American Ethnic Groups, the European Heritage Francesco Cordasco,David Nelson Alloway,1981 No descriptive material is available for this title Out of the Crucible Dennis C. Dickerson,1986-09-15 This book examines in depth the century long struggle of Black laborers in the iron and steel industry of western Pennsylvania In the process it shows how the fate of these Black workers mirrors the contemporary predicament of the Black working class and the development of a chronically unemployed underclass in America s declining industrial centers Dickerson argues that persistent racial discrimination within heavy industry and the decline of major industries during the 1970s are key to understanding the social and economic situation of twentieth century urban Blacks Through a blend of historical research and contemporary interviews this study chronicles the struggle of Black steelworkers to gain equality in the industry and the setbacks suffered as American steelmaking succumbed to foreign competition and antiquated modes of production The plight of western Pennsylvania s Black steelworkers reflects that of Black laborers in Chicago Gary Detroit Cleveland Youngstown Birmingham and other major American cities where heavy industry once flourished **False Promises** Stanley Aronowitz,1992 This classic study of the American working class originally published in 1973 is now back in print with a new introduction and epilogue by the author An innovative blend of first person experience and original scholarship Aronowitz traces the historical development of the American working class from post Civil War times and shows why radical movements have failed to

overcome the forces that tend to divide groups of workers from one another The rise of labor unions is analyzed as well as their decline as a force for social change Aronowitz's new introduction situates the book in the context of developments in current scholarship and the epilogue discusses the effects of recent economic and political changes in the American labor movement

Capitalists against Markets Peter A. Swenson, 2002-09-26 Conventional wisdom argues that welfare state builders in the US and Sweden in the 1930s took their cues from labor and labor movements Swenson makes the startling argument that pragmatic social reformers looked for support not only from below but also from above taking into account capitalist interests and preferences Juxtaposing two widely recognized extremes of welfare the US and Sweden Swenson shows that employer interests played a role in welfare state development in both countries

Our Own Time David R. Roediger, Philip S. Foner, 1989-11-17 Our Own Time retells the story of American labor by focusing on the politics of time and the movements for a shorter working day It argues that the length of the working day has been the central issue for the American labor movement during its most vigorous periods of activity uniting workers along lines of craft gender and ethnicity The authors hold that the workweek is likely again to take on increased significance as workers face the choice between a society based on free time and one based on alienated work and unemployment

Power in the Workplace Steven Peter Vallas, 1993-01-07 This book presents a systematic case study of the hi tech communications industry that reveals many trends in managerial authority in the workplace Vallas reveals the mechanisms that enable advanced capitalist firms to achieve and maintain control over the workers they employ He demonstrates that the spread and integration of automated technologies place lower level human labor in positions of declining power The new regime does not deskill workers and need not lead toward what some have called electronic sweatshops Nevertheless Vallas concludes that increasing managerial control over production poses a major challenge to those who advocate labor participation in the management of American industries
