The Hypercomplex Society:

The Hypercomplex Society Lars Qvortrup, 2003 Should today's society be termed an information or a network society This book provides an alternative choice the hypercomplex society which is a critical complex theoretical understanding of society whose growing level of social complexity represents the basic challenge of our current society This original understanding of society is presented through a historical analysis of the emergence of the current state of hypercomplexity and polycentrism The functioning of communication mass media and the public sphere in the hypercomplex society is also analyzed and the Internet is characterized as a communication infrastructure particularly shaped by the hypercomplex society The book concludes with a cultural self observation of the hypercomplex society

Governing Turbulence, Risk and Opportunities in the Complexity Age Guglielmo Chiodi, Antonio Bazilio Floriani Neto, Enrique Caceres Niet, 2018-11-23 The book is composed of several articles that explore complexity in its most varied aspects The solution of contemporary problems whatever they may be requires a multifaceted vision far beyond the reductionist perspective The study of complex systems however does not have the capacity to offer ready answers to the challenges of humanity On the contrary it points to the increase in uncertainty the need to control variables and uncertainty This does not mean therefore that we should simply ignore the social economic and political phenomena that are all around us What this book demonstrates is the importance of knowledge being disseminated and it is imperative that different sciences exchange ideas theories and breakthroughs

Rhetorical Aspects of Discourses in Present-Day Society Lotte Dam, Lise-Lotte Holmgreen, Jeanne Strunck, 2009-05-27 Since antiquity the notion of rhetoric has been associated with Aristotle Cicero and Quintilian Their theories are central to the understanding that on the one hand rhetoric can be used for persuading and convincing an audience and on the other for becoming an eloquent speaker Based on this understanding the study of rhetoric was for many years regarded by scholars as a meaningless enterprise as it was perceived as a study of linguistic ornamentation However in the beginning of the twentieth century scholars regained an interest in the study of rhetoric in recognition of rhetorical skills being important for communication in modern society Like speakers in public life e g politicians who had always acknowledged the role of rhetoric all sorts of communicators mediators and scholars became interested in rhetoric as a practical tool for building up texts meant for the public sphere as well as an analytical tool for the critique of public argumentation This led to the development of new theories from New Rhetoric over Rhetorical Criticism to

theories of genre and discourse reflecting the view that rhetoric must be understood and used against the social and cultural framework in which it is embedded The contributions of this book reflect this multi faceted approach to rhetoric discourse and genre through their focus upon and analysis of different institutionalised discourses Thus within the three sections of political journalistic and organisational discourse the articles discuss various discourse types and their rhetorical features contributing to the understanding of rhetoric and discourse having significant influence on human action and interaction in society
