International Handbook of Violence Research Wilhelm Heitmeyer, John Hagan, 2005-08-12 An international manual is like a world cruise a once in a lifetime experience All the more reason to consider carefully whether it is necessary This can hardly be the case if previous research in the selected field has already been the subject of an earlier review or even several competing surveys On the other hand more thorough study is necessary if the intensity and scope of research are increasing without comprehensive assessments That was the situation in Western societies when work began on this project in the summer of 1998 It was then too that the challenges emerged any manual especially an international one is a very special type of text which is anything but routine It calls for a special effort the state of the art has to be documented for selected subject areas and its presentation made as compelling as possible The editors were delighted therefore by the cooperation and commitment shown by the eighty one contributors from ten countries who were recruited to write on the sixty two different topics by the constructive way in which any requests for changes were dealt with and by the patient response to our many queries This volume is the result of a long process It began with the first drafts outlining the structure of the work which were submitted to various distinguished colleagues Friedheim Neidhardt of Berlin Gertrud Nunner Winkler of Munich and Roland Eckert of Trier to name only a few supplied valuable comments at this stage

Nation, Ethnicity and the Conflict

in Afghanistan Raghav Sharma, 2016-07-15 Ethnic and tribal loyalties in Afghanistan provided the lethal cocktail for the violent conflict that engulfed the country following the collapse of the Soviet backed government in 1992. The ensuing fighting between mujahideen groups paved the way for the tectonic social and political shifts which continue to shape events today. What accounts for the emergence of ethnicity as the main cause of conflict in Afghanistan? What moved people to respond with such fervour and intensity to calls for ethnic solidarity? This book attempts to make sense of ethnicity's decisive role in Afghanistan through a comprehensive exploration of its nature and perception. Based on new data generated through interviews, field notes and participant observations, Sharma maps the increased role of ethnicity in Afghan national politics. Key social, political and historical processes that facilitated its emergence as the pre-dominant fault line of conflict are explored, moving away from grand political and military narrative to instead engage with zones of conflict as social spaces. This book will be of interest to students and scholars working in politics, ethnic studies and security studies.
