Using the Engineering Literature, Second Edition Bonnie A. Osif, 2011-08-09 With the encroachment of the Internet into nearly all aspects of work and life it seems as though information is everywhere However there is information and then there is correct appropriate and timely information While we might love being able to turn to Wikipedia for encyclopedia like information or search Google for the thousands of links on a topic engineers need the best information information that is evaluated up to date and complete Accurate vetted information is necessary when building new skyscrapers or developing new prosthetics for returning military veterans While the award winning first edition of *Using the Engineering Literature* used a roadmap analogy we now need a three dimensional analysis reflecting the complex and dynamic nature of research in the information age *Using the Engineering Literature Second Edition* provides a guide to the wide range of resources available in all fields of engineering This second edition has been thoroughly revised and features new sections on nanotechnology as well as green engineering The information age has greatly impacted the way engineers find information Engineers have an effect directly and indirectly on almost all aspects of our lives and it is vital that they find the right information at the right time to create better products and processes Comprehensive and up to date with expert chapter authors this book fills a gap in the literature providing critical information in a user friendly format *Using the Engineering Literature* Bonnie A. Osif, 2006-08-23 The field of engineering is becoming increasingly interdisciplinary and there is an ever growing need for engineers to investigate engineering and scientific resources outside their own area of expertise However studies have shown that quality information finding skills often tend to be lacking in the engineering profession *Using the Engineerin* Glossary for the Worldwide Transportation of Dangerous Goods and Hazardous Materials Malcolm A. Fox, 1999-08-27 What could the following possibly have in common Accumulator acid sludge actuating cartridge air bag inflator cut back asphalt Bangalore torpedo wet battery bhusa blau gas box toe gum bursters copra dead oil etching acid fish meal fracturing devices gasohol gutta percha hay iron swarf jet tapper kapok lithium cartouche M86 fuel natural uranium organotin pesticides pepper spray petroleum raffinate picrotoxin refrigerant gas rubber shoddy safety squib seed expeller slurry explosive tankage turpentine substitute uncalcined varnish drier wax vesta matches zinc ash These are some of the vague and confusing regulatory terms that must be used to describe the 3 6 billion metric tons of dangerous chemicals and products transported around the world each year by air land and water In fact the use of this jargon mandated

by many national and international authorities like the United Nations makes regulatory compliance and safe transportation extremely uncertain Existing references provide little help Even the regulations supply only a limited number of descriptions of the terms Glossary for the Worldwide Transportation of Dangerous Goods and Hazardous Materials finally provides accurate clear explanations of the terms used in worldwide transportation of hazardous materials Written by a leading environmental and transportation consultant and educator it is the principal reference for all shippers and transporters involved in the identification of dangerous goods and hazardous materials the basis of all subsequent transportation requirements

Monographs in Sci-Tech Libraries Ellis Mount,2019-12-06 This book first published in 1983 is devoted to a consideration of the contributions monographs make to all types of sci tech libraries as well as their probable role in the future Several related topics are also included such as sources for obtaining monographs tools used for selecting them and the attitude of publishers towards their creation

Information Sources in Energy Technology L. J. Anthony,2013-10-22 Information Sources in Energy Technology presents the major sources in the field of energy technology The book is comprised of 16 chapters that are organized into three parts The first part covers energy in general and discusses both local and international agencies that deal with energy technology along with its primary and secondary sources The next part deals with fuel technology this part details combustion steam and boiler plant electrical energy and energy conservation The last part talks about specific energy sources including nuclear solar and geothermal The text will be of great use to individuals involved in energy industry Scientists and engineers involved in energy projects will also benefit from the book
