The Inner Light Theory Of Consciousness:

The Inner Light Theory of Consciousness California Technical Publishing, Steven W. Smith, 2002-02 *Mysticism and the Inner Light in the Thought of Rufus Jones*, Quaker Helen Holt, 2021-11-01 Rufus Jones promotion of mysticism and his novel formulation of the Inner Light which saw God as an inherent part of human nature were sweepingly influential within liberal Quakerism in the early 20th century and have had long lasting effects on Quaker faith and practice In spite of the importance of his ideas however they have received little critical attention In *Mysticism and the Inner Light* Helen Holt provides a systematic analysis of Jones thought in historical context showing how he attempted to synthesize his own experience with aspects of the psychology of William James the idealism of Josiah Royce and liberal Christianity She finds that because Jones presented his ideas informally he is sometimes misinterpreted especially regarding his views on Christ and humanism The book draws on Jones extensive corpus and on unpublished archived letters **The Inner Light** Arnold Robert Whately, 1908

A Midsummer Night's Dream: Shakespeare's Syzygy of Meaning , **The Art of Ajanta and Sopoćani** Om Datt Upadhyaya, 1994-01-01 Pauranic Prana aesthetics a finer shade different from that of vitalistic aesthetics the earlier having breathing rhythm of Ksaya Vrddhi diminuation and augmentation other than the latter s emphasis only on the rhythm of augmentation has been delineated in this study with examples from the world s two of the best art monuments Ajanta India now not remaining unknown even to the most casual connoisseur and Sopocani Yugoslavia the most significant and monumentally beautiful work of Byzantine art Tracing Prana aesthetics as the aesthetics of inner light coded in the creeper motif by the artists of Ajanta this work emphasises decoding of the creeper motif by Byzantine artists culminating into the frescoes of Sopocani done in Hellenistic Byzantine aesthetics beatified by Hesycast meditation to which that of Buddhists was not unknown Comparisons of various determinant aspects aesthetics and artistic denominators and constraints not allowing similar consummation are properly investigated to substantiate the thesis that Prana aesthetics transfigures at Ajanta but transubstantiates at Sopocani The significance of the anabolic aspects of this aesthetics is highlighted especially as a way out from the reductivistic tendencies of the present day visual arts straining them upto the stage of catabolic dissolution **Working with Inner Light** William G. Gray, 2011 1965 1967 As the New Age seemed to explode into being everything spiritual had to be Eastern Psychedelic artwork showed Glastonbury Tor overshadowed by the Maharishi Mahesh Yogi or Stonehenge sending its energies up to Lord Krishna imagery which William G Gray summed up quite simply as Balls He was working hard to make sure that our weakened or slumbering Western Traditions would survive Among his endeavours at the time was this guide to the inner and outer practicalities of ritual magic which includes instruction on god forms words of power magic circles initiation extension of consciousness and raising power through ritual Previously unpublished *Working with Inner Light* is the first new book by William G Gray since the author s death in 1992 Written in the form of a journal or magical diary it includes his original sketches and forms a detailed course in modern Qabalistic magic

which will be of immense value to esoteric students and practitioners working within the Western Mysteries today

Conscious Experience Thomas Metzinger, 1995 The contributions to this book are original articles representing a cross section of current philosophical work on consciousness and thereby allowing students and readers from other disciplines to acquaint themselves with the very latest debate so that they can then pursue their own research interests more effectively The volume includes a bibliography on consciousness in philosophy cognitive science and brain research covering the last 25 years and consisting of over 1000 entries in 18 thematic sections compiled by David Chalmers and Thomas Metzinger

Pluralism and the Mind Matthew Colborn, 2011-11-03 Paul Feyerabend noted that the world which we want to explore is a largely unknown entity We must therefore keep our options open and not restrict ourselves in advance 1975 p 20 Given that consciousness is poorly understood and vaguely defined such advice seems sound but is frequently ignored in favour of an insistence that a scientific theory of consciousness must be reducible to current monist physics and biology This book argues that such an insistence is historically unsupportable theoretically incoherent and unnecessary The author instead makes the case for emergent property pluralism New concepts of emergent mental properties are needed in part because of the failure of mainstream approaches like computationalism or dynamical systems satisfactorily to address issues like subjective volition autonomy and creativity The author sees personal consciousness as active and classifiable as a subset of the wider problem of biological causation Biological causation is my term for issues like downwards causation final causes purposive behaviour and autonomy that are poorly handled by conventional evolutionary computational or dynamical systems models See Rosen 1991 Ho 2008 Rosen's approach is especially useful from a pluralistic perspective because of his insistence that no one mode of causal entailment suffices to understand anything Rosen 1991 p 13 The book is split into three sections Part one builds an historical case for pluralism Part two deconstructs insistent monism and mainstream models before addressing biological causation Part three explores the consequences of such an alternative approach by examining specific phenomena like free will the self and evolutionary emergence
