The Patristic Understanding of Creation William A. Dembski, Wayne J. Downs, Fr. Justin B. A. Frederick, 2019-11-14 The Patristic Understanding of Creation encapsulates what the Church Fathers had to say in their own words on the topic of creation Going back to Roman and Byzantine times the writings of the Church Fathers are basic to Christian theology and provide a benchmark for how Christians have traditionally understood creation This understanding of creation however faces tremendous challenges in our day especially in discussions at the intersection of science and religion Process theology and other efforts to reconceptualize creation have explicitly opposed key elements of the Christian doctrine of creation creation

ex nihilo the transcendence and immanence of God in creation the absolute creatureliness and non self sufficiency of the world to use a phrase of Fr Georges Florovsky the goodness of creation and the openness of the world to divine action All of these the Church Fathers not only held but also ably defended This anthology is therefore not merely of academic or historical interest In reasserting a theologically sound understanding of creation this anthology fills a need that is both practical and urgent

The Beginnings of Critical Realism in America Vernon Parrington, 2017-09-29 This final volume of Vernon Louis Parrington s Pulitzer Prize winning study deals with the decay of romantic optimism It shows that the cause of decay is attributed to three sources stratifying of economics under the pressure of centralization the rise of mechanistic science and the emergence of a spirit of skepticism which with teachings of the sciences and lessons of intellectuals has resulted in the questioning of democratic ideals Parrington presents the movement of liberalism from 1913 to 1917 and the reaction to it following World War I He notes that liberals announced that democratic hopes had not been fulfilled the Constitution was not a democratic instrument nor was it intended to be and while Americans had professed to create a democracy they had in fact created a plutocracy Industrialization of America under the leadership of the middle class and the rise of critical attitudes towards the ideals and handiwork of that class are examined in great detail Parrington s interpretation of the literature during this time focuses on four divisions of development the conquest of America by the middle class the challenge of that overlordship by democratic agrarianism the intellectual revolution brought about by science and the appropriation of science by the middle class and the rise of detached criticism by younger intellectuals A new introduction by Bruce Brown highlights Parrington s life and explains the importance of this volume
