**Histories of the Hidden God** April D DeConick, Grant Adamson, 2016-04-08 In Western religious traditions God is conventionally conceived as a humanlike creator lawgiver and king a being both accessible and actively present in history Yet there is a concurrent and strong tradition of a God who actively hides The two traditions have led to a tension between a God who is simultaneously accessible to humanity and yet inaccessible a God who is both immanent and transcendent present and absent Western Gnostic esoteric and mystical thinking capitalizes on the hidden and hiding God He becomes the hallmark of the mystics Gnostics sages and artists who attempt to make accessible to humans the God who is secreted away Histories of the Hidden God explores this tradition from antiquity to today The essays focus on three essential themes the concealment of the hidden God the human quest for the hidden God and revelations of the hidden God

**French Orientalism** Desmond Hosford, Chong J. Wojtkowski, 2010-07-12 In 1798 Napoléon I launched his Egyptian Campaign and opened what has become recognized as the canonic period of French Orientalism which extends from the late eighteenth through the early twentieth century As defined by Edward W Said Orientalism 1978 Orientalism is intrinsically Eurocentric and places the Orient in opposition to the European West as the quintessentially foreign Other In this sense the Occident supposedly defines itself by gazing at the East as its inverse image and purportedly asserts a geopolitical dominance materially confirmed through imperialism and colonization Although Europe may cast the Orient as the archetypal Other this necessarily entails deep conflict since the Orient is also frequently posited as the source of Western civilization which prohibits the articulation of a complete separation between Europe and the Orient Nevertheless according to French Orientalist discourse the East had fallen into barbarism inertia and languished awaiting the mission civilisatrice by which France undertook a heroic project of universal enlightenment The canonic approach to Orientalism has drawn much criticism which calls for re-examining the notion of French Orientalism broadening the scope of enquiry and exploring the history and ideological strategies behind French formulations of the Orient from the Middle Ages through the twenty-first century Such an expanded field of investigation reveals that the canonic Orientalist paradigm is not universally applicable particularly regarding material from before the late eighteenth century New theoretical literary historical philosophical and cultural perspectives provide the opportunity to deploy question subvert and resituate canonic Orientalist theories revealing the continuing evolution and relevance of French Orientalism as a notion with global stakes and material consequences Because of its broad scope and variety of theoretical approaches this volume will interest scholars and students from a wide spectrum of disciplines including literature gender studies history theater art history music cinema and cultural studies
