Diverse Careers in Community Psychology Judah J. Viola, Olya Glantsman, 2017-03-29. Community psychology is a diverse field. Community psychologists may work for the government, for nonprofit foundations as researchers or teachers in academic settings, at NGOs as independent consultants overseas in international development and more. Despite such professional diversity, very little information has formally been made available to students and practitioners about the range of careers they can pursue when studying community psychology. *Diverse Careers in Community Psychology* details a range of potential career paths for someone with community psychology or related social science training, describes the different types of careers, e.g., tasks involved, benefits and challenges, salary range, etc., and outlines steps one can take to develop such a career. The volume is built on three foundations: 1. a career survey of almost 450 respondents which provides quantitative information about the different types of settings in which individuals with community psychology training might find themselves; 2. more than twenty chapters by contributors who share their personal stories and guidance on how to select, prepare for, find, and succeed in careers similar to theirs; 3. and interviews with community psychologists further illustrating examples discussed in the authored chapters. This volume provides both a depth and breadth of information about the possible careers available for someone with community psychology or related training.

Sports Injuries and Rehabilitation Steff Murphy, 2019-05-19. Every physical activity gives us something to learn, increases our fitness, components, makes one confident, and refresher or recharges us to lead life happy. On the other side, participation in games and sports may lead to injury. The injury can be the minor one, serious, career ending, or even some times life threatening. An athlete can face injuries at any time, i.e., during main competition, in regular practice, reasons, or in off season training also. Sports injuries continue to increase in organized or varsity athletics and in the general population because of the increased interest in fitness and sports. In the present study, all major sports injuries including foot and ankle, knee, hip, flexors, hip joints, shoulders, head, forearm, muscles, wrist joints, arm muscles, elbow joints, pelvic, calf, etc., are described in detail in simple English language so that to reach its readers. The present book entitled *Sports Injuries and Rehabilitation* highlights all the aspects of sports injuries. The book is arranged in a lucid form and written in simple spoken English language. Hopefully, the present book will prove useful for clinicians, physiotherapists, sportsmen, and sportswomen, students, teachers, and for the general readers too.
