Subject Thought And Context:

Subject, Thought, and Context Philip Pettit, John McDowell, 1986 Are mental states in the head Or do they intrinsically involve aspects of the subject's physical and social context This volume presents a number of essays dealing with the compass of the mind The contributors broach a range of issues with a common view that physical and social magnets do act upon mental states The approaches that run through these papers make the volume challenging to cognitive psychologists theorists of artificial intelligence social theorists and philosophers

Singular Thought and Mental Files Rachel Goodman, James Genone, Nick Kroll, 2020-02-06 The notion of singular or de re thought has become central in philosophy of mind and language yet there is still little consensus concerning the best way to think about the nature of singular thought Coinciding with recognition of the need for more clarity about the notion there has been a surge of interest in the concept of a mental file as a way to understand what is distinctive about singular thought What isn't always clear however is what mental files are meant to be and why we should believe that thoughts that employ them are singular as opposed to descriptive This volume brings together original chapters by leading scholars which aim to examine and evaluate the viability of the mental files framework for theorizing about singular thought The first section of the volume addresses the central issues of the definition and nature of singular thought as well as how it relates to the notion of a mental file The second section addresses the legitimacy of the mental files conception of singular thought by assessing the philosophical motivations or the purported empirical support for the view or by laying out a specific version of it The third section helps to clarify both the notion of a mental file and the mental files conception of singular thought by focusing on their role in explaining de jure coreference in thought and language The volume then concludes with a final section that casts doubt on the mental files conception and the legitimacy of the file theoretic framework more generally

Value and Context Alan Thomas, 2010-04-08 Alan Thomas presents an original study of the status of value and its relation to the contexts in which evaluative claims are justified He articulates and defends the view that human beings do possess moral and political knowledge but that it is historically and culturally contextual knowledge in ways that say mathematical or chemical knowledge is not His exposition of a cognitivist contextualism in ethics and politics builds upon contemporary work in epistemology moral philosophy and political theory to fashion an argument that is relevant to current debates about culture modernity and relativism

The Philosophy of David Kaplan Joseph Almog, Paolo Leonardi, 2009-03-17 This volume collects new previously unpublished articles on the philosopher David Kaplan Kaplan's intellectual influence on 20th century analytic philosophy has been substantial Beyond his highly influential work in the philosophy of language and philosophical logic Kaplan is just as important in his way of doing philosophy generous witty incisive and interactive

Perspectival Thought François Recanati, 2007-09-27 Recanati examines the nature of thought and understanding and defends the idea that truth is relative to context The book will be of interest to those working in philosophy of language and linguistics as well as

philosophers of mind epistemologists and psychologists and cognitive scientists **Spinoza: Context, sources, and the early writings** Genevieve Lloyd, 2001 Self-Consciousness and Objectivity Sebastian Rödl, 2018-02-26 Sebastian Rödl undermines a foundational dogma of contemporary philosophy that knowledge in order to be objective must be knowledge of something that is as it is independent of being known to be so This profound work revives the thought that knowledge precisely on account of being objective is self knowledge knowledge knowing itself **Persons in Context** Roger Frie, William J. Coburn, 2010 In contemporary forms of psychoanalysis particularly intersubjective systems theory the turn towards contextualism has permitted the development of new ways of thinking and practicing that have dispensed with the notion of isolated individuality For many who embrace this post subjectivist way of thinking and practicing the recognition that all human experience is fundamentally immersed in the world makes the question of individuality seem confusing even anachronistic Yet the challenge of individuality remains an important and pressing issue for contemporary theory and practice ma **Language, Action and Context** Brigitte Nerlich, David D. Clarke, 1996-06-28 The roots of pragmatics reach back to Antiquity especially to rhetoric as one of the three liberal arts However until the end of the 18th century proto pragmatic insights tended to be consigned to the pragmatic that is rhetoric wastepaper basket and thus excluded from serious philosophical consideration It can be said that pragmatics was conceived between 1780 and 1830 in Britain but also in Germany and in France in post Lockian and post Kantian philosophies of language These early conceptions of pragmatics are described in the first part of the book The second part of the book looks at pragmatic insights made between 1830 and 1880 when they were once more relegated to the philosophical and linguistic underground The main stage was then occupied by a fact hunting historical comparative linguistics on the one hand and a newly spiritualised philosophy on the other In the last part the period between 1880 and 1930 is presented when pragmatic insights flourished and were sought after systematically This was due in part to a new upsurge in empiricism positivism and later behaviourism in philosophy linguistics and psychology Between 1780 and 1930 philosophers psychologists sociologists and linguists came to see that language could only be studied in the context of dialogue in the context of human life and finally as being a kind of human action itself *Chinese Thought in a Global Context* Karl-Heinz Pohl, 2022-06-08 How do Chinese and Western philosophical traditions interact today In the underlying collection of articles both Chinese and Western scholars carefully examine the issue one of fundamental importance for the mutual understanding of China and the West The volume is the result of a symposium which sought to initiate a dialogue between China and the West on questions ranging from philosophy to politics and aesthetics The papers deal with various topics of cross cultural hermeneutics such as differences between Chinese and Western concepts of man s relation to the universe human rights self and community good and evil and beauty In some of the contributions attempts are made to adapt the Chinese philosophical inheritance to the modern or post modern condition A useful reference for all those historians of ideas political scientists and China watchers alike who want to understand the

dynamics of the cultural flow between East and West and the significance of Chinese thought in a global context
