in the field cover a wide range of literary genres and social and cultural contexts across the region. The texts and practices are contextualized in relation to the broader social and political background in which they emerged, showing how religious affiliations, caste dynamics and political concerns played a role in shaping social identities as well as aesthetic sensibilities. By doing so, this book sheds light into theoretical issues of more general significance such as textual versus oral norms, the features of oral performance and improvisation, the role of the text in performance, the aesthetics and social dimension of performance, the significance of space in performance history and important considerations on repertoires of story telling. The book also contains links to audio files of some of the works discussed in the text. *Tellings and Texts* is essential reading for anyone with an interest in South Asian culture and more generally in the theory and practice of oral literature performance and story telling.

Semiosis in Hindustani Music José Luiz Martinez, 2001-01-01. For thousands of years music in India has been considered a signifying art. Indian music creates and represents meanings of all kinds, some of which extend outwardly to the cosmos while others arise inwardly in the refined feelings which a musical connoisseur experiences when listening to it. In this book the author explores signification in Hindustani classical music along a two-fold path. Martinez first constructs a theory of musical semiotics based on the sign theories of Charles Sanders Peirce. He then applies his theory to the analysis of various types of Hindustani music and how they generate significations. The author engages such fundamental issues as sound quality, raga, tala and form while advancing his unique interpretations of well-known semiotic phenomena like iconicity, metalanguage, indexicality, symbolism. Martinez's study also provides deep insight into semiotic issues of musical perception, performance, scholarship and composition. A specially innovative and extensive section of the book analyzes representations in Hindustani music in terms of the Indian aesthetic theory of *rasa*. The evolution of the *rasa* system as applied to musical structures is traced historically and analyzed semiotically. In the light of Martinez's theories, Hindustani music reveals itself to be both a delightfully sensuous and highly sophisticated system of acoustic representations.

The Scattered Court Richard David Williams, 2025-10-08. Presents a new history of how Hindustani court music responded to the political transitions of the nineteenth century. How far did colonialism transform north Indian music? In the period between the Mughal empire and the British Raj, how did the political landscape bleed into aesthetics, music, dance and poetry? Examining musical culture through a diverse and multilingual archive, primarily using sources in Urdu, Bengali and Hindi that have not been translated or critically examined before, *The Scattered Court* challenges our assumptions about the period. Richard David Williams presents a long history of interactions between northern India and Bengal, with a core focus on the two courts of Wajid Ali Shah (1822-1887), the last ruler of the kingdom of Awadh. He charts the movement of musicians and dancers between the two courts in Lucknow and Matiyaburj, as well as the transregional circulation of intellectual traditions and musical genres, and demonstrates the importance of the exile period for the rise of Calcutta as a celebrated center of Hindustani classical music. Since Lucknow is associated with late Mughal or Nawabi society and Calcutta with colonial modernity, examining the

relationship between the two cities sheds light on forms of continuity and transition over the nineteenth century as artists and their patrons navigated political ruptures and social transformations The Scattered Court challenges the existing historiography of Hindustani music and Indian culture under colonialism by arguing that our focus on Anglophone sources and modernizing impulses has directed us away from the aesthetic subtleties historical continuities and emotional dimensions of nineteenth century music
