Allison L. Hurst

The Imperial Middle Why Americans Cant Think Straight About Class:

The Imperial Middle Benjamin DeMott,1992 Examines the concept of America as a classless society and reveals the social and political problems associated with the myth

Considering Class Kevin M. Cahill (Professor of Philosophy),Lene Johannessen,2007 In the 21st century hardly any aspects of human existence are left unexplored by postmodern theories and discourses of subjectivity and individuality of hybridity and identity of race gender and ethnicity Conspicuous however among these critical inquiries is the relatively little attention devoted to the category of class This absence is particularly alarming at a time when neo liberalism and post capitalism feed on cultural fragmentation and ideological relativism The contributions in *Considering Class* Essays on the Discourse of the American Dream address the dys functional position of class in American socio political and cultural reality from a variety of disciplinary perspectives While it is open to debate whether class is more resistant to being relativized than other categories there is increasing recognition that class remains a critical category with the potential to transcend the rifts and divisions that run along lines of race ethnicity and gender and with the potential to reconfigure the current American political landscape

The American Paradox Patrick J. Gallo,1999

Class Formation, Civil Society and the State Michael Burrage,2008-01-17 Rather than a ranking system based on occupational prestige this book explains social stratification through political events and decisions Using analyses of Russia France the United States and England Burrage claims that class stems from the habitual relationship between state and civil society and remarkably is undermined by free markets

Political Literacy in Composition and Rhetoric Donald Lazere,2015-07-20 In

Political Literacy in Composition and Rhetoric Donald Lazere calls for revival of NCTE resolutions in the 1970s for teaching the critical reading listening viewing and thinking skills necessary to enable students to cope with the persuasive techniques in political statements advertising entertainment and news and explores the reasons these goals have been eclipsed in composition studies over recent decades Obstacles to those goals have included the emphasis in the profession on basic and first year writing at the expense of more advanced study in argumentative rhetoric and on the privileging of students personal writing over critical study of both academic and political discourse Lazere further argues that theorists who legitimately champion students pluralistic local communities sometimes fail to recognize that liberal education can enable students to grow beyond their home cultures to critical awareness of national and international politics Finally he argues that the fixation in recent composition studies on liberally inclined students and communities on the margins has eclipsed attention to the conservative conformity long prevalent in mainstream American society and education His proposals for curriculum and pedagogy seek to introduce students to a more highly informed cogent and open ended level of debate between the political left and right
