Japan and America, 1902 *The Great Mosaic Eye* Robin Allott, 2012-03-09 This is a revised and extended version of the Great Mosaic Eye originally published in 2001 There have been major changes in neuroscience and in language research since then Apparently disparate segments of research have started to come together and it is necessary to recast both the structure and the content of the book The extended title of the book with the addition of the word Society reflects this Another important change is that the book as originally published fell into two halves part 1 being the text of the book and part 2 an inserted CD which included a great deal of additional material that made possible important graphical and video content not easily presented in text form This new edition attempts to integrate all the material contained in the earlier edition but relying on links to the Internet for material in place of that contained in the inserted CD This new book as indeed was the case for the earlier version was intended to bring together a mass of material which had been published separately over more than 40 years under the titles The Physical Foundation of Language first published 1973 and recently reprinted The Motor Theory of Language 1989 The Natural Origin of Language The Structural Interrelation of Language Vision and Action The Child and the World How the child acquires language How language mirrors the world 2005 All these are now in print so that it is not necessary to repeat in this book much of the

extensive discussion in the earlier books all supplemented by other recent material readily accessible on the Internet at
