Education at the Intersection of Globalization and Technology Sharon Waller, Lee Waller, Vongai Mpofu, Mercy Kurebwa, 2021-04-07 Today's educators stand at the crossroads of globalization and technology. The world is rapidly shrinking. The workplace is being transformed before our very eyes. Technology is forever changing the way we perceive reality and the way we do business. Educators are required to equip students for a workplace that has yet to emerge. The skill sets of today's job market are often obsolete before students can enter the workplace. Now is the time for educators to rise to the challenges of our modern world. By embracing the vision of yesterday's practitioners and joining hands with tomorrow's practitioners, educators can transform our world and equip their students for the upward mobility and career flexibility required in tomorrow's workplace.

Resources in Education, 1990 *The Cambridge Handbook of Environment in Human Development* Linda Mayes, Michael Lewis, 2012-08-27 Families, communities, and societies influence children's learning and development in many ways. This is the first handbook devoted to the understanding of the nature of environments in child development. Utilizing Urie Bronfenbrenner's idea of embedded environments, this volume looks at environments from the immediate environment of the family, including fathers, siblings, grandparents, and day care personnel, to the larger environment, including schools, neighborhoods, geographic regions, countries, and cultures. Understanding these embedded environments and the ways in which they interact is necessary to understand development.
