

The Painted View

Louis Andriessen, Elmer Schönberger

The Painted View:

The Apollonian Clockwork Louis Andriessen, Elmer Schönberger, 2025-10-01 I think my music deserves to be considered as a whole Igor Stravinsky remarked at the end of a long and restless career and that is exactly what the authors of *The Apollonian Clockwork* do In 1982 convinced that there is no essential difference between early and late Stravinsky Louis Andriessen and Elmer Schönberger were the first to write a monograph on the composer which radically breaks with the habit of dividing his works into Russian neoclassical and serial In an essay which continually shifts in its approach style and perspective the authors elaborate on their insight that a single immutable compositional attitude underlies the whole of Stravinsky's oeuvre By this token the book not only offers an analysis of the composer's protean work and artistry but takes example by it as well

City Views in the Habsburg and Medici Courts Ryan E. Gregg, 2018-12-10 In *City Views in the Habsburg and Medici Courts* Ryan E. Gregg relates how Charles V Holy Roman Emperor and Duke Cosimo I of Tuscany employed city view artists such as Anton van den Wyngaerde and Giovanni Stradano to aid in constructing authority These artists produced a specific style of city view that shared affinity with Renaissance historiographic practice in its use of optical evidence and rhetorical techniques History has tended to see city views as accurate recordings of built environments Bringing together ancient and Renaissance texts archival material and fieldwork in the depicted locations Gregg demonstrates that a close knit school of city view artists instead manipulated settings to help persuade audiences of the truthfulness of their patrons' official narratives

Utopian Adventure: The Corviale Void Victoria Watson, 2016-02-17 This book is about contemporary issues in architecture and urbanism taking the form of a project for The Corviale Void a one kilometre long strip of urban space immured in the notorious Corviale housing development in the Southwestern sector of Rome Corviale is a bizarre object single minded in its idea the history of Corviale can be traced to debates in Italian architecture culture of the 1960s including Aldo Rossi's objection to urbanisation as articulated in his books and projects On the one hand the project for the Corviale Void begins with one of the original theorists of modern urbanisation and architecture Giovanni Battista Piranesi looking into his fascination with the insides of walls On the other hand the project begins with a new material form The Air Grid Like the forms appearing in Piranesi's etchings Air Grid is made from a kind of hatching but Air Grid is hatched out of colour vectors literally drawn into the air The human eye is easily mesmerised by the Air Grid scanning back and forth it reads the colour form as animated in some sense alive At the same time as the Italian architects were engaged in those activities that would eventually give birth to the Corviale Void the painter Yves Klein was creating *The Architecture of the Air* Klein's work is of special interest to the project of the Corviale Void because of the important role of colour in the development of his thinking about architecture By attending to Klein's parallel inquiry Air Grid is brought into dialogue with the philosophy of Arthur Schopenhauer who was one of the first thinkers to develop a physiological theory of colour The important thing about Schopenhauer's thinking is the careful way he looked at

physiological phenomena regarding them as directly informed by metaphysical powers for Schopenhauer Architecture too is a physiological matter and hence metaphysical The concluding proposal for the Corviale Void presents a metaphysical architect
