## Steel State And Labor:

Steel, State, and Labor Anthony Daley, 2010-11-23 The creation of wealth depends on the capacity of economic actors to adapt to market changes Such adaptation in turn poses fundamental questions about the distribution of resources Daley investigates the interaction among business labor and the state in France in the second half of the twentieth century and reveals how political dynamics refract market pressures He explains how and why profitability came at the expense of union mobilization unemployment and management autonomy vast amounts of state aid and less national control over industrial decision making Report on Conditions of Employment in the Iron and Steel Industry in the United States: Working conditions and the relations of employers and employees United States.
