Boland,2014-05-01 The major methodological task for modern economists has been to establish the testability of models Too often however methodological assumptions can make a model virtually impossible to test even under ideal conditions yet few theorists have examined the requirements and problems of assuring testability in economics In *The Methodology of Economic Model Building* first published in 1989 Lawrence Boland presents the results of a research project that spanned more than twenty years He examines how economists have applied the philosophy of Karl Popper relating methodological debates about falsifiability to wider discussions about the truth status of models in natural and social sciences He concludes that model building in economics reflects more the methodological prescriptions of the economist Paul Samuelson than Popper s falsificationism This title will prove invaluable to both students and researchers and represents a substantial contribution to debates about the scientific status of economics The Demand and Supply of Outdoor Recreation Charles J. Cicchetti,1969 Economics Richard G. Lipsey,K. Alec Chrystal,2015 Written to engage you with real world issues and questions in economics this book provides up to date coverage of the financial crisis and its many subsequent implications which are vital to understanding today s economic climate Case studies help you to understand how economics works in practice and to think critically Back cover The New Palgrave Dictionary of Economics ,2016-05-18 The award winning *The New Palgrave Dictionary of Economics* 2nd edition is now available as a dynamic online resource Consisting of over 1 900 articles written by leading figures in the field including Nobel prize winners this is the definitive scholarly reference work for a new generation of
