aspects of library provision for 6-18 year olds. It is designed to support the strategic planning and delivery of library services and programmes at a local community level or in schools. The book outlines a vision for children's library services in the next decade and carves out a strategy for engaging with the challenges and opportunities for children's librarians and policy makers in the Google environment. This book is accessible, informative and inspiring and offers practitioners the knowledge, ideas and confidence to work in partnership with other key professionals in delivering services and programmes. It provides an evidence base which promotes and encourages the development of effective library services for children and young people. The case studies, scenarios and vignettes drawn from UK and international sources show that the key issues have an international dimension and the similarities and differences in service provision will be of interest to many. In addition to the two editors' chapters are contributed by a range of internationally known practitioners and academics offering a wide perspective. Case studies at the end of each section complement themes and practices from previous chapters while rooting the discussion in a specific context. The book is organized into four parts: Children's library services; policy, people and partnerships; Connecting and engaging; reaching your audience and catching the latest wave; acknowledging the role of technology; Buildings, design and spaces; libraries for children and young people; Issues for professional practice; Readership. This book is essential reading for all senior library practitioners, children's librarians and school librarians, subject coordinators and managers in schools. It will also be of value for all postgraduate students on CILIP accredited library and information management courses.

Thoth, Architect of the Universe Ralf Ellis, 1997-01-14. What was the purpose of all the megalithic architecture that was created all around the world during the Stone Age? Ralf has developed a theory that each of these structures represents a map of the world, a map that may have been designed to pinpoint the location of the mythical Hall of Records. There is no difficulty in seeing these maps at Stonehenge and Giza; one just needs a little lateral thinking. In fact, a six-year-old is more likely to spot them than an adult. Ralf also demonstrates how important the metrology of Giza was to the ancients. In fact, we still use these units today: for the Great Pyramid measures 1760 cubits around the base and the Imperial Mile measures 1760 yards. Thus America, in particular, is still using Egyptian metrology. The Megalithic Map series. Latest version v5.4. Stonehenge Avebury, Silbury Henge, Great Pyramid, Giza, Meidum Pyramid, Precession.

A Funny Thing About Love The Estate of Rebecca Farnworth, 2010-08-05. The funny thing about love is that just when you think you've got it sorted, it turns round and bites you on the behind. Which is exactly what's happened to Carmen Miller.
