The International Reunion:

Hong Kong's Reunion with China: The Global Dimensions Gerard A. Postiglione, James Tuck-Hong Tang, 2016-07-01 The issues surrounding Hong Kong's global position and international links grow increasingly complex by the day as the process of Hong Kong's transformation from a British colony to a Chinese Special Administration Region unfolds. This volume addresses a number of questions relating to this process: How international is Hong Kong? What are its global and international dimensions? How important are these dimensions to its continued success? How will these dimensions change especially beyond the sphere of economics? Is Hong Kong's internationalization defined in terms of its willingness to embrace international values and its capacity to maintain its international presence at risk? These questions are presented as they pertain to the changing situation: relations between mainland China, Taiwan and Hong Kong; the positions of Australia, Canada and the United States on Hong Kong; internalization of international legal values; Americanization vs. Asianization; linkages to the world through Guangdong; strategies to emigrate overseas; cultural internationalization; media internationalization; and universities within the global economy. *Hong Kong's Reunion with China*, 1997-01-01 As Hong Kong transforms from a colonial dependent territory to a Chinese special administrative region, its international status will be increasingly connected to China's position in the world; the nature of Hong Kong's global linkages are shifting as the po

International Adoption Laura Briggs, 2009-07-01 In the past two decades, transnational adoption has exploded in scope and significance, growing up along increasingly globalized economic relations and the development and improvement of reproductive technologies. A complex and understudied system, transnational adoption opens a window onto the relations between nations, the inequalities of the rich and the poor, and the history of race and racialization. Transnational adoption has been marked by the geographies of unequal power as children move from poorer countries and families to wealthier ones; yet little work has been done to synthesize its complex and sometimes contradictory effects. Rather than focusing only on the United States as much previous work on the topic does, *International Adoption* considers the perspectives of a number of sending countries as well as other receiving countries, particularly in Europe. The book also reminds us that the U.S. also sends children into international adoptions, particularly children of color. The book thus complicates the standard scholarly treatment of the subject, which tends to focus on the tensions between those who argue that transnational adoption is an outgrowth of American wealth, power, and military might, as well as a rejection of adoption from domestic foster care, and those who maintain that it is about a desire to help children in need. *The International Aluminium Cartel* Marco Bertilorenzi, 2015-09-16 Aluminium was one of the most cartelised industries in the international economic panorama of the 20th century. Born following the discovery of the electrolytic smelting process in 1886, this industry even in its infancy established a cartel which characterised its history until nearly 1980. Managers of the aluminium industry from various historical eras and countries shared the same vision about the development of their industry: to keep prices as stable as possible in order to encourage expansions and to provide return on

investments Price instability which characterised the trade of other commodities was unknown to the aluminium industry This book neither argues that cartels are fundamentally evil nor attempts to demonstrate that cartels are optimal business organisations It instead provides an in depth and frank analysis of the internal working of industrial organisations and of the interplay between cartels and political powers and institutions The International Aluminium Cartel offers explanations for the construction and collapse of cartels descriptions of their operations and an historical interpretation of their experiences Incorporating information gleaned from a unique collection of private and public archives from several countries this unique study will appeal to a wide variety of readers including academics interested in industrial and business history
