The Hazardousness Of A Place A Regional Ecology Of Damaging Events By Hewitt:

The Hazardousness of a Place Kenneth Hewitt, Ian Burton, 1971

International Perspectives on Natural Disasters:

Occurrence, Mitigation, and Consequences Joseph P. Stoltman, John Lidstone, Lisa M. DeChano, 2007-03-01 Reports of natural disasters fill the media with regularity Places in the world are affected by natural disaster events every day Such events include earthquakes cyclones tsunamis wildfires the list could go on for considerable length In the 1990s there was a concentrated focus on natural disaster information and mitigation during the International Decade for Natural Disasters Reduction IDNDR The information was technical and provided the basis for major initiatives in building structures designed for seismic safety slope stability severe storm warning systems and global monitoring and reporting Mitigation or planning in the event that natural hazards prevalent in a region would suddenly become natural disasters was a major goal of the decade long program During the IDNDR this book was conceptualized and planning for its completion began The editors saw the need for a book that would reach a broad range of readers who were not actively or directly engaged in natural disasters relief or mitigation planning but who were in decision making positions that provided an open window for addressing natural disaster issues Those people were largely elected public officials teachers non governmental organization staff and staff of faith based organizations Those people for the most part come to know very well the human and physical characteristics of the place in which they are based With that local outreach in mind the editors intended the book to encourage readers to 1

Geomorphological Hazards and Disaster Prevention Irasema Alcántara-Ayala, Andrew S. Goudie, 2010-03-04 Human activities have had a huge impact on the environment and landscape through industrialisation and land use change leading to climate change deforestation desertification land degradation and air and water pollution These impacts are strongly linked to the occurrence of geomorphological hazards such as floods landslides snow avalanches soil erosion and others Geomorphological work includes not only the understanding but the mapping and modelling of Earth s surface processes many of which directly affect human societies In addition geomorphologists are becoming increasingly involved with the dimensions of societal problem solving through vulnerability analysis hazard and risk assessment and management The work of geomorphologists is therefore of prime importance for disaster prevention An international team of geomorphologists have contributed their expertise to this volume making this a scientifically rigorous work for a wide audience of geomorphologists and other Earth scientists including those involved in environmental science hazard and risk assessment management and policy Handbook of Hazards and Disaster Risk Reduction Ben Wisner, JC Gaillard, Ilan Kelman, 2012-03-29 The Handbook provides a comprehensive statement and reference point for hazard and disaster research policy making and practice in an international and multi disciplinary context It offers critical reviews and appraisals of current state of the art and future development of conceptual theoretical and practical approaches as well as empirical knowledge and available tools Organized into five inter related sections this Handbook contains sixty five contributions from leading scholars Section one

situates hazards and disasters in their broad political cultural economic and environmental context Section two contains treatments of potentially damaging natural events phenomena organized by major earth system Section three critically reviews progress in responding to disasters including warning relief and recovery Section four addresses mitigation of potential loss and prevention of disasters under two sub headings governance advocacy and self help and communication and participation Section five ends with a concluding chapter by the editors The engaging international contributions reflect upon the politics and policy of how we think about and practice applied hazard research and disaster risk reduction This Handbook provides a wealth of interdisciplinary information and will appeal to students and practitioners interested in Geography Environment Studies and Development Studies

Hazards in a Fickle Environment:

Bangladesh C.E. Haque, 2012-12-06 This book evolved from a collaborative research project between the University of Manitoba Canada and Jahangirnagar University Bangladesh which commenced in 1984 to study the problems of river channel migration rural population displacement and land relocation in Bangladesh The study was sponsored by the International Development Research Center IDRC based in Ottawa Canada It was through this project that I started my journey into disaster research more than thirteen years ago with basically an applied problem of massive magnitude in Bangladesh I spent two and a half years in two stages in Bangladesh s riparian villages to collect the empirical data for this study Then the growing disaster discourse throughout the 1980s especially its conceptual and theoretical areas drew me in further gluing my interest to these issues In the 1990s during my research and teaching at Brandon University Canada I realized that despite the large body of literature on natural disasters there was no work that synthesized the approaches to nature triggered disasters in a comprehensive form with sufficient empirical substantiation In addition despite the great deal of attention given to disasters in Bangladesh I found no detailed reference book on the topic Natural hazards and disasters in my view should be studied under a holistic framework encompassing the natural environment society and individuals Overreaction to the limitations of technocratic scientific approaches the control and prevention of physical events through specialized knowledge and skills has resulted in a call for taking the naturalness out of natural disasters

Adaptation to Climate Variability and Change Sally M. Kane, Gary W. Yohe, 2013-03-09 Changes in climate and climate variability have an effect on people s behaviour around the world and public institutions have an important part to play in influencing our ability to respond to and plan for climate risk We may be able to reduce climate risk by seeking to mitigate the threat on the one hand and by adapting to a changed climate on the other Another theme of the book is the integrated role of adaptation and mitigation in framing issues and performing analyses Adaptation costs fall most heavily on the poor and special attention needs to be paid to adaptation by the poorest populations An integrating framework is also presented to

provide the context for an expansive typology of terms to apply to adaptation The 12 papers collected here use methods from a variety of disciplines and focus on different time frames for decision making from short term to the very long term

Readership Technically trained readers familiar with the policy issues surrounding climate change and interested in learning the scientific underpinnings of issues related to societal adaptation *Residential Water Demand* Angelo P.

Grima,1972-12-15 This detailed study of the use of water at different price levels by residential consumers in the Toronto centred region from Hamilton to Oshawa challenges the basis of our present urban water supply policy Adoption of the recommendations presented would mean higher prices to householders but a considerable saving of hundreds of millions of tax dollars over the next three decades The present policy uses a requirement approach in which future water needs are calculated by extrapolation of past trends and an assumption that demand is inelastic This leads to excessive levels of water use and over investment in water supply sewage collection and treatment systems The resultant misallocation of resources can be corrected by adoption of a demand management approach in which investment policy is guided by consumer demand and alternative pricing arrangements are used as a management tool Dr Grima examines several alternative choices for management such as metering increasing marginal prices sewerage charges seasonal charges and an increasing price block schedule and describes the results of each Water managers in Canada are strongly challenged to begin a fundamental rethinking of their basic policies Department of Geography Research Publication 7 **The Moselle** Jean

Cermakian,1975-12-15 The Moselle has been one of the main arteries of European Communication and transportation for centuries The Romans used it as a main thoroughfare from southern to northern Europe and also began the improvements to its navigation that have continued intermittently through the industrial revolution to the present day Professor Cermakian focuses on the historical political and geographical factors in the use and canalization of this international river a focus that is derived from his interest in the details of standardizing transport networks and policy as an important part of European integration which he sees both as a long historical movement and as a present endeavour under EEC The book offers a history of the political economy of an important river a symbol for many of the spirit of Europe University of Toronto

Department of Geography Research Publications 14 European Settlement and Development in North America James R.

Gibson,1978-12-15 Andrew Hill Clark 1911 1975 was responsible for much of the recent rise of historical geography in North America The focus on his research was the opening of New World lands by European peoples and this North American experience is the subject of this collection of essays written by eight of Clark s students They examine the role of a new physical and economic environment particularly abundant and cheap land in the settlement of New France the cultural and physical problems that conditioned Russian America the transformation of cultural regionalism in the eastern United States between the late colonial seaboard and the early republican interior the changing economic geography of rice farming on the antebellum Southern seaboard the interrelationships of the European and Indian economies in the pre conquest fur trade of

Canada differential acculturation and ethnic territoriality among three immigrant groups in Kansas in the late nineteenth and early twentieth centuries the development in England and the United States of similar social geographic images of the Victorian city and the erosion of a sense of place and community by possessive individualism in eighteenth century Pennsylvania The essays are preceded by an appreciation of Clark as an historical geographer written by D W Meinig and are brought together in an epilogue by John Warkentin The work is an unusually consistent Festschrift which should appeal to all interested in the patterns of North American settlement

Hazards Vulnerability and Environmental Justice Susan L. Cutter, 2012-05-04 From Hurricane Katrina and the south Asian tsunami to human induced atrocities terrorist attacks and the looming effects of climate change the world is assailed by both natural and unnatural hazards and disasters These expose not only human vulnerability particularly that of the poorest who are least able to respond and adapt but also the profound worldwide environmental injustices that result from the geographical distribution of risks hazards and disasters This collection of essays from one of the most renowned and experienced experts provides a timely assessment of these critical themes Presenting the top selections from Susan L Cutter's thirty years of scholarship on hazards vulnerability and environmental justice the volume tackles issues such as nuclear and toxic hazards risk assessment communication and planning and societal responses Cutter maps out the terrain and draws out the salient themes with a fresh powerful introduction written in the wake of her work in the aftermath of Katrina This essential collection is ideal for professionals researchers academics and students working on hazards risk disasters and environmental justice across a range of disciplines

The Geographical Dimensions of Terrorism Susan L. Cutter, Douglas B. Richardson, Thomas J.

Wilbanks, 2014-02-04 Undertaken as part of the National Science Foundation's call for research associated with the 9/11 terrorist attacks this volume contains research that addresses the immediate role and utility of geographical information and technologies in emergency management It also initiates an on going process to help develop a focused national research agenda on the geographical dimensions of terrorism Areas covered include geospatial data and technologies infrastructure research root causes of terrorism and vulnerability science and hazard research

Climate and Society in Colonial Mexico Georgina H. Endfield, 2011-07-20 By considering three case study regions in Mexico during the Colonial era *Climate and Society in Colonial Mexico* A Study in Vulnerability examines the complex interrelationship between climate and society and its contemporary implications Provides unique insights on climate and society by capitalizing on Mexico's rich colonial archives Offers a unique approach by combining geographical and historic perspectives in order to comprehend contemporary concerns over climate change Considers three case study regions in Mexico with very different cultural economic and environmental characteristics

The Form of Cities in Central Canada Larry S. Bourne, Ross D.

MacKinnon, James W. Simmons, 1973-12-15 Do Canadian cities have a distinctive form How has this form evolved over time and what has been the impact of growth transportation changes and differing lifestyles on the contemporary Canadian urban

environment The research summarized in the present volume is directed at these kinds of questions This book is an anthology of research papers and reports building around a common theme urban development in Central Canada Within this context specific interests focus on the spatial structure of the city land use distributions patterns of population density and intercity migration networks of interaction communities and lives This collection of papers will be of interest as a general reference which is not just descriptive but one which includes a range of examples of analytical approaches As such it is also designed as a contribution to the growing literature on urban research and policy formulation in Canada University of Toronto Department of Geography Research Publications 12

The Atmospheric Environment Andris Auliciems, 1972-12-15 In this study energy exchange processes and climatic influences are examined in relation to thermal comfort and work efficiency as exemplified in a schoolroom situation The investigation tests fundamental hypotheses on meteorotropisms and optimal thermal environments and demonstrates how daily variations within atmospheric environments are considerably more important than had been previously suspected It also describes the experimental use of a variety of microclimatic instruments and thermal indices in conjunction with psychological tests of continuous mental performance The Atmospheric Environment treats a complex problem from a broad multi disciplinary standpoint and is of particular interest to climatologists psychologists teachers and educational administrators heating and ventilating engineers and to all concerned with environmental management Department of Geography Research Publications 8

Law and the Management of Disasters Alexia Herwig, Marta Simoncini, 2016-12-01 Disasters raise serious challenges for contemporary legal orders they demand significant management but usually amidst massive disruption to the normal functioning of state authority and society When dealing with disasters law has traditionally focused on contingency planning and recovery More recently however resilience has emerged as a key concept in effective disaster management policies and strategies aiming at minimising the impact of events so that the normal functioning of society and the state can be preserved This book analyses the contribution of law to resilience building by looking at law's role in the different phases of the disaster regulatory process risk assessment risk management emergency intervention and recovery More specifically it addresses how law can effectively contribute to resilience oriented disaster management policies and what legal instruments can support effective resilience building

Integration of GIS and Remote Sensing Victor Mesev, 2008-03-11 In an age of unprecedented proliferation of data from disparate sources the urgency is to create efficient methodologies that can optimise data combinations and at the same time solve increasingly complex application problems Integration of GIS and Remote Sensing explores the tremendous potential that lies along the interface between GIS and remote sensing for activating interoperable databases and instigating information interchange It concentrates on the rigorous and meticulous aspects of analytical data matching and thematic compatibility the true roots of all branches of GIS remote sensing applications However closer harmonization is tempered by numerous technical and institutional issues including scale incompatibility measurement

disparities and the inescapable notion that data from GIS and remote sensing essentially represent diametrically opposing conceptual views of reality The first part of the book defines and characterises GIS and remote sensing and presents the reader with an awareness of the many scale taxonomical and analytical problems when attempting integration The second part of the book moves on to demonstrate the benefits and costs of integration across a number of human and environmental applications This book is an invaluable reference for students and professionals dealing not only with GIS and remote sensing but also computer science civil engineering environmental science and urban planning within the academic governmental and commercial business sectors

Managing the Risks of Extreme Events and Disasters to Advance Climate Change Adaptation Christopher B. Field,Vicente Barros,Thomas F. Stocker,Qin Dahe,2012-05-28 This Intergovernmental Panel on Climate Change Special Report IPCC SREX explores the challenge of understanding and managing the risks of climate extremes to advance climate change adaptation Extreme weather and climate events interacting with exposed and vulnerable human and natural systems can lead to disasters Changes in the frequency and severity of the physical events affect disaster risk but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability Some types of extreme weather and climate events have increased in frequency or magnitude but populations and assets at risk have also increased with consequences for disaster risk Opportunities for managing risks of weather and climate related disasters exist or can be developed at any scale local to international Prepared following strict IPCC procedures SREX is an invaluable assessment for anyone interested in climate extremes environmental disasters and adaptation to climate change including policymakers the private sector and academic researchers
