

Integrating theory and practice: The Three-Stage Theory Framework

Pat Collingwood¹

Synopsis: This paper explores the theme of theory for practice by initial teacher education, taking as its focus the application of a theoretical model called the Three-stage Theory Framework for relating theory to practice during practice-based learning for social work. The article is derived from a research study carried out over a period of six months and presented for scrutiny, second to March 2006.

The study demonstrates that the Three-stage Theory Framework does indeed provide a useful resource for student learning which is consistently helpful in social work learning, that the process of using the Framework has benefits for student learning, for the development of practice teaching and for social work education in performing and in practice. The study also shows that the Framework is flexible, developmental and can be used in different ways for a range of learning styles, stages of learning and contexts for learning.

Key words: theory and practice; practice learning; framework
