Substitute Parents:

Substitute Parents Gillian Bentley, Ruth Mace, 2012 From a comparative perspective human life histories are unique and raising offspring is unusually costly humans have relatively short birth intervals compared to other apes childhood is long mothers care simultaneously for many dependent children other apes raise one offspring at a time infant mortality is high in natural fertility mortality populations and human females have a long post reproductive lifespan These features conspire to make child raising very burdensome Mothers frequently defray these costs with paternal help not usual in other ape species although this contribution is not always enough Grandmothers elder siblings paid allocarers or society as a whole help to defray the costs of childcare both in our evolutionary past and now Studying offspring care in a various human societies and other mammalian species a wide range of specialists such as anthropologists psychologists animal behaviorists evolutionary ecologists economists and sociologists have contributed to this volume offering new insights into and a better understanding of one of the key areas of human society *Who's Fit to be a Parent?* Mukti Jain Campion, 2005-06-29 In recent years the notion of parenting and parenthood have increasingly come under examination from the media and professionals and in particular government and politicians More and more parents are being held to account by society for their failure to deliver the sort of citizens it wants But what are parents supposed to be doing Are there some people that are inherently unfit to be parents and does there exist a body of knowledge that defines fit parenting Who s fit to be a parent covers this highly topical and important subject in a stimulating and accessible way that cuts across numerous professional disciplines and opens up the boundaries between professional and personal expertise on parenting It is essential reading for any professional or student of social work and social policy those working in the voluntary services concerned with the family social policy makers and for anyone interested in understanding what it means to be a parent today *Assessment of Parenting* Dr Peter Reder, Clare Lucey, 2014-02-04 These are the sorts of questions that face mental health practitioners who are increasingly involved in complex child care cases which come before the courts They have been given little guidance to date on how these assessments should be made especially where a decision has to be taken as to whether a child has experienced significant harm In this much needed book senior clinicians consider the principles and practice of parenting assessments and how they guide courts decisions about children s welfare They describe a number of frameworks for assessment and discuss the factors which help predict the risk of future maltreatment or the likelihood of successful rehabilitation Throughout the book the emphasis is on the need to integrate the assessments of all relevant professionals in order to serve the best interests of the child while also addressing the parents potential to improve their caretaking skills Offering guidance in areas of crucial significance for child family and professional alike *Assessment of Parenting* will be widely welcomed *The Kenyan We Want* Priscilla Were, 1987 *Rebuilding Attachments with Traumatized Children* Richard Kagan, 2014-09-25 Learn to build the trust you need to help children in crisis *Rebuilding Attachments with*

The third edition of this work on family law comprising text cases and materials provides not only an explication of legal principle but also explores primarily from a feminist perspective some of the assumptions about and constructions of gender sexual orientation class and culture that underlie the law It examines the ideology of the family and in particular the role of the law in contributing to and reproducing that ideology Structured around the themes of equality welfare and family privacy the book aims to offer the benefits of a textbook while also giving students a wide ranging set of materials for classroom discussion As well as providing a firm grounding in family law the text sets the law in its social and historical context and encourages a critical approach by students to the subject It provides an ideal introduction to family law for undergraduates but will be equally helpful for postgraduate students of family law for whom it provides a challenging selection of materials set within a theoretical framework rich in ideas and arguments Review of the second edition Diduck and Kaganas examine legal developments to shed light on society principally by investigating the ways in which family law constructs and regulates family life and responsibilities Theirs is an important and ambitious book that aims ultimately at a feminist restatement of family law The book is written and referenced in such depth that it is a useful resource for legal as well as social science

researchers at all levels whether looking for theoretical inspiration or drawing up a literature review The range of diverse sources that Diduck and Kaganas draw on is impressive they seem to have included every bit of material that helps feminists make sense of family law There is a well pitched selection of further reading of such material at the end of each chapter What s more they undersell themselves by describing their book as Text Cases and Materials because they have woven by far the largest proportion of the cases and materials into the text Helen Reece Times Higher Education May 2007 Reviews of first edition A stimulating work which attempts to situate family law in its social historical and political context Its appeal should not be confined to family law students as its commitment to a critical and analytical approach offers insights and ideas with broader significance Mary Childs Child and Family Law Quarterly September 2002 The arguments are provocative the analysis is stimulating and the materials amassed strongly support the authors aim to question the axiomatic status of what is traditionally designated as the family Fiona E Raitt Infant and Child Development September 2002 It is not often that one can say of a textbook in Law that it makes interesting reading with quite the enthusiasm that can be expressed for this text This new publication offers something that few textbooks seem to offer a book you CAN open up virtually anywhere and find an interesting piece on almost any aspect of the broad family law spectrum Penny Booth The Law Teacher September 2002 All the major themes in feminist and constructionist perspectives in family law are presented together with a wealth of readings and extensive references As a teaching manual it is excellent a coherent feminist perspective across the entire range of family law Marty Slaughter Feminist Legal Studies July 2003

Family Perspectives in Child and Youth Services David H. L. Olson, 1988 This timely book demonstrates the value and relevance of family oriented programs in dealing with problems experienced by children and adolescents Experts provide salient guidelines and recommendations for involving the family in the diagnosis and treatment of problems In addition to providing current reviews of research this practical volume describes various skill building programs and therapeutic interventions that can be used in a variety of program and treatment settings Designed for helping professionals who work with children and youth *Family Perspectives in Child and Youth Services* will be most valuable for practitioners in social work psychology psychiatry and child development

Parenting Your Internationally Adopted Child Patty Cogen, 2008-06-30 A guide for adoptive parents from preparations for a child s arrival through the teen years

The Relationship Rights of Children James G. Dwyer, 2006-04-17 This book presents a sustained theoretical analysis of what rights children should possess in connection with state decision making about their personal relationships which the state does in numerous aspects of family law including paternity adoption custody and visitation termination of parental rights and grandparent visitation It examines the nature and normative foundation of adults rights in connection with relationships among themselves and then assesses the extent to which the moral principles underlying adults rights apply also to children It concludes that the law should ascribe to children rights equivalent though not identical to those which adults enjoy and this would require substantial changes in the way the legal system treats

children including a reformation of the rules for establishing legal parent child relationships at birth and of the rules for deciding whether to end a parent child relationship *The Maladapted Mind* Simon Baron-Cohen, 2013-04-15 Newly available in paperback this is the first book to bring together classic and contemporary readings illustrating the new subdiscipline evolutionary psychopathology Each chapter demonstrates how evolutionary arguments are being brought to bear on the study of a different psychiatric condition or pathological behaviour The Maladapted Mind is aimed primarily at primarily at advanced students and researchers in the fields of psychiatry abnormal psychology biological anthropology evolutionary biology and cognitive science
