Hunter, 2012-04-30 Richly detailed definitive account covers every aspect of steamboat s development from construction equipment and operation to races collisions rise of competition and ultimate decline of steamboat transportation **Bazaar India** Anand A. Yang, 1999-02-01 The role of markets in linking local communities to larger networks of commerce culture and political power is the central element in Anand A Yang s provocative and original study Yang uses bazaars in the northeast Indian state of Bihar during the colonial period as the site of his investigation The bazaar provides a distinctive locale for posing fundamental questions regarding indigenous societies under colonialism and for highlighting less familiar aspects of colonial India At one level Yang reconstructs Bihar s marketing system from its central place in the city of Patna down to the lowest rung of the periodic markets But he also concentrates on the dynamics of exchanges and negotiations between different groups and on what can be learned through the voices of people in the bazaar landholders peasants traders and merchants Along the way Yang uncovers a wealth of details on the functioning of rural trade markets fairs and pilgrimages in Bihar A key contribution of Bazaar India is its many stranded narrative history of some of South Asia s primary actors over the past two centuries But Yang s approach is not that of a detached observer rather his own voice is engaged with the voices of the past and with present day historians By focusing on the world beyond the mud walls of the village he widens the imaginative geography of South Asian history Readers with an interest in markets social history culture colonialism British India and historiographic methods will welcome his book Power over Peoples Daniel R. Headrick, 2012-06-28 A major history of technology and Western conquest For six hundred years the nations of Europe and North America have periodically attempted to coerce invade or conquer other societies They have relied on their superior technology to do so yet these technologies have not always guaranteed success Power over Peoples examines Western imperialism s complex relationship with technology from

the first Portuguese ships that ventured down the coast of Africa in the 1430s to America's conflicts in the Middle East today Why did the sailing vessels that gave the Portuguese a century long advantage in the Indian Ocean fail to overcome Muslim galleys in the Red Sea Why were the same weapons and methods that the Spanish used to conquer Mexico and Peru ineffective in Chile and Africa Why didn't America's overwhelming air power assure success in Iraq and Afghanistan In *Power over Peoples* Daniel Headrick traces the evolution of Western technologies from muskets and galleons to jet planes and smart bombs and sheds light on the environmental and social factors that have brought victory in some cases and unforeseen defeat in others He shows how superior technology translates into greater power over nature and sometimes even other peoples yet how technological superiority is no guarantee of success in imperialist ventures because the technology only delivers results in a specific environment or because the society being attacked responds in unexpected ways Breathtaking in scope *Power over Peoples* is a revealing history of technological innovation its promise and limitations and its central role in the rise and fall of empire Some images inside the book are unavailable due to digital copyright restrictions
