

INFERENCE

Inference is a cognitive process whereby we derive conclusions, assumptions, predictions, and explanations based on our interpretations of observable data.

OVERVIEW

The process of inferring something serves us well because it helps us make guesses and estimates, predict outcomes, and come to well-founded assumptions that can inform our decision-making.

It enables us to make sense of the world around us based on a combination of observation and prior knowledge.

EXAMPLES

Sherlock Holmes draws conclusions from small observations in their surroundings. A speck of mud on a person's shoe, for example, could lead Holmes to infer the individual recently visited a specific location. There's room for error here, but Sherlock feels confident based on his prior experience and skillset.

The Inference That Makes Science:

The Inference that Makes Science Ernan McMullin, 1992 **The Customization of Science** S. Fuller, M. Stenmark, U. Zackariasson, 2014-07-23 This collection explores whether and how religious and secular worldviews and political ideologies held by scientists citizens decision makers and politicians influence science as practiced and understood today Contributors explore the social and scientific repercussions of customizing science to fit the needs and interests of various groups

Creation and the God of Abraham David B. Burrell, Carlo Cogliati, Janet M. Soskice, William R. Stoeger, 2010-09-02 Creatio ex nihilo is a foundational doctrine in the Abrahamic faiths It states that God created the world freely out of nothing from no pre existent matter space or time This teaching is central to classical accounts of divine action free will grace theodicy religious language intercessory prayer and questions of divine temporality and as such the foundation of a scriptural God but also the transcendent Creator of all that is This edited collection explores how we might now recover a place for this doctrine and with it a consistent defence of the God of Abraham in philosophical scientific and theological terms The contributions span the religious traditions of Judaism Christianity and Islam and cover a wide range of sources including historical philosophical scientific and theological As such the book develops these perspectives to reveal the relevance of this idea within the modern world Ernan McMullin and Critical Realism in the Science-Theology Dialogue Paul L. Allen, 2016-05-13

Scientists philosophers and theologians have wrestled repeatedly with the question of whether knowledge is similar or different in their various understandings of the world and God Although agreement is still elusive the epistemology of critical realism associated with Ian Barbour John Polkinghorne and Arthur Peacocke remains widely credible Relying on the lifetime work of philosopher Ernan McMullin this book expands our understanding of critical realism beyond a permanent stand off between the subjective and objective whether in science or theology Critical realism illuminates the subject and the objectively known simultaneously Responding to criticisms made against it this book defends critical realism in science and theology with a specific role to play in our understanding of God Scientific Evidence Peter Achinstein, 2005-06 Physicists think they have discovered the top quark Biologists believe in evolution But what precisely constitutes evidence for such claims and why Scientists often disagree with one another over whether or to what extent some evidence counts in favor of a theory because they are operating with different concepts of scientific evidence These concepts need to be critically explored Peter Achinstein has gathered some prominent philosophers and historians of science for critical and lively discussions of both general questions about the meaning of evidence and specific ones about evidence for particular scientific theories Contributors Peter Achinstein The Johns Hopkins University Steven Gimbel Gettysburg College Gary Hatfield University of Pennsylvania Frederick M Kronz University of Texas Austin Helen Longino University of Minnesota Deborah G Mayo Virginia Tech Amy L McLaughlin Florida Atlantic University John Norton University of Pittsburgh Lawrence M Principe The Johns Hopkins University Richard Richards University of Alabama Alex Rosenberg Duke University Sherrilyn Roush Rice University

Laura J Snyder St Johns University Kent Staley St Louis University Dead Reckoning Ph.D. Nordby,1999-12-20 Her Brentwood home became a hotbed for homicide But in the wake of intense public and media attention one salient and hard truth was often overlooked the murder of Nicole Brown Simpson while brutal and heinous in its form was just one of thousands of homicides committed during that same year Most escaped the scrutiny of public interest Many never made it to trial and still others were dismissed as natural deaths perfect crimes that remain forever unsolved How then do investigators solve a murder when the trail goes cold Like mariners navigating without landmarks under a starless night sky lacking a reliable witness or smoking gun they plot their course through the clues by applying their own style of Dead Reckoning reconstructing the crime by disciplined observation careful reasoning and experience Dead Reckoning The Art of Forensic Detection examines the applications of logic and science to decipher chaotic death scenes and difficult cases and to derive orderly explanations from their jumbled clues The 10 case studies in this book illustrate the powers of observation exercised in reading the signs identifying them as clues and reasoning from them to the best explanation For investigators as well as forensic pathologists coroners prosecutors and defense attorneys Dead Reckoning The Art of Forensic Detection stresses the importance of trusting your own observations even in the wake of contradictory evidence The Nature of Christian Doctrine Alister E. McGrath,2024-01-02 A groundbreaking account of the origins development and enduring significance of Christian doctrine explaining why it remains essential to the life of Christian communities Noting important parallels between the development of scientific theories and Christian doctrine Alister E McGrath examines the growing view of early Christianity as a theological laboratory We can think of doctrinal formulations as proposals submitted for testing across the Christian world rather than as static accounts of orthodoxy This approach fits the available evidence much better than theories of suppressed early orthodoxies and reinforces the importance of debate within the churches as a vital means of testing doctrinal formulations McGrath offers a robust critique of George Lindbeck s still influential Nature of Doctrine 1984 raising significant concerns about its reductionist approach He instead provides a more reliable account of the myriad functions of doctrine utilising Mary Midgley s concept of mapping as a means of coordinating the multiple aspects of complex phenomena McGrath s approach also employs Karl Popper s Three Worlds allowing the theoretical objective and subjective aspects of doctrine to be seen as essential and interconnected We see how Christian doctrine offers ontological disclosure about the nature of reality while at the same time providing a coordinating framework which ensures that its various aspects are seen as parts of a greater whole Doctrine provides a framework or standpoint that allows theological reality to be seen and experienced in a new manner it safeguards and articulates the core vision of reality that is essential for the proper functioning and future flourishing of Christian communities The Art of Abduction Igor Douven,2022-05-03 A novel defense of abduction one of the main forms of nondeductive reasoning With this book Igor Douven offers the first comprehensive defense of abduction a form of nondeductive reasoning Abductive reasoning which is guided by explanatory

considerations has been under normative pressure since the advent of Bayesian approaches to rationality Douven argues that although it deviates from Bayesian tenets abduction is nonetheless rational Drawing on scientific results in particular those from reasoning research and using computer simulations Douven addresses the main critiques of abduction He shows that versions of abduction can perform better than the currently popular Bayesian approaches and can even do the sort of heavy lifting that philosophers have hoped it would do Douven examines abduction in detail comparing it to other modes of inference explaining its historical roots discussing various definitions of abduction given in the philosophical literature and addressing the problem of underdetermination He looks at reasoning research that investigates how judgments of explanation quality affect people's beliefs and especially their changes of belief He considers the two main objections to abduction the dynamic Dutch book argument and the inaccuracy minimization argument and then gives abduction a positive grounding using agent based models to show the superiority of abduction in some contexts Finally he puts abduction to work in a well known underdetermination argument the argument for skepticism regarding the external world

The Faithful Creator Ron Highfield, 2015-09-03 As Paul says in Romans creation groans for redemption But can we trust God to make all things new In this scholarly yet accessible text Ron Highfield presents an overview of creation providence and the problem of evil addressing the question of human anxiety in the face of suffering Our faithful Creator promises a glorious future for all creation

Fundamentals of Research on Culture and Psychology Valery Chirkov, 2015-11-19 This unique text covers the core research methods and the philosophical assumptions that underlie various strategies designs and methodologies used when researching cultural issues It teaches readers why and for what purpose one conducts research on cultural issues so as to give them a better sense of the thinking that should happen before they go out and collect data More than a methods text it is about all the steps that go into doing cross cultural research It discusses how to select the most appropriate methods for data analysis and which approach to use and details quantitative qualitative and mixed methods for experimental lab studies and ethnographic field work
