

An aerial photograph of a lush tropical rainforest canopy. The forest is a vibrant green, with various shades of foliage visible. A large, dark tree branch extends from the upper right towards the center. A person is rappelling down this branch, wearing a red helmet and a blue shirt. The person is suspended by ropes and gear. The background is a vast expanse of the forest canopy, stretching towards the horizon.

The High Frontier Exploring The Tropical Rainforest Canopy:

The High Frontier Mark W. Moffett, 1993 Loaded with aerial plants and the millions of creatures dependent upon them tropical tree crowns are the last and greatest ecological frontier Hundreds of species earthworms frogs flowers shrubs never descend to earth during their lifetimes Eight out of ten remain unnamed and unclassified by science In *The High Frontier* Mark W. Moffett does for the tropical rainforest canopy what Jacques Cousteau did thirty years ago for undersea life Donning rock climbing gear to join researchers working 150 feet and more above the ground Moffett photographed strangler trees in Borneo giant squirrels in India and canopy bears in Colombia He entered the terrifying world of arboreal spiders and ants photographing them under extreme magnification His coverage of this new science is unparalleled in any other field Described as a world roving zoologist by National Geographic magazine for his work on five continents Moffett has documented virtually every major active canopy research site The immediacy of his writing and the intelligence of his photography make the canopy's fantastic architecture and unearthly inhabitants accessible to the general reader In the tradition of the great nineteenth century explorers he captures the struggles of the individual scientists and the passions that enable them to brave perilous situations in pursuit of their work *The High Frontier* is a modern classic of scientific discovery

Tropical Forest Canopies: Ecology and Management K.E. Linsenmair, Andrew Davis, B. Fiala, M.R. Speight, 2013-03-14 Almost half of all life on earth may exist in the world's forest canopies They may also play a vital role in maintaining the planet's climate yet they remain largely unexplored owing to difficulties of access They are renowned for their great diversity and role in forest functioning yet there are still great gaps in the understanding of this last biological frontier This seminal book shows how canopy science is now in a position to answer many of the outstanding questions among which are some of the most pressing environmental issues society is presently facing It represents a major summary of the current understanding of canopy ecology and maps a path forward into a greater understanding of tropical forest ecology and management at a time when the very future of this ecosystem is threatened by humanity's actions

Treetops at Risk Margaret Lowman, Soubadra Devy, T. Ganesh, 2013-06-22 Forest canopies not only support high terrestrial biodiversity but also represent a critical interface between the atmosphere and the earth They provide goods and services to support diverse human communities and offer opportunities to explore sustainable use of these resources for many generations of local livelihoods Forest canopies are important carbon sequestration units and in this sense serve as climate control for the planet Canopies are important energy production centers for the planet and serve as the basis for many food chains The canopy can also act as a hook for education outreach and conservation inspiring ecotourism through recreation and other sustainable uses such as treetop walks zip lines and birding Despite these critical services provided by forest canopies almost no dedicated research in the treetops was initiated until as recently as the late 1970s when single rope techniques were developed by mountaineering professionals and adapted for use in the canopy Subsequently an array of canopy access tools

was designed in the 1980s and early 1990s that have opened up this eighth continent for global exploration and discovery. This volume uses the major findings of the 5th international canopy conference as a platform for organization but it does not mimic the sessions and presentations of the conference itself. Instead it builds on the important themes that emerged from the conference and solicits articles that represent future priorities and advancements for canopy science in the next decade. Despite the global efforts of hundreds of forest scientists over the past 3 decades, forests are degrading at an accelerated rate and biodiversity is increasingly threatened by human activities. Given these trends, despite the very best efforts of the world's best scientists, other approaches must be taken. This volume summarizes the issue of treetops at risk and assembles a global authorship to examine past accomplishments and future initiatives critical in forest conservation.

Tropical Forest Canopies: Ecology and Management Karl-Eduard Linsenmair, 2001 *The Secrets of Tropical Rainforests* Jean Hamilton, 2005. Describes the unique plants and animals that exist in tropical rainforests, their interdependence and their importance to the world's ecology.

The Amazon Roger Harris, Peter Hutchison, 2007. This new edition has been completely revised with updated information on hotels, lodges, and tour operators. It contains a detailed and illustrated natural history section on native species and habitats. The Amazon is an ideal location for eco-travellers, naturalists, sports enthusiasts, and explorers. Travellers are given sound advice on responsible travel and planning their own expedition.

Environmental Management in Practice: Vol 3 Paul Compton, Dimitri Devuyst, Luc Hens, Bhaskar Nath, 2013-01-11. Volume 3: Managing the Ecosystem focuses on those ecosystems in which human intervention has been or continues to be predominant, specifically within cities and rural areas.

The River of Doubt Candice Millard, 2009-12-16. NATIONAL BESTSELLER. At once an incredible adventure narrative and a penetrating biographical portrait, the bestselling author of *River of the Gods* brings us the true story of Theodore Roosevelt's harrowing exploration of one of the most dangerous rivers on earth. A rich dramatic tale that ranges from the personal to the literally earth-shaking, *The New York Times* *The River of Doubt* is a black uncharted tributary of the Amazon that snakes through one of the most treacherous jungles in the world. Indians armed with poison-tipped arrows haunt its shadows; piranhas glide through its waters; boulder-strewn rapids turn the river into a roiling cauldron. After his humiliating election defeat in 1912, Roosevelt set his sights on the most punishing physical challenge he could find: the first descent of an unmapped rapids-choked tributary of the Amazon. Together with his son Kermit and Brazil's most famous explorer, Cândido Mariano da Silva Rondon, Roosevelt accomplished a feat so great that many at the time refused to believe it. In the process, he changed the map of the western hemisphere forever. Along the way, Roosevelt and his men faced an unbelievable series of hardships: losing their canoes and supplies to punishing whitewater rapids; enduring starvation; Indian attack; disease; drowning; and a murder within their own ranks. Three men died, and Roosevelt was brought to the brink of suicide. *The River of Doubt* brings alive these extraordinary events in a powerful nonfiction narrative thriller that happens to feature one of the most famous

Americans who ever lived From the soaring beauty of the Amazon rain forest to the darkest night of Theodore Roosevelt s life here is Candice Millard s dazzling debut Look for Candice Millard s latest book River of the Gods **The Green Republic** Sterling Evans,2010-06-28 With over 25 percent of its land set aside in national parks and other protected areas Costa Rica is renowned worldwide as the green republic In this very readable history of conservation in Costa Rica Sterling Evans explores the establishment of the country s national park system as a response to the rapid destruction of its tropical ecosystems due to the expansion of export related agriculture Drawing on interviews with key players in the conservation movement as well as archival research Evans traces the emergence of a conservation ethic among Costa Ricans and the tangible forms it has taken In Part I he describes the development of the national park system and the grand contradiction that conservation occurred simultaneously with massive deforestation in unprotected areas In Part II he examines other aspects of Costa Rica s conservation experience including the important roles played by environmental education and nongovernmental organizations campesino and indigenous movements ecotourism and the work of the National Biodiversity Institute

Coexistence Jan Sapp,2016-10-18 This book is about tropical biology in action how biologists grapple with the ecology and evolution of the great species diversity in tropical rainforests and coral reefs *Forest Canopies* Margaret D. Lowman,H. Bruce Rinker,2004-09-28 The treetops of the world s forests are where discovery and opportunity abound however they have been relatively inaccessible until recently This book represents an authoritative synthesis of data anecdotes case studies observations and recommendations from researchers and educators who have risked life and limb in their advocacy of the High Frontier With innovative rope techniques cranes walkways dirigibles and towers they finally gained access to the rich biodiversity that lives far above the forest floor and the emerging science of canopy ecology In this new edition of *Forest Canopies* nearly 60 scientists and educators from around the world look at the biodiversity ecology evolution and conservation of forest canopy ecosystems Comprehensive literature list State of the art results and data sets from current field work Foremost scientists in the field of canopy ecology Expanded collaboration of researchers and international projects User friendly format with sidebars and case studies Keywords and outlines for each chapter **The Earth Dwellers** Erich Hoyt,1997-03-21 The author alternates stories of individual ants with the research of two field biologists in Costa Rica *Saving Fish from Drowning* Amy Tan,2006-09-26 A rollicking adventure filled story packed with the human capacity for love USA Today A superbly executed good hearted farce that is part romance and part mystery With Tan s many talents on display it s her idiosyncratic wit and sly observations that make this book pure pleasure San Francisco Chronicle San Francisco art patron Bibi Chen has planned a journey of the senses along the famed Burma Road for eleven lucky friends But after her mysterious death Bibi watches aghast from her ghostly perch as the travelers veer off her itinerary and embark on a trail paved with cultural gaffes and tribal curses Buddhist illusions and romantic desires On Christmas morning the tourists cruise across a misty lake and disappear With picaresque characters and mesmerizing

imagery Saving Fish from Drowning gives us a voice as idiosyncratic sharp and affectionate as the mothers of The Joy Luck Club Bibi is the observant eye of human nature the witness of good intentions and bad outcomes of desperate souls and those who wish to save them In the end Tan takes her readers to that place in their own heart where hope is found Amy Tan is among our great storytellers The New York Times Book Review Amy Tan has created an almost magical adventure that page by page becomes a metaphor for human relationships Isabel Allende With humor ruthlessness and wild imagination Tan has reaped a fantastic tale of human longings and of course their consequences Elle A book that s easy to read and hard to forget Newsweek *The Cabaret of Plants* Richard Mabey,2015-10-22 In The Cabaret of Plants Mabey explores the plant species which have challenged our imaginations awoken our wonder and upturned our ideas about history science beauty and belief Picked from every walk of life they encompass crops weeds medicines religious gathering places and a water lily named after a queen Beginning with pagan cults and creation myths the cultural significance of plants has burst upwards sprouting into forms as diverse as the panacea the cure all plant ginseng a single root of which can cost up to 10 000 Newton s apple the African vegetable elephant or boabab and the mystical night flowering Amazonian cactus the moonflower Ranging widely across science art and cultural history poetry and personal experience Mabey puts plants centre stage and reveals a true botanical cabaret a world of tricksters shape shifters and inspired problem solvers as well as an enthralled audience of romantics eccentric amateur scientists and transgressive artists The Cabaret of Plants celebrates the idea that plants are not simply the furniture of the planet but vital inventive individual beings worthy of respect and that to understand this may be the best way of preserving life together on Earth **Encyclopedia of Forest Sciences** Julian Evans,John A.
