Literacy Learning in the Early Years Caroline Barratt-Pugh, Mary Rohl, 2020-07-16. Children's early experiences of literacy have a major influence on how they continue to learn as they grow older. Children enter early childhood programs and school with a wealth of knowledge and understandings of literacy. It is critical that early childhood professionals and teachers recognise and build on this learning. *Literacy Learning in the Early Years* offers a practical introduction to literacy issues for early childhood professionals and teachers working with children aged 0-8 in childcare, preschool and school contexts. The authors take a socio-cultural approach to literacy learning, emphasising the importance of understanding the various contexts in which young children are involved in literacy practices. They explore a range of literacy issues that early childhood professionals and teachers are facing in the 21st century. These issues include the role of play in literacy learning, how to use information communication technologies with young children and ways of introducing critical literacy. Literacy is understood broadly and readers are encouraged to explore a range of print and other media with children. With chapters from both Australian and UK authors, *Literacy Learning in the Early Years* is an ideal professional reference and student text, a very useful introductory text to literacy development in early childhood. It is clearly written and accessible to the wide range of professionals working with young children as well as to teachers and parents. It will be a valuable text in training at initial and in-service levels on a wide range of courses. Lesley Abbott, Professor of Early Childhood Education, Manchester Metropolitan University. This well-written comprehensive book combines many practical examples of learning to do literacy and suggestions for action and all the while engages the reader with questions and starting points for reflection. Susan Hill, Associate professor, The Centre for Studies in Literacy, University of South Australia.

International Handbook of Literacy and Technology Michael C. McKenna, Linda D. Labbo, Ronald D. Kieffer, David Reinking, 2013-01-11. This Handbook provides a comprehensive and international representation of state-of-the-art research theory and practice related to principal areas in which significant developments are occurring in the study of literacy and technology. It offers a glimpse of the commonalities faced by literacy educators around the world together with specific challenges raised by unique circumstances. Volume I of this Handbook endeavored to lay essential groundwork for the study of literacy and technology; it retains an explanatory value that will not weaken over time. Volume II differs considerably in conception. It assumes for the most part a higher level of expertise on the part of readers and the projects and applications described by the contributors are characterized by greater sophistication. The scope of technology use is broader and the challenges that have emerged are in sharper focus. A powerful feature of this volume is the addition of commentaries

from experts across the field on the potential of technology in key dimensions of literacy The title of Volume II has changed slightly to reflect the inclusion of contributions on a broad geographic basis It is now a truly international Handbook with chapter authors from six countries and five continents The International Handbook of Literacy and Technology Volume II is organized in five sections The Role of Technology in the New Literacies Technology Applications with Specific Populations Literacy Software and the Internet Teacher Education and Professional Development and The Potential of Technology in Key Dimensions of Literacy The effects of technology on literate activity have been both sweeping and subtle marked by an increasing variety of changes that are difficult to evaluate and project Perhaps the only prediction that can be offered with certainty is that the impact of technology is irreversible Specific changes may come and go but literacy and technology seem inextricably linked This Handbook is dedicated to that linkage and to examining the intricacies that define it International Handbook of Literacy and Technology Volume II is an essential reference for researchers professionals and students in reading literacy education literacy and technology educational technology and related areas and will serve well as a text for upper level and graduate courses on these topics

Cultural Literacy E.D. Hirsch, Jr., 1988-04-12 A must read for parents and teachers this major bestseller reveals how cultural literacy is the hidden key to effective education and presents 5000 facts that every literate American should know In this forceful manifesto Professor E D Hirsch Jr argues that children in the United States are being deprived of the basic knowledge that would enable them to function in contemporary society They lack cultural literacy a grasp of background information that writers and speakers assume their audience already has Even if a student has a basic competence in the English language he or she has little chance of entering the American mainstream without knowing what a silicon chip is or when the Civil War was fought An important work that has engendered a nationwide debate on our educational standards Cultural Literacy is a required reading for anyone concerned with our future as a literate nation
