Travel Guide of Hebei Ni Hao, This book is the volume of Travel Guide of Hebei among a series of travel books Travelling in China Its content is detailed and vivid *The Tiny and the Fragmented* S. Rebecca Martin, Stephanie M. Langin-Hooper, 2018-10-16 Miniature and fragmentary objects are both eye catching and yet easily dismissed Tiny scale entices users with visions of Lilliputian worlds The ambiguity of fragments intrigues us offering tactile reminders of reality's transience Yet the standard scholarly approach to such objects has been to see them as secondary incomplete things whose principal purpose was to refer to a complete and often life size whole The Tiny and the Fragmented offers a series of fresh perspectives on the familiar concepts of the tiny and the fragmented Written by a prestigious group of internationally acclaimed scholars the volume presents a remarkable diversity of case studies that range from Neolithic Europe to pre Colombian Honduras to the classical Mediterranean and ancient Near East Each scholar takes a different approach to issues of miniaturization and fragmentation but is united in considering the little and broken things of the past as objects in their own right Whether a life size or whole thing is made in a scaled down form deliberately broken as part of its use or only considered successful in the eyes of ancient users if it shows some signs of wear it challenges our expectations of representation and wholeness of what it means for a work of art to be finished and affective Overall The Tiny and the Fragmented demands a reconsideration of the social and contextual nature of miniaturization fragmentation and incompleteness making the case that it was because of rather than in spite of their small or partial state that these objects were valued parts of the personal and social worlds they inhabited *Lakhmir Singh's Science for Class 7* Lakhmir Singh & Manjit Kaur, Lakhmir Singh's Science is a series of books which conforms to the NCERT syllabus The main aim of writing this series is to help students understand difficult scientific concepts in a simple manner in easy language The ebook version does not contain CD Constructing African Art Histories for the Lagoons of C d'Ivoire Monica Blackmun Visonà, 2017-07-05 Constructing African Art Histories for the Lagoons of C d'Ivoire is an investigation of the methods employed by art historians who study creative production in Africa While providing insights into the rich visual arts of the Lagoon Peoples of southeastern C d'Ivoire this study is one of the few attempts by an Africanist to situate local and regional artistic practices in the context of the global art market and to trace the varied receptions an African art work is given as it leaves a local context and enters an international one Drawing on her three seasons of fieldwork among Akan populations in C d'Ivoire Monica Blackmun Visonà provides a comprehensive account of a major art producing region of Africa and explores
