The Han Civilization Of China:

The Culture of the Qin and Han Dynasties of China Vic Kovacs, 2016-07-15 The dynasties of ancient China ruled the country for centuries The contributions of the leaders and people of this time have a legacy that can still be seen in Chinese culture today This title begins with background information on China before the Qin conquest and ends with the end of the Han Dynasty in AD 220 Readers learn about life in Chinese cities and the countryside as well as important social studies topics such as religion class structure education family life food and clothing By the end of this title readers will understand how cultural life in Han China set a pattern that is still seen today The Han Dynasty Charles River Charles River Editors, 2018-04-29 Includes pictures Includes ancient accounts Includes online resources and a bibliography for further reading Even before the first Chinese dynasty complex societies inhabiting the area now known as China organized into settlements and the most important settlements were protected by rammed earth walls The first dynasty the Shang 1600 1050 BCE built large walls as early as around 1550 BCE Differing from later walls which were built along a strategic defense line these walls were built to enclose the settlements and areas The Shang would eventually be conquered from the west by the Zhou Dynasty 1046 256 BCE which developed a complex system of government In fact it was the Zhou system's decline that Confucius 551 479 BCE witnessed and drew from greatly for his political philosophy The Zhou also created walled cities and it was at this time that the first major conflicts with northern tribesmen the Xianyun were recorded As the newly independent states vied for supremacy in a state of constant warfare northern barbarians were also a constant menace Eventually the Chinese succeeded in eliminating many of those on their immediate northern border but it was a bittersweet victory because it meant there was no longer a buffer between China and the even fiercer Mongols further north This new proximity led to increased cultural exchange as well as the Chinese adoption of nomadic fighting techniques Ultimately it was the wall of the state of Qi that was the first to earn the name great literally long wall because the state of Qin proved most adept at the new warfare and conquered all the others It was this dynasty that unified the kingdoms under the name of China but put simply the Qin were a war machine They defeated the Mongols north of the border and expanded their control there while also fighting expansionary wars in all directions The first Qin emperor died 11 years into his reign and was buried with the famous Terracotta warriors These soldiers and equipment all carved out of stone and other materials formed an imperial army that would accompany the emperor into the afterlife After the emperor's death rebellion and strife took hold of the empire and soon a new dynasty the Han dynasty 206 BCE 220 CE was founded The previous emperor Meng Tian was forced to commit suicide and the Han dynasty became known for maintaining a long period of wealth and prosperity during which Confucianism and other major intellectual trends in China flowered However they had trouble with the nomads in the north too and after suffering decisive military defeats the Han decided that only through a policy of peace and reconciliation could they manage relations with the Xiongnu They offered material goods and marriages and the border was secured but walls

were also still obviously necessary. Ultimately the massive investment in military expansion and conquest reaped great rewards for the Han but all came at a very dear cost to the empire. As a result of their growing militarism the trend of using diplomacy slowly fell out of favor around the start of the 1st century CE but even when the old structure of peace and diplomacy with the northerners was reinstated the Xiongnu were asked to submit to a nominally inferior position in their relationship with China. It appeared to be a compromise that would benefit both sides but soon afterward a Han regent usurped power and the kingdom fell into civil war. The dynasty recovered at the time but never fully and it continued on the path of steady decline.

Tse,2018-06-27 In the Later Han period the region covering the modern provinces of Gansu southern Ningxia eastern Qinghai northern Sichuan and western Shaanxi was a porous frontier zone between the Chinese regimes and their Central Asian neighbours not fully incorporated into the Chinese realm until the first century BCE Not surprisingly the region had a large concentration of men of martial background from which a regional culture characterized by warrior spirit and skills prevailed This military elite was generally honoured by the imperial centre but during the Later Han period the ascendancy of eastern based scholar officials and the consequent increased emphasis on civil values and de militarization fundamentally transformed the attitude of the imperial state towards the northwestern frontiersmen leaving them struggling to achieve high political and social status From the ensuing tensions and resentment followed the capture of the imperial capital by a northwestern military force the deposing of the emperor and the installation of a new one which triggered the disintegration of the empire Based on extensive original research and combining cultural military and political history this book examines fully the forging of military regional identity in the northwest borderlands and the consequences of this for the early Chinese empires
