Re-Making Communication at Work J. Sostrin, 2013-11-07 Almost 400 years ago philosophers John Locke and David Hume implicitly defined communication as a tool for the transmission of pure ideas stating that the ideas themselves are what matter not the way in which they are expressed and exchanged Now known as the transmission model this form of communication is still the foundation for academic courses in communication theory and practice and is embedded in most business literature and education that address subjects related to workplace communication organization behavior and culture leadership and conflict resolution But what if this accepted model of communication was incomplete Re Making Communication at Work argues that the transmission model of communication needs to be replaced by a new approach to communication Sostrin challenges the status quo by exposing the most common myths that inaccurately define successful communication at work These misperceptions are replaced by a set of core principles that deliver a clear mandate for re making communication at work Sostrin not only provides the theoretical foundation for this new approach but he uses a straightforward model and exercises that demonstrate how managers students and consultants can powerfully improve relationships decision making and collaboration with a few lines and circles

Angeliki Athanasiadou, René Dirven, 1997-01-01 The volume brings together a selection of papers from a symposium on Conditionality held in the University of Duisburg on 25 26 March 1994 Ten years after the Stanford symposium the Proceedings of which were edited by Traugott et al 1986 the area of conditionality is revisited in a synthesis of issues and aspects with insights drawn from the wider framework of general processes of conceptualisation One major question is therefore what conceptual categories fall under conditionality or how far the notion of conditionality can be extended The volume represents the up to date research on most aspects of conditionality some of which include the relationship between conditionality hypotheticality and counterfactuality polarity historical perspectives concessives the acquisition of conditionals
