The Passions:

The Passions Robert C. Solomon, 1993-01-01 An abridged reprint of the Doubleday edition of 1976 with new preface and conclusion by the author *The Passions* P. M. S. Hacker, 2017-12-18 A survey of astonishing breadth and penetration No cognitive neuroscientist should ever conduct an experiment in the domain of the emotions without reading this book twice Parashkev Nachev Institute of Neurology UCL There is not a slack moment in the whole of this impressive work With his remarkable facility for making fine distinctions and his commitment to lucidity Peter Hacker has subtly characterized those emotions such as pride shame envy jealousy love or sympathy which make up our all too human nature This is an important book for philosophers but since most of its illustrative material comes from an astonishing range of British and European literature it is required reading also for literary scholars or indeed for anyone with an interest in understanding who and what we are David Ellis University of Kent Human beings are all subject to boundless flights of joy and delight to flashes of anger and fear to pangs of sadness and grief We express our emotions in what we do how we act and what we say and we can share our emotions with others and respond sympathetically to their feelings Emotions are an intrinsic part of the human condition and any study of human nature must investigate them In this third volume of a major study in philosophical anthropology which has spanned nearly a decade one of the most preeminent living philosophers examines and reflects upon the nature of the emotions advancing the view that novelists playwrights and poets rather than psychologists and cognitive neuroscientists elaborate the most refined descriptions of their role in human life In the book's early chapters the author analyses the emotions by situating them in relation to other human passions such as affections appetites attitudes and agitations While presenting a detailed connective analysis of the emotions Hacker challenges traditional ideas about them and criticizes misconceptions held by philosophers psychologists and cognitive neuroscientists With the help of abundant examples and illustrative quotations from the Western literary canon later sections investigate describe and disentangle the individual emotions pride arrogance and humility shame embarrassment and guilt envy and jealousy and anger The book concludes with an analysis of love sympathy and empathy as sources of absolute value and the roots of morality A masterful contribution this study of the passions is essential reading for philosophers of mind psychologists cognitive neuroscientists students of Western literature and general readers interested in understanding the nature of the emotions and their place in our lives *Deleuze and the Passions* Ceciel Meiborg (Ed.), Sjoerd van Tuinen, 2016 In recent years the humanities social sciences and neuroscience have witnessed an affective turn especially in discourses around post Fordist labor economic and ecological crises populism and identity politics mental health and political struggle This new awareness would be unthinkable without the pioneering work of Gilles Deleuze who replaced judgment with affect as the very material movement of thought every concept is an affective experience a becoming Besides entirely active affects the highest practice of thought there is no thought without passive affects or passions Instead of a calm and rational philosophy of passions Deleuzian thought is

therefore inseparable from isolated and passionate cries that deny what everybody knows and what nobody can deny every true thought is an aggression This inseparability of reason and passion is by no means an anti intellectualist or irrationalist stance Rather it is critical since it protects reason from its self imposed stupidity by relating it to the unthought forces that condition it And it is clinical because thought becomes possessed by a power of selection The purely active i e free floating unrecorded desire is never enough to produce a consistent relation to the future which is why we need the passions to give us an initial orientation to force and enable us to think Passions are the beliefs perceptions representations and opinions that attach us to the world they make up the very material of which our lives and thoughts are composed Instead of truth as the ultimate criterion of judgment the only principle according to which affective becomings can be selected and evaluated is the extent to which they proliferate joy Spinoza and Marx show how the recruitment of desire traditionally takes place through the tyrants and priests who inspire sad passions in us Similarly the work of Deleuze and Guattari on capitalism and schizophrenia can be read as an encyclopedia of the passions that constitute the affective infrastructure of the socius of contemporary capitalism If it takes a lot of inventiveness or imagination to be able to diagnose our present becomings this is because becomings are always composites of joyful and sad passions Capitalism could not exist if it did not also inspire happiness love courage and perhaps even beatitude That is why today we witness the spectacle of the happily dominated Frédéric Lordon of the self entrepreneur the managerial class the flex worker the citizen consumer the bean roasting hipster and the self managed team It is within this field of contradictory and heterogeneous passions that the authors of this volume pursue the diagnosis of our past and present becomings Their contributions add up to a systematic taxonomy of the passions and indicate their importance for a thinking that reaches beyond itself

Focusing on the new theories of human motivation that emerged during the transition from feudalism to the modern period this is the first book of new essays on the relationship between politics and the passions from Machiavelli to Bentham Contributors address the crisis of moral and philosophical discourse in the early modern period the necessity of inventing a new way of describing the relation between reflection and action and private and public selves the disciplinary regulation of the body and the ideological constitution of identity The collection as a whole asks whether a discourse of the passions might provide a critical perspective on the politics of subjectivity Whatever their specific approach

to the question of ideology all the essays reconsider the legacy of the passions in modern political theory and the importance of the history of politics and the passions for modern political debates Contributors in addition to the editors are Nancy Armstrong Judith Butler Riccardo Caporali Howard Caygill Patrick Coleman Frances Ferguson John Guillory Timothy Hampton John P McCormick and Leonard Tennenhouse

Plays on the Passions Joanna Baillie, 2001-02-19 Baillie's eminently readable dramas stand at the crossroads of the Scottish Enlightenment and early Romanticism and compellingly engage with questions of women's rights Her exploration of the passions first published in 1798 is here reissued with a wealth of contextual materials including The Introductory Discourse Baillie's own brand of feminist literary criticism The three plays included here are Count Basil A Tragedy and The Tryal A Comedy which show love from opposing perspectives and De Monfort A Tragedy which explores the drama of hate Among other appendices the Broadview edition includes materials on the contemporary philosophical understanding of the passions and contemporary reviews Baillie's work is enjoying a revival of interest She lived a long life 1762-1851 and had a wide circle of literary friends including Maria Edgeworth and Sir Walter Scott who termed her a female Shakespeare Scottish born she moved to England in her twenties where she then resided Her Plays on the Passions alternatively known as A Series of Plays in which it is Attempted to Delineate the Stronger Passions of the Mind Each Passion being the Subject of a Tragedy and Comedy was produced in three volumes between 1798 and 1812 The first volume created quite a stir amongst the literary circles of London and Edinburgh when introduced anonymously The speculation into the authorship concluded two years later when Baillie came forward as the writer of the collection thereby causing a subsequent sensation since no one had considered the shy spinster a candidate in the mystery

Book 2, Of the passions; Book 3, Of morals David Hume, 1854

Adam Smith and the Economy of the Passions Jan Horst Keppler, 2010-07-14 The fertility of Adam Smith's work stems from a paradoxical structure where the pursuit of economic self interest and wealth accumulation serve wider social objectives The incentive for this wealth accumulation comes from a desire for social recognition or sympathy the need to recognise ourselves in our peers which is the primary incentive for moderating and transforming our violent and egotistical passions Adam Smith thus examines in detail the subliminal emotional structure underlying market behaviour This new book by Professor Jan Horst Keppler presents an Adam Smith for the 21st century more sceptical searching and daring than he has ever been portrayed before Without disputing its benefits Professor Keppler's original contribution explores the anarchic passions constantly threatening to destroy all social bounds and how the overarching desire for love and social recognition provides the Smithian individual with the incentive to transform his unsocial passions into a desire for social advancement and economic wealth with the view to gaining the vital approbation of his peers One of the most striking results of this new reading of Adam Smith is the latter's insistence on the primacy of exchange value over use value In other words the quest for wealth is exclusively driven by the value it represents in the eyes of others rather than by any value in

individual use At a moment of crisis where the link between true economic values and virtual financial values is more fragile than ever Adam Smith's work is a profoundly contemporary reminder that in the absence of personal ethical groundings our economic actions are only grounded in the game of mirrors we play with our peers This book will be of interest to postgraduate students and researchers in the History of Economics or indeed any reader with an interest in the psychological foundations of a market economy and its theoretical representations as developed by Adam Smith

The Passions of Peter Sellars Susan McClary, 2019-01-25 Recognized as one of the most innovative and influential directors of our time Peter Sellars has produced acclaimed and often controversial versions of many beloved operas and oratorios He has also collaborated with several composers including John C Adams and Kaija Saariaho to create challenging new operas The Passions of Peter Sellars follows the development of his style beginning with his interpretations of the Mozart Da Ponte operas proceeding to works for which he assembled the libretti and even the music and concluding with his celebrated stagings of Bach's passions with the Berlin Philharmonic Many directors leave the musical aspects of opera entirely to the singers and conductor Sellars however immerses himself in the score and has created a distinctive visual vocabulary to embody musical gesture on stage drawing on the energies of the music as he shapes characters ensemble interaction and large scale dramatic trajectories As a leading scholar of gender and music and the history of opera Susan McClary is ideally positioned to illuminate Sellars's goal to address both the social tensions embodied in these operas as well as the spiritual dimensions of operatic performance McClary considers Sellars's productions of Mozart's *Le nozze di Figaro* *Don Giovanni* and *Cos fan tutte* Handel's *Theodora* Messiaen's *Saint François d'Assise* John C Adams's *Nixon in China* *The Death of Klinghoffer* *El Niño* and *Doctor Atomic* Kaija Saariaho's *L'amour de loin* *La Passion de Simone* and *Only the Sound Remains* Purcell's *The Indian Queen* and Bach's passions of *Saint Matthew* and *Saint John* Approaching Sellars's theatrical strategies from a musicological perspective McClary blends insights from theater film and literary scholarship to explore the work of one of the most brilliant living interpreters of opera

The Passions of the Soul and Other Late Philosophical Writings René Descartes, 2015-11-12 Those most capable of being moved by passion are those capable of tasting the most sweetness in this life Descartes is most often thought of as introducing a total separation of mind and body But he also acknowledged the intimate union between them and in his later writings he concentrated on understanding this aspect of human nature The Passions of the Soul is his greatest contribution to this debate It contains a profound discussion of the workings of the emotions and of their place in human life a subject that increasingly engages the interest of philosophers and intellectual and cultural historians It also sets out a view of ethics that has been seen as a radical reorientation of moral philosophy This volume also includes both sides of the correspondence with Princess Elisabeth of Bohemia one of Descartes's keenest disciples and shrewdest critics which played a crucial role in the genesis of The Passions as well as the first part of The Principles of Philosophy which sets out the key positions of Descartes's philosophical system ABOUT THE SERIES For

over 100 years Oxford World's Classics has made available the widest range of literature from around the globe Each affordable volume reflects Oxford's commitment to scholarship providing the most accurate text plus a wealth of other valuable features including expert introductions by leading authorities helpful notes to clarify the text up to date bibliographies for further study and much more
