The Hamlyn Of Tropical Freshwater Fish:

Tropical Aquarium Fishes Dick Mills, 1988 **The Cichlid Fishes** George Barlow, 2008-12-15 Cichlid fishes are amazing creatures. In terms of sheer number of species they are the most successful of all families of vertebrate animals and the extent and speed with which they have evolved in some African lakes has made them the darlings of evolutionary biologists. But what truly captivates biologists like George Barlow not to mention thousands of aquarists the world over is the complexity of their social lives and their devotion to family. Most species of cichlids are monogamous and many pairs share the responsibility of raising offspring. In this wonderful book Barlow describes the unusually high intelligence of these fishes, their complex mating and parenting rituals, their bizarre feeding and fighting habits and the unusual adaptations and explosive rate of speciation that have enabled them to proliferate and flourish. A celebration of their diversity, *The Cichlid Fishes* is also a marvelous exploration of how these unique animals might help resolve the age-old puzzle of how species arise and evolve. *The Tetra Encyclopedia of Freshwater Tropical Aquarium Fishes* Dick Mills, Gwynne Vevres, D. L. Mills, 1989

Keeping Tropical Fish Cliff Harrison, 1984 **Popular Guide to Tropical Aquarium Fishes** Dick Mills, 1993

Women in ichthyology: an anthology in honour of ET, Ro and Genie E.K. Balon, Michael N. Bruton, David L.G. Noakes, 2012-12-06 This special volume is dedicated to the contributions of women ichthyologists. Three colleagues were selected to represent all women ichthyologists: Ethelwynn Trewavas, ET, Rosemary Lowe McConnell, Ro, and Eugenie Clark, Genie. All have had distinguished professional careers and have contributed in their own ways to their science. The career of each is highlighted by a personal interview with one of the editors of the volume, a bibliography of their lifetime publications, and a biography of their careers. Questions of historical inequities and current controversies in the treatment of women ichthyologists by their peers are raised and addressed by the women themselves. The personal and professional influences of these three women and other women ichthyologists are highlighted. A survey article by Pat Brown brings a number of women ichthyologists to the attention of a broader audience and points the way for a more comprehensive historical consideration of the accomplishments and contributions of women ichthyologists. The volume continues with 16 solicited and contributed papers. ET's studies of taxonomy and life history are echoed in papers on the taxonomy and systematics of marine angelfishes and of freshwater bitterlings, a review of reproduction in the North Atlantic ichthyofauna, and a comparison of reproductive styles and systematics of African minnows. Ro's studies on ecology, life history, and behaviour are paralleled by papers on growth and metabolism in piranha, the community structure in tide pool fishes, and the social system and reproductive patterns in groupers. Genie's pioneering work on sexual roles and sex change, and her field studies of the behaviour of marine fishes, are reflected in papers on gonadal structure and environmental sex determination in brook lamprey, sexual patterns in hawfish, reproduction and systematics in phallostethids, gonadal structure and systematics in gobiids, reproductive and predator avoidance behaviour in razorfish, early ontogeny of an African mouth brooder, and alternative life histories in killifish.
