Steven Holl Idea and Phenomena focuses on the sculptural expression inherent in his designs material composition and use of light Apparent in such projects as his Makuhari Housing in Chiba Japan where he designed a new city block on dredged fill at the rim of Tokyo Bay Holl has devoted over 20 years of his professional life to exploring the use of movable walls for creating variety and what he calls spaces for individual life Even more essential to his oeuvre is what critic Herbert Muschamp has described as its astonishing sculptural presence created from the strikingly assured interplay between windows and walls curves and grids voids and planes In his fine fibered use of materials Holl employs his principle of the stone and the feather juxtaposing thin sheets of zinc roofing with rough concrete walls along knife edged junctures The results as Idea and Phenomena clearly shows from the first sketch to the final construction are buildings alert to emotional needs the spiritual properties of space and the specifics of their own surroundings

Phenomenology, Architecture and the Built World James Dodd, 2017-01-05 Phenomenology Architecture and the Built World is an introduction to the methods and basic concepts of phenomenological philosophy through an analysis of the phenomenon of the built world The conception of the built world that emerges is of space and time fashioned in accordance with a living understanding of what it is for human beings to exist in the world Human building and making is thus no mere supplementary instrument in the pursuit of the ends of life but a fundamental embodiment of the self understanding of human beings Phenomenological description is uniquely capable of bringing into view the physiognomy of this understanding its texture and complexity thereby providing an important basis for a critique of what constitutes its essence and its conditions of possibility

Invitation to Archiphen Iris Aravot, 2010 The Architect as Magician Albert C. Smith, Kendra Schank Smith, 2020-05-07 The Architect as Magician explores the connection between magic and architecture There is a belief that a greater understanding of the meaning of magic provides insights about architecture and architects design processes Architects influence the effects of nature through the making of their buildings In an analogous condition magicians perform rituals in an attempt to influence the forces of nature This book argues that architects could gain much by incorporating ideas from magic into their design process The book demonstrates through historical and current examples the important influence magic has had on the practice of architecture The authors explain how magic helps us to understand the way we infuse architecture with meaning and how magic affects and inspires architectural creation Aimed at architects students scholars and researchers The Architect as Magician helps readers discover the ambiguous and spiritual elements in their design process

Architects Today Kester Rattenbury, Robert Bevan, Kieran Long, 2006-08-10 This volume offers both an introduction to and an insight into key contemporary architects as well as giving a snapshot of the varied nature of architecture today For each architect there are details of their life and work and illustrations of their most representative and iconic buildings
