Worldwide there are more than 100 groups of Gypsies and Travellers who collectively form part of a wider Romani population, estimated at 12 million people. The Gypsies and Travellers in this study comprise English and Welsh Gypsies, Irish Travellers and Scottish Gypsy Travellers. English and Welsh Gypsies and Irish Travellers form an estimated population of 500 000 in England and Wales.^{1–3} Nomadism and caravan (trailer) dwelling, although not defining them, are features of their cultural heritage rather than a lifestyle choice; many live in houses and others live on authorised or non-authorised residential caravan sites.⁴ They are among the UK's most socially excluded groups⁵ despite legal protection as a result of their ethnic minority status.

There are many previous studies of health meanings, values and practices among different cultural groups, and studies concerning beliefs and views about specific health problems. However, there seems to be little information concerning general views and perceptions of health and influences on the health of Gypsies and Travellers.

This was not a comparative or theoretically informed study, but a descriptive qualitative strand of an applied policy mixed methods study designed to estimate the current health status of Gypsies and Travellers. The key finding from the health status survey was the high burden of ill health among Gypsies and Travellers.⁶ We designed the qualitative study using a framework approach⁷ to put their health status into context by purposively selecting a sample to explore how ill health was experienced and understood by this minority group.

There are few previous qualitative studies on the health of Gypsies or Travellers in the UK and Ireland,^{8–11} and most report anecdotal data from practitioner accounts.^{12–14}

Objective: To illuminate findings of the survey of the health status of Gypsies and Travellers by exploring their health-related beliefs and experiences.

Design: Qualitative study of a purposive subsample from in-depth interviews using framework analysis.

Setting: The homes or alternative community settings of the participants in five geographically dispersed study locations in England.

Participants: 27 Gypsies and Travellers with an experience of ill health, purposively sampled from a larger population participating in an epidemiological survey of health status.

Results: The experience of poor health and daily encounters of ill health among extended family members were normalised and accepted. Four major themes emerged relating to health beliefs and the effect of lifestyle on health for these respondents: the travelling way; low expectations of health; self-reliance and staying in control; fatalism and fear of death. These themes dominated accounts of health experience and were relevant to the experience. These themes add richness to the health status data and inform our understanding.

Conclusions: Among Gypsies and Travellers, coherent cultural beliefs and attitudes underpin health-related behaviour, and health experiences must be understood in this context. In this group, ill health is seen as normal, an inevitable consequence of adverse social experiences, and is stoically and fatalistically accepted. The provision of effective healthcare and improvement of poor health in Gypsies and Travellers will require multi-agency awareness of these issues.

METHODS

Participants and setting

The sampling frame comprised 269 Gypsies and Travellers participating in a parallel study of their health status conducted at five English locations: the survey sample was itself constructed to include quotas of men and women, Irish and British, across roadside, official, private and housed accommodation. Within this frame, anyone who reported a recent or current health problem and therefore had cause to access health services was eligible for inclusion in the qualitative study (ie, intensity sampling). Maximum variation purposive sampling¹⁵ was also used across the study localities to ensure a representative final sample (table 1). A variety of health problems or unidentified symptoms were reported among the final sample (appendix A). Interviews were distributed over a 12-month period to capture any seasonal variation in mood and health states.

Research governance approval (including multicentre research ethics committee ethical review) was obtained with secondary approval from primary care trusts and local research ethics committees in each location where health visitors worked.

Interviews

Data were collected by individual in-depth semistructured interviews with participants in their own homes or at a venue of their choice. The interviews were carried out within 2–3 weeks of completion of the Health Survey Questionnaire. A topic guide was developed from five sources: personal practitioner experience; previous pilot study¹⁶; other published evidence; advice from the project advisory team, which included Gypsy Travellers; and initial pilot interviews. Non-directive interview questions allowed the exploration of

thought the idea of an immobile private place to rest This book explores the places spaces and practices of dwelling in mobile
times and considers dwelling under the umbrella of broader transformations in society The manifestations of these
transformations are carved out on the level of everyday practices and experiences Bringing together eight case studies from
Europe the USA and Asia on subjects such as gentrification homelessness and displaced persons multi local and diasporic
lifeworlds professional elites and tourism the book explores various and complex entanglements of mobilities and dwelling in
detail In doing so the contributors critically analyse who may be or has to be mobile under which circumstances at present
This book thus demonstrates that mobility is more than movement between localities and that to dwell is more than to be at a
locality Instead mobilities and dwelling are both shaped and challenged by strong but shifting power relations and are thus
deeply contested This book was originally published as a special issue of Cultural Studies **Roma, the Gypsy World**
Shyam Singh Shashi,1990 The first Gypso anthropological study of Roma the Gypsies of the world is the result of an
extensive socio anthropological survey covering twenty five countries of Europe America and the USSR This is a vivid
account of the Banjara and other nomadic communities of India and the world The scholar who is an eminent social scientist
and a creative writer has not only applied successfully the traditional techniques of research of participant and non
participant observations but also his own approach and methodology The book is based on his 11 year long research centered
on Roma the Gypsies who have preserved and lead their nomadic or semi nomadic life throughout the world even in
advanced countries This is a study in depth in the context of Indian nomads who migrated from their motherland wave after
wave to other parts of the world carrying with them the culture of their times with the inter mingling of local traditions and
customs Dust jacket Current Developments in Anthropological Genetics James H. Mielke,Michael H. Crawford,1982 This
volume examines the interrelationship of ecology subsistence pat terns and the observed genetic variation in human
populations Hence the book is divided conceptually into the following categories nonhuman primates hunters and gatherers
nomads swidden agriculturalists peas ant farmers religious isolates and modern and urban aggregates While many of these
populations have experienced and are experiencing ac culturation as a result of contact with technologically more advanced

groups the genetic structures described in this volume attempt to reconstruct the traditional patterns as well as genetic changes because of contact. Most chapters also integrate biological, genetic, social, and demographic data within an ecological frame, thus presenting a holistic view of the population structures of ecologically distinct groups. The first chapter examines the body of early nonhuman primate literature that emphasized ecological determinism in effecting the population structure of our primate ancestors' relatives. It also examines more recent literature since 1970 in which it became apparent that greater flexibility exists in primate social structure within specific environmental frameworks. Thus it appears that our nonhuman primate evolutionary heritage is not one of ecological determinism in social organization but one of flexibility and rapid change, suggesting the evolutionary success of our species is based upon a system of flexibility and that social adaptations can be accomplished in a number of diverse ways.

The Gypsy-American David J. Nemeth, 2002. This study is a regional ethnography that focuses on an ambiguously defined ethnic group in the United States: Rom Gypsies, whose survival strategies and stratagems appear to center ideally on the secrecy and mobility of its members. The study focuses primarily on the activities of Thomas Nicholas, a self-ascribed Rom Gypsy American and his family, and offers extraordinary insight into the Gypsy American ethnos. The book also addresses complex issues in Gypsy studies; social science scholarship provides a critique of its mission and accomplishments and offers a unique window into the lives of some typical Gypsy scholars.
