

The image shows a vintage Penguin Map of Europe. The map is a standard road map with various colors for land and water. A large red rectangular box is superimposed over the center of the map. Inside this box, the title 'THE PENGUIN MAP OF EUROPE' is written in large, white, sans-serif capital letters. Above the title, the author's name 'Michael Middleditch' is printed in a smaller white font. Below the title, there is a short paragraph in white text. The map background shows parts of Germany, Switzerland, Italy, and the Soviet Union. A small circular logo with a penguin is visible in the top right corner of the map.

Mapping Europe's Borderlands Steven Seegel, 2012-05-14 The simplest purpose of a map is a rational one to educate to solve a problem to point someone in the right direction Maps shape and communicate information for the sake of improved orientation But maps exist for states as well as individuals and they need to be interpreted as expressions of power and knowledge as Steven Seegel makes clear in his impressive and important new book *Mapping Europe's Borderlands* takes the familiar problems of state and nation building in eastern Europe and presents them through an entirely new prism that of cartography and cartographers Drawing from sources in eleven languages including military historical pedagogical and ethnographic maps as well as geographic texts and related cartographic literature Seegel explores the role of maps and mapmakers in the East Central European borderlands from the Enlightenment to the Treaty of Versailles For example Seegel explains how Russia used cartography in the aftermath of the Napoleonic Wars and later formed its geography society as a cover for gathering intelligence He also explains the importance of maps to the formation of identities and institutions in Poland Ukraine and Lithuania as well as in Russia Seegel concludes with a consideration of the impact of cartographers regional and socioeconomic backgrounds educations families career options and available language choices

The Europe Illusion Stuart Sweeney, 2019-04-01 In *The Europe Illusion* Stuart Sweeney considers Britain's relationships with France and Prussia Germany since the map of Europe was redrawn at Westphalia in 1648 A timely and far sighted study it argues that integration in Europe has evolved through diplomatic economic and cultural links cemented among these three states Indeed as wars became more destructive and economic expectations were elevated these states struggled to survive alone Yet it has been rare for all three to be friends at the same time Instead apparent setbacks like Brexit can be seen as reflective of a more pragmatic Europe where integration proceeds within variable geometry

Iron Age Myth and Materiality Lotte Hedeager, 2011-04-29 *Iron Age Myth and Materiality* an Archaeology of Scandinavia AD 400 1000 considers the relationship between myth and materiality in Scandinavia from the beginning of the post Roman era and the European

Migrations up until the coming of Christianity It pursues an interdisciplinary interpretation of text and material culture and examines how the documentation of an oral past relates to its material embodiment While the material evidence is from the Iron Age most Old Norse texts were written down in the thirteenth century or even later With a time lag of 300 to 900 years from the archaeological evidence the textual material has until recently been ruled out as a usable source for any study of the pagan past However Hedeager argues that this is true regarding any study of a society's short term history but it should not be the crucial requirement for defining the sources relevant for studying long term structures of the *longue durée* or their potential contributions to a theoretical understanding of cultural changes and transformation In Iron Age Scandinavia we are dealing with persistent and slow changing structures of worldviews and ideologies over a wavelength of nearly a millennium Furthermore iconography can often date the arrival of new mythical themes anchoring written narratives in a much older archaeological context Old Norse myths are explored with particular attention to one of the central mythical narratives of the Old Norse canon the mythic cycle of Odin king of the Norse pantheon In addition contemporaneous historical sources from late Antiquity and the early European Middle Age the narratives of Jordanes Gregory of Tours and Paul the Deacon in particular will be explored No other study provides such a broad ranging and authoritative study of the relationship of myth to the archaeology of Scandinavia

Where are Europe's New Borders? Anthony Cooper, 2018-02-02 Europe's borders have always been historically ambiguous and dynamic whereby borders shift and change character and new borders replace older ones By focusing upon the title question where are Europe's new borders this volume looks at the present state of European bordering and questions the often taken for granted relationships between borders borderers and the bordered While each chapter concentrates on a different but overlapping border issue or perspective they are united through their focus on the level of everyday bordering practices and experiences as well as the meaning that borders have upon all stakeholders and the relationships between them To talk about border meaning including the perspective of the researchers themselves and how that meaning continually re-creates and is re-created by bordering practices is to critically question where important borders lie why and for whom do they matter and how are they imposed maintained and resisted As a result the chapters engage with issues of border violence the power of maps and symbols *carto politics* migrant mobility gender and the rise of the far right in Europe Taken together this edited collection will be of interest to border scholars as well as students of European politics more generally This book was previously published as a special issue of the *Journal of Contemporary European Studies*

The Nation, Europe, and the World Hanna Schissler, Yasemin Nuhoglu Soysal, 2005-04-01 Textbooks in history geography and the social sciences provide important insights into the ways in which nation states project themselves Based on case studies of France Germany the Netherlands Spain Greece Turkey Bulgaria Russia and the United States this volume shows the role that concepts of space and time play in the narration of our country and the wider world in which it is located It explores ways in which in western European countries the nation is reinterpreted

through European lenses to replace national approaches in the writing of history. On the other hand, in an effort to overcome Eurocentric views, world history has gained prominence in the United States. Yet again, East European countries, coming recently out of a transnational political union, have their own issues with the concept of nation to contend with. These recent developments in the field of textbooks and curricula open up new and fascinating perspectives on the changing patterns of the repositioning process of nation states in West as well as Eastern Europe and the United States in an age of growing importance of transnational organizations and globalization.
