The One to Watch Bruce Girard, 2003-01-01. The combination of the new information and communication technologies (ICTs) and radio is opening up a range of possibilities for communication in the developing world. Broadcasters who used to have to travel for hours to find a public library to research a programme now have instant access to the internet whilst national, regional and global radio news agencies are making world news and alternative perspectives available to even the most remote communities. These developments are also helping to keep communities together despite the distances imposed by migration trends. The case studies in this book demonstrate the value of converging radio and new ICTs for development and suggest that radio will have even greater significance and value in the future. The book is based on the findings of a FAO international workshop held in February 2001.

Routledge Handbook of Religion and Politics, *The Green Book of Language Revitalization in Practice* Leanne Hinton, Kenneth Hale, 2013-06-13. With world-wide environmental destruction and globalization of economy, a few languages, especially English, are spreading rapidly in use while thousands of other languages are disappearing, taking with them important cultural, philosophical and environmental knowledge systems and oral literatures. We all stand to suffer from such a loss, none more so than the communities whose very identity is being threatened by the impending death of their languages. In response to this crisis, indigenous communities around the world have begun to develop a myriad of projects to keep their languages alive. This volume is a set of detailed accounts about the kind of work that is going on now as people struggle for their linguistic survival. It also serves as a manual of effective practices in language revitalization. Following are the key features: 23 case studies of language revitalization in practice from Native American languages, Australian languages, Maori, Hawaiian, Welsh, Irish and others, written primarily by authors directly involved in the programs; short introductions situate the languages to help make the languages more real in the minds of readers; each chapter gives a detailed overview of the various kinds of programs and methods in practice today; introductions and maps for each of the languages represented familiarize the reader with their history, linguistic structure and sociolinguistic features; and strong representation in authorship and viewpoint of the people and communities whose languages are threatened gives the readers an inside understanding of the issues involved and the community's internal attitudes toward language loss and revitalization. This book was previously published by Academic Press under ISBN 978 01 23 49354 5.
