The International Dimensions Of Internal Conflict Bcsia Studies In International Security:

Progress in International Relations Theory Colin Elman, Miriam Fendius Elman, 2003-08-29 All academic disciplines periodically appraise their effectiveness evaluating the progress of previous scholarship and judging which approaches are useful and which are not. Although no field could survive if it did nothing but appraise its progress, occasional appraisals are important and if done well can help advance the field. This book investigates how international relations theorists can better equip themselves to determine the state of scholarly work in their field. It takes as its starting point Imre Lakatos's influential theory of scientific change and in particular his methodology of scientific research programs (MSRP). It uses MSRP to organize its analysis of major research programs over the last several decades and uses MSRP's criteria for theoretical progress to evaluate these programs. The contributors appraise the progress of institutional theory, varieties of realist and liberal theory, operational code analysis, and other research programs in international relations. Their analyses reveal the strengths and limits of Lakatosian criteria and the need for metatheoretical metrics for evaluating scientific progress.

The Limits of Culture Brenda Shaffer, 2006 Experts analyze the effect of cultural interests on the foreign policy of states in the Caspian region including Iran, Azerbaijan, Armenia, Georgia, Afghanistan, Kazakhstan, and Pakistan.

Terrorism and America Philip B. Heymann, 2000 Examining how the United States and other democracies can fight terrorism while preserving liberty and maintaining a healthy unified society.

Countering Terrorism Arnold M. Howitt, Robyn L. Pangi, 2003 Ways in which federal state and local institutions should integrate their efforts to prepare for future terrorist threats.

The Coming Crisis Victor A. Utgoff, 2000 How will continued proliferation of nuclear weapons change the global political order? This collection of essays comes to conclusions at odds with the conventional wisdom. Stephen Rosen and Barry Posen explore how nuclear proliferation may affect US incentives to confront regional aggression. Stephen Walt argues that regional allies will likely prove willing to stand with a strong and ready United States against nuclear backed aggression. George Quester and Brad Roberts examine long term strategic objectives in responding to nuclear attack by a regional aggressor. Richard Betts highlights the potential for disastrous mistakes in moving toward and living in a world heavily populated with nuclear armed states. Scott Sagan explains how the nuclear nonproliferation policies best suited to some states can spur proliferation by others. Caroline Ziemke shows how the analysis of a state's strategic personality can provide insights into why it might want nuclear weapons and how its policies may develop once it gets them. And Victor Utgoff concludes that the United States seems more likely to intervene against regional aggression when the aggressor has nuclear weapons than when it does not.

Terrorism, Freedom, and Security Philip B. Heymann, 2003 A former Deputy Attorney General of the United States argues that we must preserve our civil liberties and democratic values while fighting terrorism. On September 11, 2001, the United States began to consider the terrorist threat in a new light. Terrorism was no longer something that happened in other countries on other continents but became a pressing domestic concern for the US government and American citizens. The

nation suddenly faced a protracted struggle In Terrorism Freedom and Security Philip Heymann continues the discussion of responses to terrorism that he began in his widely read Terrorism and America He argues that diplomacy intelligence and international law should play a larger role than military action in our counterterrorism policy instead of waging war against terrorism the United States needs a broader range of policies Heymann believes that many of the policies adopted since September 11 including trials before military tribunals secret detentions and the subcontracting of interrogation to countries where torture is routine are at odds with American political and legal traditions and create disturbing precedents Americans should not be expected to accept apparently indefinite infringements on civil liberties and the abandonment of such constitutional principles as separation of powers and the rule of law Heymann believes that the United States can guard against the continuing threat of terrorism while keeping its traditional democratic values in place

Case

Studies and Theory Development in the Social Sciences Alexander L. George, Andrew Bennett, 2005-04-15 The use of case studies to build and test theories in political science and the other social sciences has increased in recent years Many scholars have argued that the social sciences rely too heavily on quantitative research and formal models and have attempted to develop and refine rigorous methods for using case studies This text presents a comprehensive analysis of research methods using case studies and examines the place of case studies in social science methodology It argues that case studies statistical methods and formal models are complementary rather than competitive The book explains how to design case study research that will produce results useful to policymakers and emphasizes the importance of developing policy relevant theories It offers three major contributions to case study methodology an emphasis on the importance of within case analysis a detailed discussion of process tracing and development of the concept of typological theories Case Studies and Theory Development in the Social Sciences will be particularly useful to graduate students and scholars in social science methodology and the philosophy of science as well as to those designing new research projects and will contribute greatly to the broader debate about scientific methods **Fighting Words** Michael Edward Brown, Sumit Ganguly, 2003 A study of the impact of language policies on ethnic relations in fifteen Asian and Pacific countries
