the medical school curriculum took place in the early 1970s an effort was made to synthesize the minimum core curriculum for sophomore medical students and the distillation of essential material to be covered in the area of renal pathophysiology led to the development of the first edition of a renal syllabus This syllabus has been used in our department since 1974 and following some of the recommendations and critiques of students and faculty it has been entirely reworked many times to improve its effectiveness and value This book is a direct extension of that syllabus integrated with contributions from faculty members in our Renal Division and expanded to include a section on therapy in most chapters It is our hope that this format will serve the needs of not only sophomore and senior medical students but also house officers nephrology fellows and clinicians
