Broadcast Hysteria A. Brad Schwartz,2025-09-23 On the evening of October 30 1938 radio listeners across the United States heard a startling report of a meteor strike in the New Jersey countryside With sirens blaring in the background announcers in the field described mysterious creatures terrifying war machines and thick clouds of poison gas moving toward New York City As the invading force approached Manhattan some listeners sat transfixed while others ran to alert neighbors or to call the police Some even fled their homes But the hair raising broadcast was not a real news bulletin it was Orson Welles s adaptation of the H G Wells classic *The War of the Worlds* In *Broadcast Hysteria* A Brad Schwartz boldly retells the story of Welles s famed radio play and its impact Did it really spawn a wave of mass hysteria as *The New York Times* reported Schwartz is the first to examine the hundreds of letters sent to Orson Welles himself in the days after the broadcast and his findings challenge the conventional wisdom Few listeners believed an actual attack was under way But even so Schwartz shows that Welles s broadcast became a major scandal prompting a different kind of mass panic as Americans debated the bewitching power of the radio and the country s vulnerability in a time of crisis When the debate was over American broadcasting had changed for good but not for the better As Schwartz tells this story we observe how an atmosphere of natural disaster and impending war permitted broadcasters to create shared live national experiences for the first time We follow Orson Welles s rise to fame and watch his manic energy and artistic genius at work in the play s hurried yet innovative production And we trace the present day popularity of fake news back to its source in Welles s show and its many imitators Schwartz s original research gifted storytelling and thoughtful analysis make *Broadcast Hysteria* a groundbreaking new look at a crucial but little understood episode in American history **Immersed in Media** Cheryl Campanella Bracken,Paul Skalski,2010-04-05 Over the next few decades immersive media could fundamentally change the ways humans engage in entertainment communication and social interaction The current volume takes a step towards understanding this potential paradigm shift combining insights from pioneers of the field of presence with bright young scholars who bring a new perspective Jeremy Bailenson Stanford University USA This book provides an indispensable contribution to scholars in communication studies computer science and psychology interested in the modes of being present in different media and offers a careful historical and theoretical framework to the state of the art research Anna Spagnolli University of Padova Italy

Emergency Broadcasting and 1930s American Radio Edward D. Miller, 2003 The voice we hear on the radio the voice with no body attached is a key element in the history of media in the twentieth century Before television and the internet there was radio and much of what defined the makeup of these newer media was influenced by the way radio was broadcast to people and the way people listened to it *Emergency Broadcasting* focuses on key moments in the history of early radio in order to come to an understanding of the role voice played in radio to describe national crises a fictional invasion from outer space and general entertainment Taking the Hindenburg disaster The War of the Worlds hoax Franklin Roosevelt's Fireside Chats and the serial mystery *The Shadow* as his focal points Edward Miller illustrates how the radio for the first time instantly communicated to a mass audience and how that communication where the voice counts more than the image is still at work today in television and the World Wide Web Theoretically sophisticated yet grounded in historical detail *Emergency Broadcasting* offers a unique examination of radio and at the same time develops a complex understanding of the media whose birth is owed to the innovations and disembodied power established by it Author note Edward D Miller is Chair of the Department of Media Culture at The College of Staten Island CUNY

The Politics and Morality of Deviance Nachman Ben-Yehuda, 1990-01-01 The Politics and Morality of Deviance develops a theoretical framework and then applies it to four different and specific case studies in an explicit attempt to put the sociology of deviance back into mainstream sociology It argues that deviance should be analyzed as a relative phenomenon in different and changing cultures vis a vis change and stability in the boundaries of different symbolic moral universes It also argues that the legitimization of power should be thought of in terms of a moral order that in turn defines the societal boundaries of different symbolic moral universes Mills concept of motivational accounting systems is utilized throughout the text in order to illustrate how the micro and macro levels of analysis can be integrated

The Control Revolution James Beniger, 2009-06-01 Why do we find ourselves living in an Information Society How did the collection processing and communication of information come to play an increasingly important role in advanced industrial countries relative to the roles of matter and energy And why is this change recent or is it James Beniger traces the origin of the Information Society to major economic and business crises of the past century In the United States applications of steam power in the early 1800s brought a dramatic rise in the speed volume and complexity of industrial processes making them difficult to control Scores of problems arose fatal train wrecks misplacement of freight cars for months at a time loss of shipments inability to maintain high rates of inventory turnover Inevitably the Industrial Revolution with its ballooning use of energy to drive material processes required a corresponding growth in the exploitation of information the Control Revolution Between the 1840s and the 1920s came most of the important information processing and communication technologies still in use today telegraphy modern bureaucracy rotary power printing the postage stamp paper money typewriter telephone

punch card processing motion pictures radio and television Beniger shows that more recent developments in microprocessors computers and telecommunications are only a smooth continuation of this Control Revolution Along the way he touches on many fascinating topics why breakfast was invented how trademarks came to be worth more than the companies that own them why some employees wear uniforms and whether time zones will always be necessary The book is impressive not only for the breadth of its scholarship but also for the subtlety and force of its argument It will be welcomed by sociologists economists historians of science and technology and all curious in general **Lopsided Schools** Gerard Giordano,2011-01-16 Lopsided Schools introduces readers to the case method and helps the reader to use the case method to examine the scholastic challenges that critics posed from World War I to the present Some critics have stirred up educators with threats to reduce their budgets or fire them Others upset them with disconcerting questions Should parents demand that their children learn speed reading Should teachers emphasize vocational activities Should principals train their own successors Should superintendents award bonuses to teachers Should employers hire the graduates with the highest scores on standardized tests Should politicians assume greater responsibility for schooling Should journalists publicize information about lopsided schools This book examines these and the numerous other questions that critics posed Catalog of Copyright Entries. broadly conceived reference source on a medium that is now nearly eighty years old with essays that provide essential information on the subject as well as comment on the significance of the particular person organization or topic being examined *Ordinary Reactions to Extraordinary Events* Ray Broadus Browne, Arthur G. Neal, 2001 The essays in this collection present communities beset by unexpected social and physical events Some outline immediate responses that soon pass and some that will not go away Who would have foreseen that Elvis would be a phenomenon apparently as lasting as the faces on Mount Rushmore Cultural history will not allow us to forget the H G Wells account of the Martian attack nor can we ever forget the continued terror of the Chernobyl explosion *Ordinary Reactions to Extraordinary Events* catalogues on the Geiger counter of human emotions societal reactions to events both earthshaking and culture disturbing **Storytelling and the Sciences of Mind** David Herman, 2017-02-24 An transdisciplinary exploration of narrative not just as a target for interpretation but also as a means for making sense of experience itself With *Storytelling and the Sciences of Mind* David Herman proposes a cross fertilization between the study of narrative and research on intelligent behavior This cross fertilization goes beyond the simple importing of ideas from the sciences of mind into scholarship on narrative and instead aims for convergence between work in narrative studies and research in the cognitive sciences The book as a whole centers on two questions How do people make sense of stories And How do people use stories to make sense of the world Examining narratives from different periods and across multiple media and genres Herman shows how traditions of narrative research can help shape ways of formulating and addressing questions about intelligent activity and vice versa Using case studies that range from Robert Louis Stevenson's Dr Jekyll and Mr Hyde to sequences from *The Incredible Hulk* comics to narratives told in everyday interaction Herman considers storytelling both as a target for interpretation and as a resource for making sense of experience itself In doing so he puts ideas from narrative scholarship into dialogue with such fields as psycholinguistics philosophy of mind and cognitive social and ecological psychology After exploring ways in which interpreters of stories can use textual cues to build narrative worlds or storyworlds Herman investigates how this process of narrative worldmaking in turn supports efforts to understand and engage with the conduct of persons among other aspects of lived experience
