Critique and Disclosure Nikolas Kompridis, 2011-08-19 A provocatively argued call for shifting the emphasis of critical theory from Habermasian critique restricted to normative clarification to disclosure a possibility enhancing approach that draws on and reinterprets ideas of Heidegger In *Critique and Disclosure* Nikolas Kompridis argues provocatively for a richer and more time responsive critical theory He calls for a shift in the normative and critical emphasis of critical theory from the narrow concern with rules and procedures of Jürgen Habermas's model to a change enabling disclosure of possibility and the enlargement of meaning Kompridis contrasts two visions of critical theory's role and purpose in the world one that restricts itself to the normative clarification of the procedures by which moral and political questions should be settled and an alternative rendering that conceives of itself as a possibility disclosing practice At the center of this resituation of critical theory is a normatively reformulated interpretation of Martin Heidegger's idea of disclosure or world disclosure In this regard Kompridis reconnects critical theory to its normative and conceptual sources in the German philosophical tradition and sets it within a romantic tradition of philosophical critique Drawing not only on his sustained critical engagement with the thought of Habermas and Heidegger but also on the work of other philosophers including Wittgenstein Cavell Gadamer and Benjamin Kompridis argues that critical theory must in light of modernity's time consciousness understand itself as fully situated in its time in an ever shifting and open ended horizon of possibilities to which it must respond by disclosing alternative ways of thinking and acting His innovative and original argument will serve to move the debate over the future of critical studies forward beyond simple antinomies to a consideration of as he puts it what critical theory should be if it is to have a future worthy of its past

American Anatomies Robyn Wiegman,1995 In this brilliantly combative study Robyn Wiegman challenges contemporary clich s about race and gender a formulation that is itself a clich in need of questioning As part of what she calls her feminist disloyalty she turns a

critical even skeptical eye on current debates about multiculturalism and difference while simultaneously exposing the many ways in which white racial supremacy has been reconfigured since the institutional demise of segregation. Most of all she examines the hypocrisy and contradictoriness of over a century of narratives that posit Anglo Americans as heroic agents of racism's decline. Whether assessing Uncle Tom's Cabin, lynching, Leslie Fiedler's racist mapping of the American novel, the Black Power movement of the 60s/80s, buddy films or the novels of Richard Wright and Toni Morrison, Wiegman unflinchingly confronts the paradoxes of both racism and antiracist agendas including those advanced from a feminist perspective. *American Anatomies* takes the long view. What epistemological frameworks allowed the West from the Renaissance forward to schematize racial and gender differences and to create social hierarchies based on these differences? How have those epistemological regimes changed and not changed over time? Where are we now? With painstaking care, political passion and intellectual daring, Wiegman analyzes the biological and cultural bases of racial and gender bias in order to reinvigorate the discussion of identity politics. She concludes that for very different reasons, identity proves to be dangerous to minority and majority alike.

Post-Traditional Public Administration Theory David John Farmer, 2021-03-23. This book describes what is argued to be the most effective way of doing public administration thinking. Its aim is to encourage governments to govern fundamentally better in terms of policy and administration. A better understanding of context and identities, imagination, epistemic pluralism, anti-administration and the context of economics are examples of what is critical for high effectiveness. The pieces included in this book have been handpicked from the vast academic collection that David Farmer has authored over the last thirty years and which were published in the *Journal of Administrative Theory and Praxis* and the *Journal of Public Administration Education*. Collectively, these chapters are intended to help governments use post-traditional public administration theory in order to achieve better praxis.

The Philosophy and Politics of Aesthetic Experience Nathan Ross, 2017-04-07. This book develops a philosophy of aesthetic experience through two socially significant philosophical movements: early German Romanticism and early critical theory. In examining the relationship between these two closely intertwined movements, we see that aesthetic experience is not merely a passive response to art; it is the capacity to cultivate true personal autonomy and to critique the social and political context of our lives. Art is political for these thinkers not only when it paints a picture of society but even more when it makes us aware of our deeply ingrained forms of experience in a transformative way. Ultimately, the book argues that we have to think of art as a form of truth that is not reducible to communicative rationality or scientific knowledge and from which philosophy and politics can learn valuable lessons.
