Sir John Soane and the Country Estate Ptolemy Dean, 2019-07-05 First published in 1999 this volume examines Sir John Soane 1753 1837 who was one of Britain's most inventive architects His achievements include the Bank of England and the world's first picture gallery at Dulwich buildings of international importance His country estate work inspired by classical antiquity ranges in scale from the remodelling of existing country houses such as Wimpole Hall in Cambridgeshire and Aynhoe Park in Northamptonshire to simple outbuildings Here we see the emergence of the key themes of his style and the results of his precise attention to proportion design detail and light and shade These are among Soane's finest works Making full use of the Soane Museum and country house archives Ptolemy Dean here examines ten country house projects reconstructing the creative transactions between client and architect architect and skilled craftsman It is impossible to understand Soane's intentions without the drawings sketches and letters which enable us to trace the process of design With the author's own drawings in watercolour to illustrate Soane's use of light and space and beautiful photographs by Martin Charles Sir John Soane and the Country Estate offers an enthralling insight into the work of a great architect An illustrated inventory the first fully researched guide to Soane's country house practice details an architectural legacy that has rarely been matched

Glorious Visions Helene Furján, 2011-05-05 Focusing on the house and museum and its considerable collections of architectural fragments models drawings folios and publications this book is about thirteen Lincoln's Inn Fields in London England built in the early 1800s by

the renowned eighteenth century architect Sir John Soane The book maps the influences references connections extensions and productions at play in Soane s house museum The house still a public museum was highly original in its period and it continues to influence and impress architects and historians alike Today s visitor is confronted by a dense complex series of spaces a strange accumulation of rooms objects and effects This book examines the ways in which Soane enlisted light shadow color fiction and narrative vistas spatial complexity the fragment and the mirror to produce a spectacular space

Encyclopedia of Interior Design Joanna Banham,1997-05 First published in 1997 Routledge is an imprint of Taylor Francis an informa company The Environmental Imagination Dean Hawkes,2019-11-07 The Environmental Imagination explores the relationship between tectonics and poetics in environmental design in architecture Working thematically and chronologically from the eighteenth century to the present day this book redefines the historiography of environmental design by looking beyond conventional histories to argue that the environments within buildings are a collaboration between poetic intentions and technical means In a sequence of essays the book traces a line through works by leading architects of the nineteenth and twentieth centuries that illustrate the impact of new technologies on the conception and realisation of environments in buildings In this a consideration of the qualitative dimension of environment is added to the primarily technological narratives of other accounts In this second edition the book has been substantially rewritten and restructured to include further research conducted in the decade since the first edition A number of important buildings have been revisited in order to extend the descriptions of their environments and studies have been made of a number of newly studied significant buildings A completely new essay offers an environmental interpretation of Luis Barrag n s magical own house in Mexico City and the earlier studies of buildings by Peter Zumthor have been gathered into a single extended essay that includes a body of new research On the fiftieth anniversary of the publication of Reyner Banham s The Architecture of the Well tempered Environment the book concludes with a critical tribute to that seminal text The Environmental Imagination will appeal to academics and practitioners with interests in the history theory and technology of architecture The Emergence of the Professional Watercolourist Greg Smith,2018-01-12 This title was first published in 2002 Draw ing on extensive primary research Greg Smith describes the shifting cultural identities of the English watercolour and the English watercolourist at the end of the eighteenth and the beginning of the nineteenth century His convincing narrative of the conflicts and alliances that marked the history of the medium and its practitioners during this period includes careful detail about the broader artistic context within which watercolours were produced acquired and discussed Smith calls into question many of the received assumptions about the history of watercolour painting His account exposes the unsatisfactory nature of the traditional narrative of watercolour painting s development into a high art form which has tended to offer a celebratory focus on the innovations and genius of individual practitioners such as Turner and Girtin rather than detailing the anxieties and aspirations that characterized the ambivalent status of the watercolourist The Emergence of the Professional

Watercolourist is published with the assistance of the Paul Mellon Foundation Shakespeare and Authority Katie Halsey, Angus Vine, 2018-01-19 This book examines conceptions of authority for and in Shakespeare and the construction of Shakespeare as literary and cultural authority The first section Defining and Redefining Authority begins by re defining the concept of Shakespeare s sources suggesting that authorities and resources are more appropriate terms Building on this conceptual framework the remainder of this section explores linguistic and discursive authority more broadly The second section Shakespearean Authority considers the construction performance and questioning of authority in Shakespeare s plays Essays here range from examinations of monarchical authority to discussions of household authority literary authority and linguistic ownership The final part Shakespeare as Authority then traces the increasing establishment of Shakespeare as an authority from the eighteenth to the twenty first century in a series of essays that explore Shakespearean authority for editors actors critics authors readers and audiences The volume concludes with two essays that reassess Shakespeare as an authority for visual culture in the cinema and in contemporary art **Sir John Soane? Influence on Architecture from 1791** Oliver Bradbury, 2017-07-05 Sir John Soane s Influence on Architecture from 1791 A Continuing Legacy is the first in depth study of this eighteenth century British architect s impact on the work of others extending globally and still indeed the case over 200 years later Author Oliver Bradbury presents a compelling argument that the influence of Soane 1753 1837 has persevered through the centuries rather than waning around the time of his death Through examinations of internationally renowned architects from Benjamin Henry Latrobe to Philip Johnson as well as a number of not so well known Soanean disciples Bradbury posits that Soane is perhaps second only to Palladio in terms of the longevity of his influence on architecture through the course of more than two centuries from the early 1790s to today concluding with the recent return to pure revivalism Previous investigations have been limited to focusing on Soane s late Georgian and then post modern influence this is the first in depth study of his impact over the course of two centuries Through this survey Bradbury demonstrates that Soane s influence has been truly international in the pre modern era reaching throughout the British Isles and beyond to North America and even colonial Australia Through his inclusion of select detailed case studies Bradbury contends that Soane s is a continuing not negated legacy in architecture **The Routledge Companion to Architectural Drawings and Models** Federica Goffi, 2022-05-30 Architectural drawings and models are instruments of imagination communication and historical continuity The role of drawings and models and their ownership placement and authorship in a ubiquitous digital age deserve careful consideration Expanding on the well established discussion of the translation from drawings to buildings this book fills a lacuna in current scholarship questioning the significance of the lives of drawings and models after construction Including emerging well known and world renowned scholars in the fields of architectural history and theory and curatorial practices the thirty five contributions define recent research in four key areas drawing sites sites of knowledge construction drawing office construction site the afterlife of drawings and models archiving collecting displaying

and exhibiting tools of making architectural representations and their apparatus over time and the ethical responsibilities of collecting and archiving authorship ownership copyrights and rights to copy The research covers a wide range of geographies and delves into the practices of such architects as Sir John Soane Eugène Emmanuel Viollet le Duc Frank Lloyd Wright Ken Yeang Norman Foster and Renzo Piano *The Transatlantic Design Network* Danielle S. Willkens, 2024-09-16 Tracing the mutual influence of great architects of the eighteenth century on both sides of the Atlantic Although a good deal has been written about the voluminous intellectual exchange between Europe and the Americas in the eighteenth century across various humane disciplines no study to date has focused on architectural culture despite the fact that numerous Europeans made their way across the Atlantic to design some of America's most important buildings In this groundbreaking work Danielle Willkens authoritatively fills that gap defining and expounding the transatlantic design network of mainly British and American individuals that included Thomas Jefferson the architect John Soane and Maria Cosway an acclaimed painter musician composer and educator who maintained a lifelong correspondence with both Jefferson and Soane Willkens places Jefferson's and Soane's famous homes in a historical and aesthetic context that extends beyond their respective renown as national shrines She shows how contrary to their reputations neither represents the product of a singular architectural vision The contributions of other architects designers philosophers and friends have been effectively effaced from both Monticello and the Soane House Willkens here corrects the record mapping the influence of this crucial hidden network on architecture and aesthetics on both sides of the Atlantic

The Picturesque John Macarthur, 2013-03-07 In this fresh and authoritative account John Macarthur presents the eighteenth century idea of the picturesque when it was a risky term concerned with a refined taste for everyday things such as the hovels of the labouring poor in the light of its reception and effects in modern culture In a series of linked essays Macarthur shows what the concept of picture does in the picturesque and how this relates to modern theories of the image how the distaste that might be felt today at the sentimentality of the picturesque was already at play in the eighteenth century how visual values such as irregularity become the basis of modern architectural planning how the concept of appropriating a view moves from landscape design into urban design why movement is fundamental to picturing the stillness of buildings cities and landscapes Drawing on examples from architecture art and broader culture John Macarthur's account of this key topic in cultural history makes engaging reading for all those studying architecture art history cultural history or visual studies

The Idea of the Cottage in English Architecture, 1760 - 1860 Daniel Maudlin, 2015-07-24 The Idea of the Cottage in English Architecture is a history of the late Georgian phenomenon of the architect designed cottage and the architectural discourse that articulated it It is a study of small buildings built on country estates and not so small buildings built in picturesque rural settings resort towns and suburban developments At the heart of the English idea of the cottage is the Classical notion of retreat from the city to the countryside This idea was adopted and adapted by the Augustan infused

culture of eighteenth century England where it gained popularity with writers artists architects and their wealthy patrons who from the later eighteenth century commissioned retreats gate lodges estate workers housing and seaside villas designed to appear as cottages The enthusiasm for cottages within polite society did not last By the mid nineteenth century cottage related building and book publishing had slowed and the idea of the cottage itself was eventually lost beneath the Tudor barge boards and decorative chimneystacks of the Historic Revival And yet while both designer and consumer have changed over time the idea of the cottage as the ideal rural retreat continues to resonate through English architecture and English culture

The Ruins of the Most Beautiful Monuments of Greece David Le Roy, 2004 The striking engravings of Julien David Le Roy's *The Ruins of the Most Beautiful Monuments of Greece* 1758 first revealed the architectural wonders of ancient Athens to the West Part architectural theory part archaeological report part travelogue the greatly expanded edition of 1770 here translated into English is entirely original in its understanding of the spirit of classical Greek architecture and in its influence on the direction of contemporary architectural creation Book jacket

Architectural Drawings Dr. Frances Sands, 2021-08-05 A visual large format compilation of some of the finest architectural drawings from Sir John Soane's extensive collection *Architectural Drawings* casts light on the magnificent architectural drawings of neo classical architect teacher and collector Sir John Soane that are otherwise concealed in archives This book featuring artworks handpicked from what was probably the first comprehensive collection of architectural drawings in the world numbering 30 000 at the time of his death in 1837 celebrates a life spent procuring curiosities The collection encompasses the hands of Montano Thorpe Wren Talman Hawksmoor Vanbrugh Gibbs Kent Chambers Adam Cl risseau P cheux Wyatt Playfair Nash and of course Soane himself The quality of Soane's collection of drawings is scarcely paralleled elsewhere and on account of their fragility these items are infrequently seen by the public This innovative book draws together the most exquisite and important works from the collection for the first time showing the extraordinary connoisseurship of Sir John Soane while also exploring what drove Soane to amass such a collection and the provenance of his various significant acquisitions This book illustrates the story of Soane as a collector of architectural drawings but a story which is not normally available to the public and will provide a sumptuous opportunity to peruse some of the finest architectural drawings in existence

Framing Formalism Richard Woodfield, 2013-10-23 Alois Riegl 1858 1905 was one of the founding fathers of modern formalist criticism As a member of the Vienna School of Art Historians he shared their range of interests in the decorative arts art in transition conservation and monuments This collection of critical essays examines various facets of Riegl's work and opens with a new translation of Hans Sedlmayr's famous and notorious *Die Quintessenz der Lehren Riegls* Included is Julius von Schlosser's assessment of Riegl's contribution to the Vienna School of Art Historians as well as essays by a team of international scholars This book offers a re engagement with the ideas of one of the most important and neglected art historians of the 20th century

[The Architecture of Ruins](#) Jonathan Hill, 2019-03-25 *The Architecture of Ruins* Designs on the Past Present and Future identifies

an alternative and significant history of architecture from the sixteenth century to the twenty first century in which a building is designed occupied and imagined as a ruin This design practice conceives a monument and a ruin as creative interdependent and simultaneous themes within a single building dialectic addressing temporal and environmental questions in poetic psychological and practical terms and stimulating questions of personal and national identity nature and culture weather and climate permanence and impermanence and life and death Conceiving a building as a dialogue between a monument and a ruin intensifies the already blurred relations between the unfinished and the ruined and envisages the past the present and the future in a single architecture Structured around a collection of biographies this book conceives a monument and a ruin as metaphors for a life and means to negotiate between a self and a society Emphasising the interconnections between designers and the particular ways in which later architects learned from earlier ones the chapters investigate an evolving interdisciplinary design practice to show the relevance of historical understanding to design Like a history a design is a reinterpretation of the past that is meaningful to the present Equally a design is equivalent to a fiction convincing users to suspend disbelief We expect a history or a novel to be written in words but they can also be delineated in drawing cast in concrete or seeded in soil The architect is a physical novelist as well as a physical historian Like building sites ruins are full of potential In revealing not only what is lost but also what is incomplete a ruin suggests the future as well as the past As a stimulus to the imagination a ruin s incomplete and broken forms expand architecture s allegorical and metaphorical capacity indicating that a building can remain unfinished literally and in the imagination focusing attention on the creativity of users as well as architects Emphasising the symbiotic relations between nature and culture a building designed occupied and imagined as a ruin acknowledges the coproduction of multiple authors whether human non human or atmospheric and is an appropriate model for architecture in an era of increasing climate change

Morality and Architecture Revisited David Watkin,2001-08 When *Morality and Architecture* was first published in 1977 it received passionate praise and equally passionate criticism An editorial in *Apollo* entitled *The Time Bomb* claimed that it deserved to become a set book in art school and University art history departments and the *Times Literary Supplement* savaged it as an example of that kind of vindictiveness of which only Christians seem capable Here for the first time is the story of the book s impact In writing his groundbreaking polemic David Watkin had taken on the entire modernist establishment tracing it back to Pugin Viollet le Duc Corbusier and others who claimed that their chosen style had to be truthful and rational reflecting society s needs Any critic of this style was considered antisocial and immoral Only covertly did the giants of the architectural establishment support the author Watkin gives an overview of what has happened since the book s publication arguing that many of the old fallacies still persist This return to the attack is a revelation for anyone concerned architecture s past and future *Morality and Architecture Revisited* contains the entire text of the book *Morality and Architecture* plus additional material by David Wakin on the controversy that the the book created

Weather Architecture Jonathan Hill,2013-06-17

Weather Architecture further extends Jonathan Hill's investigation of authorship by recognising the creativity of the weather. At a time when environmental awareness is of growing relevance, the overriding aim is to understand a history of architecture as a history of weather and thus to consider the weather as an architectural author that affects design, construction and use in a creative dialogue with other authors such as the architect and user. Environmental discussions in architecture tend to focus on the practical or the poetic but here they are considered together. Rather than investigate architecture's relations to the weather in isolation, they are integrated into a wider discussion of cultural and social influences on architecture. The analysis of weather's effects on the design and experience of specific buildings and gardens is interwoven with a historical survey of changing attitudes to the weather in the arts, sciences and society, leading to a critical re-evaluation of contemporary responses to climate change.
