The Difference Satire Makes Fredric V. Bogel,2012-04-20 Offering both the first major revision of satiric rhetoric in decades and a critical account of the modern history of satire criticism Fredric V Bogel maintains that the central structure of the satiric mode has been misunderstood Devoting attention to Augustan satiric texts and other examples of satire from writings by Ben Jonson and Lord Byron to recent performance art Bogel finds a complicated interaction between identification and distance intimacy and repudiation Drawing on anthropological insights and the writings of Kenneth Burke Bogel articulates a rigorous richly developed theory of satire While accepting the view that the mode is built on the tension between satirist and satiric object he asserts that an equally crucial relationship between the two is that of intimacy and identification satire does not merely register a difference and proceed to attack in light of that difference Rather it must establish or produce difference The book provides fresh analyses of eighteenth century texts by Jonathan Swift John Gay Alexander Pope Henry Fielding and others Bogel believes that the obsessive play between identification and distance and the fascination with imitation parody and mimicry which mark eighteenth century satire are part of a larger cultural phenomenon in the Augustan era a questioning of the very status of the category and of categorical distinctness and opposition "Voi Altri Pochi" Mark Kyburz,2013-03-09 Critical tradition has established a certain way of reading Ezra Pound one that places the meanings of the words on the page at the centre of interest and neglects poetic communication The present study contributes to the recent challenge to this critical orthodoxy which has led to his canonization as a difficult poet by investigating the pragmatic dimension of Pound s work In its effort to reconstruct the dynamic communicative interface between Pound and his audiences in the early period of his career 1908 1925 this study draws on relevance theory a recent sharpening in pragmatic theory not so much to produce a new reading of his poetry but to suggest how Pound became difficult it is argued that the relative success and failure of his poetry to enhance cognitive and civic renewal depended on the dialectic between his presumptions of audience and the interpretive expectations and skills of his actual historical readers **The Nature of Syntactic Representation** Pauline Jacobson,G.K. Pullum,2012-12-06 The work collected in this book represents the results of some intensive recent work on the syntax of natural languages The authors differing viewpoints have in common the program of revising current conceptions of syntactic representation so that the role of transformational derivations is reduced or eliminated The fact that the papers cross refer to each other a good deal and that authors assuming quite different fram works are aware of each other s results and address themselves to shared problems is partly the result of a conference on the nature of syntactic representation that was held at Brown University in May 1979 with the express purpose of bringing together different lines of research in syntax The papers in this volume mostly arise out of work that was presented in preliminary form at that conference though much rewriting and further

research has been done in the interim period Two papers are included because although they were not given even in preliminary form at the conference it has become clear since then that they interrelate with the work of the conference so much that they cannot reasonably be left out Gerald Gazdar s statement of his program for phrase structure description of natural language forms the theoretical basis that is assumed by Maling and Zaenen and by Sag and David Dowty s paper represents a bridge between the relational grammar exemplified here in the papers by Perlmutter and Postal on the one hand and the Montague

Russian Citizenship Eric Lohr,2012-10-31 In the first book to trace the Russian state s citizenship policy throughout its history Lohr argues that to understand the citizenship dilemmas Russia faces today we must return to the less xenophobic and isolationist pre Stalin period before the drive toward autarky after 1914 eventually sealed the state off from Europe

Stretched Verb Constructions in English D. J. Instruments and Related Concepts at the Syntax-Semantics Interface Koen Van Hooste,2018-04-30 This series Dissertations in Language and Cognition explores issues of mental representation linguistic structure and representation and their interplay The research presented in this series is grounded in the idea explored in the Collaborative Research Center The structure of representations in language cognition and science SFB 991 that there is a universal format for the representation of linguistic and cognitive concepts

Subjects in English Peter Uhrig,2018-06-11 The purpose of the book is twofold First it tries to give a descriptive account of subjects in English The second aim is to elucidate the status of the subject both as a concept in grammatical theory and with regard to the question whether the subject is determined by item specific arbitrary formal restrictions in the same way as postverbal complements of the verb have been shown to be
