world and many simply struggle to stay awake Compared to other subjects taught at the secondary level history is frequently judged to be the most boring This is largely because it is viewed as an intellectually lifeless subject that presents few opportunities for active engagement Questioning History is a book built around 16 essential questions designed to challenge this common assumption Each question is broad open ended and subject to vigorous debate By examining the historical background behind each question and by analyzing the ways in which the question can be answered the reader will come away with a deeper understanding of the past and a new appreciation for history as a cognitively dynamic subject In addition by using each chapter as a platform for engaging discussions and Socratic seminars the reader will be able to refine the decision making skills necessary for effective citizenship in a democratic society Depending on the classroom or the setting in which it is being used Questioning History can either take the place of the more traditional textbook or at least be used as a supplement to make it come more alive The best way to learn and to appreciate a subject is through active engagement Questioning History provides a shot of adrenalin to the study of history
