Subversive Institutions The Design And Destruction Of Socialism And The State:

Subversive Institutions Valerie Bunce, 1999-01-28 From 1989 to 1992 all of the socialist dictatorships in Europe including the Soviet Union collapsed as did the Soviet bloc Yugoslavia the Soviet Union and Czechoslovakia dismembered and the Cold War international order came to an abrupt end Based on a series of controlled comparisons among regimes and states Valerie Bunce argues in this book that two factors account for these remarkable developments the institutional design of socialism as a regime a state and a bloc and the rapid expansion during the 1980s of opportunities for domestic and international change When combined institutions and opportunities explain not just when how and why these regimes and states disintegrated but also some of the most puzzling features of these developments why for example the collapse of socialism was largely peaceful and why Yugoslavia but not the Soviet Union or Czechoslovakia disintegrated through war

The State After Communism Timothy J. Colton, Stephen Holmes, 2006 The Soviet dictatorship was a strong state committed to dominating and transforming society in the name of a utopian ideology When the communist regime crumbled and the post Soviet countries committed to democracy most observers took for granted that their state structures would be effective agents of the popular will Russia s experience demonstrates that this assumption was overly optimistic This book based on a major collaborative research project with American and Russian scholars shows that state capacity strength and coherence were highly problematic after communism which had major consequences for particular functions of government and for the entire process of regime change Eleven respected contributors examine governance in post Soviet Russia in comparative context investigating the roots characteristics and consequences of the crisis as a whole and its manifestations in the specific realms of tax collection statistics federalism social policy regulation of the banks currency exchange energy policy and parliamentary oversight of the bureaucracy

The Cartographic State Jordan Branch, 2014 This book describes the emergence of the territorial state and examines the role that cartography has played in shaping its linear boundaries

21st Century Political Science: A Reference Handbook John T Ishiyama, Marijke Breuning, 2011 Offering full coverage of major subthemes and subfields within political science this reference handbook includes entries on topics from theory and methodology to international relations and institutions

The State as Investment Market Johan Engvall, 2016-09-07 Based on a detailed examination of Kyrgyzstan Johan Engvall goes well beyond the case of this single country to elaborate a broad theory of economic corruption in developing post Soviet states regionally as a rational form of investment market for political elites He reveals how would be officials invest in offices to obtain access to income streams associated with those offices Drawing on extensive fieldwork over an eight year period Engvall details how these systems work and the major implications this holds for political and economic development in the region Often identified and criticized simply as obstacles to development by scholars Engvall instead argues that these systems must be reinterpreted in the context of a standardized and entrenched method of organizing the state He also shows how private actors have been

unsuccessful in buying preferential treatment directly from the state. Instead, public officials have become the predominant conduit to influencing policy process and monitoring the sale of protection property rights and other privatized public goods.

Power Politics and State Formation in the Twentieth Century Bridget Coggins, 2014-04-24 From Kurdistan to Somaliland, Xinjiang to South Yemen, all secessionist movements hope to secure newly independent states of their own. Most will not prevail. The existing scholarly wisdom provides one explanation for success based on authority and control within the nascent states. With the aid of an expansive new dataset and detailed case studies, this book provides an alternative account. It argues that the strongest members of the international community have a decisive influence over whether today's secessionists become countries tomorrow and that most often their support is conditioned on parochial political considerations.

State-Led Privatization in China Jin Zeng, 2013-10-01 Large scale privatization did not emerge spontaneously in China in the late 1990s. Rather, the Chinese state led and carefully planned ownership transformation with timetables and measurable privatization quotas, not for the purpose of extracting the state from the economy but in order to strengthen the rule of the Party. While it is widely believed that authoritarian regimes are better suited than democracies to carry out economic reform, this book provides a more nuanced understanding of reform in China, demonstrating that the Chinese state's capacity to impose unpopular reform is contingent on its control over local state agents and its adaptability to societal demands. Building on rich fieldwork data gathered in three Chinese cities: Shenyang, Shanghai, and Xiamen, this book offers the first comparative study of China's privatization processes at the local level. Instead of focusing solely on political elites, Jin Zeng adopts a multi-level interaction approach to examine how the complex interplay of the central leadership, grassroots officials, and state-owned enterprise managers and workers shaped the contour of privatization in China. The book advances three central arguments: First, local economic structure and cadre evaluation system mediated local officials' incentives to initiate privatization. Second, local officials relied on mobilization campaigns and various appeasement measures to implement privatization. Finally, the dynamics of privatization were fundamentally driven by the central government's reactions to social opposition and by the subsequent responses of local officials to the changed political regulatory environment. As a detailed analysis of the dual transformation of the property regime and state-society relations in China, this book will be invaluable to students and scholars of Chinese politics, economic reform, as well as those interested in comparative political economy and economic development more broadly.

Ben Ali's Tunisia Anne Wolf, 2023 Based on a wealth of new primary data, this book offers the first account of the internal regime factors that caused the fall of Zine el Abidine Ben Ali's long dictatorship in Tunisia during the Arab Uprisings. It challenges studies that focus on mass mobilization alone and examines the role of a secret coup d'état staged by regime figures in 2011.

Social Protest and Contentious Authoritarianism in China Xi Chen, 2012 Xi Chen explores the dramatic rise in and routinization of social protests in China since the early 1990s.

Between State and Nation M. Waterbury, 2010-11-14 Based on a qualitative study of Hungary and

its changing relationship to the 3 million ethnic Hungarians in neighbouring states this book argues that it is not the ties of ethnicity but the political interests of kin state elites that drives states in Eastern Europe to take action on behalf of ethnic kin in neighboring states
